

# Download free stock wallpapers of Apple devices

Apple's massive wallpaper stock has just been shared on Reddit and users can download it for free.

The wallpaper on Apple devices is now completely free.

Whether we love or hate Apple, we all have to be frank with each other that their repositories are always impressive, and the good news is that users can now download these images for free.

In the past week on the Reddit forum, a generous user posted Apple's massive wallpaper stock, including not only the usual default photos, but also many other wallpapers that the company has provided. granted to users for many years. From familiar phone wallpapers that appear on early iPhone devices to wallpapers on Mac computers running OS9 and earlier.

This will be a great gift for not only iFan who love nostalgia, but also for Windows and Android users.

You can download the wallpaper here.
