### **Learn more about the Animal 4D + app**

In the past, learning English names for animals could only be done through books alone. Until recent years, there are **4D flashcards** with more fresh and interactive images on hand, but it is still quite boring for children. And until now, flashcards are no longer boring with **Octagon 4D +** . Created by **Octagon Studio** , **App Animal 4D** is a fast and lightweight application that allows you to scan animal images and see how animals come to life with cries and lifelike movements right in front of your eyes!

**The Animal 4D app** gives you an unforgettable experience and will always leave a smile on the faces of children and even adults. **App Animal** gives you vivid revival animals like a giraffe or a lion . on the palm of your hand.

**App Animal 4D +** is set up in many languages ??such as English, Spanish, Turkish, Japanese, Bahasa, Dutch, Mandarin, Korean, and French.

**Animal 4D +** has a 3-dimensional mode, interactive quizzes, optimized performance and sound effects are extremely good.

### **How to use animal shape 4D Animal cards on Animal 4D application**

#### **1. Conditions for successful use of Animal 4D application**

1. First, make sure your phone must have *Android 4.0.3 and IOS* operating systems *and* above. *Ram: 1 GB . Camera: 5 MPX* , in order to be able to install the *Animal 4D Card application* .
2. Your phone needs to ensure a sufficient amount of memory and internet connection stability during the application download process.
3. To use the Animal app, you need to prepare two Android or iOS mobile phones. Or you can use 1 phone + 1 iPad, or 1 phone + 1 computer.
4. You need to **download Animal App** on both devices to use it. If you use a phone and a computer, then you install the Animal app on the phone, and on the computer you just need to download and save Animal 4D Cards pictures of animals.

#### **2. How to use the App Animal 4D application to create Animal 4D Card animal image on the phone screen**

**Step 1:** After you've *downloaded Animal 4D + to both devices* . You can use 2 devices as follows:

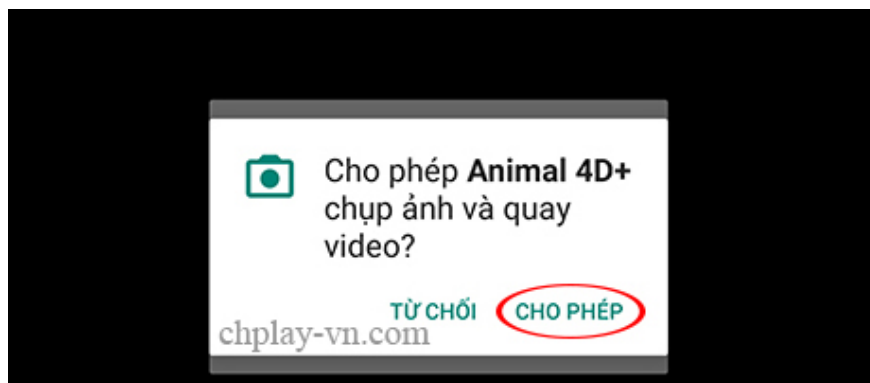

1. **Device 1 (Phone / Ipad / Computer)** : used to display pictures of animals - Flash Card 4D.
2. **Device 2 (Phone)** : Use Camera of Animal 4D + application to scan Flash Cards 4D (Images of animals). 4D image will then display on the screen of this phone.

**Step 2:** Search and save *4D flashcard* images on [google.com.vn](http://google.com.vn).

You can search on google for the keyword '**Photo / 4D Animal Cards**' , then upload images, save images **Card 4D animals** on device 1.

**Step 3:** Start **App Animal 4D +** on the phone.

To open the application successfully you need to click on the word **ALLOWED** so the application can access some devices on your phone as shown below:

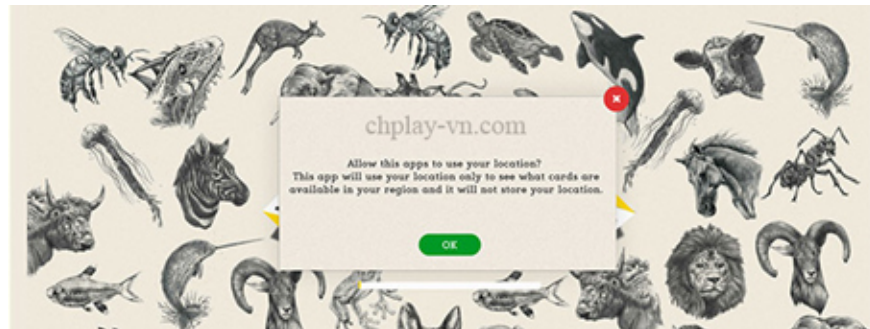

**Step 4:** *Open the Animal 4D app and click Ok .*

You open the Animal application and click Ok to skip the notification interface.

