

Download application to make super smooth GIF image of Motion Stills of Google just arrived at Android

There are quite a few ways to create animated GIFs on your phone, but if you love Google apps, Motion Stills can be a good choice.

There are quite a few ways to create animated GIFs on your phone, but if you love Google apps, Motion Stills can be a good choice.

1. How to create Gif images quickly with Giphy

Motion Stills is an application for creating animations on smartphones, developed by Google. Motion Stills has been released by Google on iOS since 2016, when Android users complained that they could not create smooth GIF animations on their phones.

1. Download Motion Stills for iOS

Recently, Google has released this application on Android. You can create an animation or record a video and fast forward it. In adjustable settings the quality of GIF images. If you want to record images for a longer time, you can join multiple clips together. You can also export your work as a video for better quality.

Demo video animation with Motion Stills on Android:

Animations made with Motion Stills on Nexus:

Export as a video:

In the application there is also a mode called Fast Forward, which helps with better exposure handling.

If you like creating GIF images quickly, simply on Android phones, then you can download Motion Stills: <https://play.google.com/store/apps/details?id=com.google.android.apps.motionstills> & hl = en

Searching on Google Play you may not see Motion Stills, but seeing an app called Animated image with half of a black and blue circle merged, itself.
