Apple has just released the iOS 14.2 operating system update with many beautiful wallpapers. Although Apple wallpapers are only available on certain devices like iPhone 12 and iPad Air 4, you can still have these wallpapers on any iPhone or iPad that supports iOS 14.2.

Not only that, you can also use these wallpapers on other devices like Mac computers. These images are normally in square format, but iOS will automatically crop out the best image to fit your lock screen and home screen.

## Wallpaper iOS 14.2

There are 8 new wallpapers in iOS 14.2, four of them are desert-themed, and the rest are lake-inspired. The desert backgrounds are all beautifully realistic photos, and the lake photo has a bit of a cartoon direction. Each photo has support for dark and light modes, so iOS can automatically switch when you change modes on your phone.