### *Download Animal 4D Card - Interface*

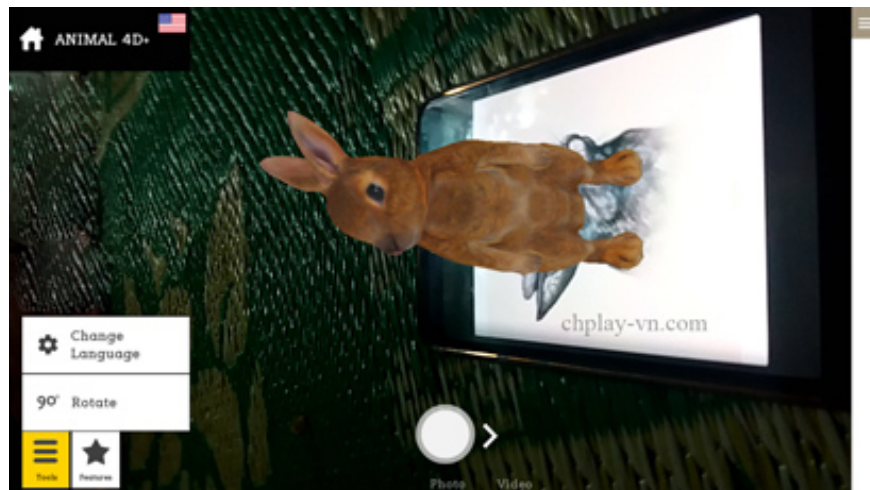

The notification app will then use location services to display the animal cards that match your current location. You can click **OK** or press **X** to turn it off if you do not need it.

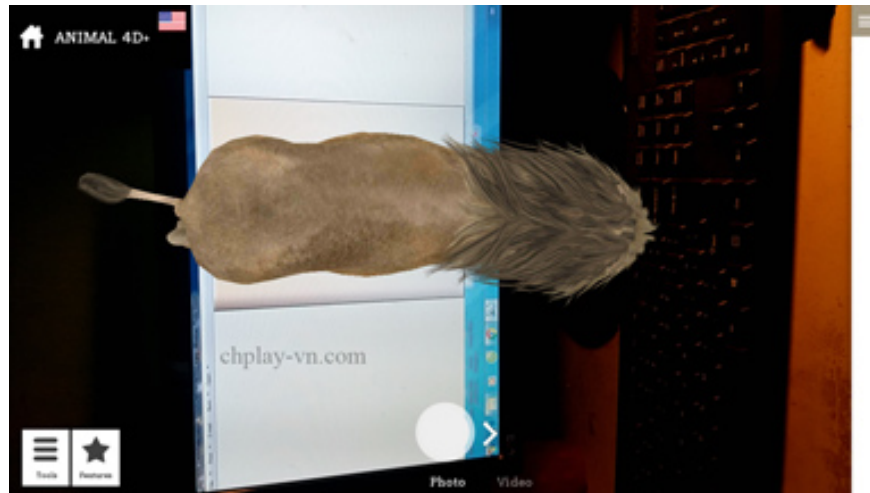

### *Download Animal 4D App - Positioning*

**Step 5:** 3Dize the newly downloaded animal images.

After you have successfully opened the *Animal 4D* application. At the interface of App *Animal 4D*, we use the *camera* on the application to project the *Animal 4D Card image* on device 1 that has just been downloaded. 3D images of 3D animals vividly with real-life cries and movements will immediately appear on your phone screen.

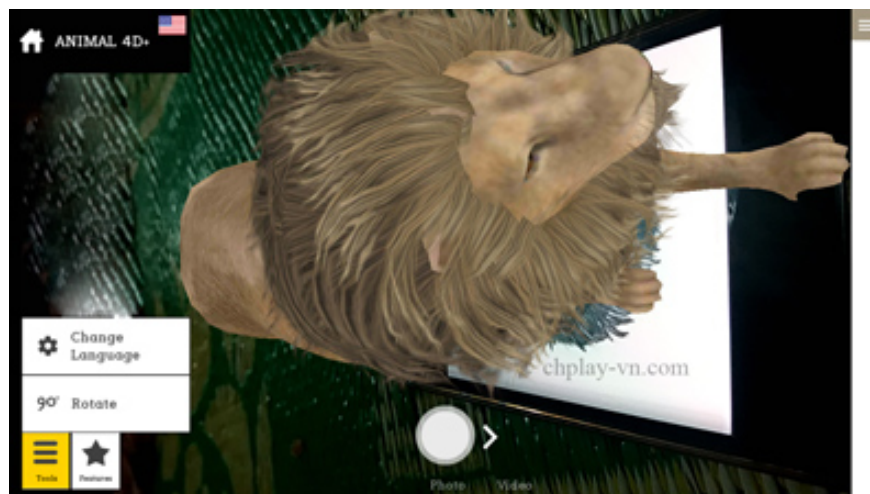

*View animal 4D Card animal images from your phone on the Animal app*

*View 4D FlashCard animal photos from your computer on App Animal*

Also on the upper right corner there is a directory you can visit. This application has a very good reading section for children to listen to audiovisual very well.

When you click on the icon **3 dashes** under the lower left corner of the screen has **an image rotation section 90 degrees** . Users can *zoom in and out* of animals as you like. And best of all, when viewing 4D images on the App Animal app, you can also *take photos or record videos* on phones viewing 4D images by clicking the **Photo** or **Video** icon in the middle of the bottom of the screen. You will save those beautiful moments (like the picture and video above when using this function).
