The gameplay is also very simple, you just need to choose the available options in the game. Your choices will decide what happens next and how the story ends. Homicipher will have different endings based on the choices you decide.

What game is Homicipher?

Being lost in a dark, unfamiliar place is a common fear, and the perfect start to a horror game. But when that place is filled with strange, menacing creatures, the fear is heightened. And if you're ever faced with a completely new element – ??not understanding what anyone is saying, forcing you to decipher the strange language yourself before being brutally murdered – then Homicipher is it.

The game is designed as a language decoding adventure exclusively for women, skillfully combining romantic elements and the fear of horror characters. No other game has ever brought a similar experience.

What makes Homicipher special is the balance between horror and entertainment. Although there are unexpected death scenes or jumpscare, the game does not cause too much tension. After each failure, you will be returned to the previous exploration stage, and you can stop at any time to check the diary and decode new phrases.

This unique idea creates a new depth of exploration, while also bringing a fresh feel to the horror genre. And of course, the presence of 'sexy monster boys' is a guilty plus.
