

# Does Viettel block websites that contain 18+ videos and images on computers and phones?

Starting from November 13, 2019, Viettel users have reflected on their inability to access websites containing videos and images 18+.

Starting from November 13, 2019, Viettel users have reflected on their inability to access websites containing videos and images 18+. Specifically, when accessing these sites, users will get the message 'Could not access this site' or 'Could not open this site because the server could not be found'.

After receiving the information, many users and major technology sites in Vietnam have also conducted verification. Many sources speculate that this move of Viettel is to respond to the No Nut November event of November, the month of belief saying no to all sex-related activities such as doing sex stories or watching movies. big within 1 month. The No Nut November event has been a trend for men since November 2017.

Viettel's media representative said that they did not take any measures to prevent users from accessing websites containing videos and images 18+. However, Viettel Telecom's customer care department has given other information, Viettel has blocked websites with unhealthy content and has no information on opening and blocking websites.

Very likely, other carriers such as Vinaphone, FPT . will also have similar actions to prevent Viettel from accessing websites with adult content.

1. Viettel is the first and only operator in Vietnam to support eSIM according to Apple standards
2. Speedtest announces VNPT as Vietnam's No. 1 Internet network operator
3. The information 'YouTube blocks user accounts if blocking ads' is false
