

Download link for Windows 10 2004 ISO file

Microsoft is preparing Windows 10 2004, or Windows 10 20H1, for the release of this major feature update for Windows 10. Windows users can now perform a clean install of the upcoming Windows 10 2004 feature update before its official release by using the Windows 10 2004 ISO file.

The Windows 10 version 2004 feature update is expected to be released in spring 2020 and it comes with a long list of improvements and new features. Unlike the November 2019 update, which was more like a service pack, Windows 10 2004 aims to bring new features and improvements not seen in previous versions of Windows.

1. Introduction to Windows 10 2004

Windows 10 2004, also known as 20H1 because it was released in the first half of 2020, is the next major feature update for Windows 10. Although users received a feature update in the second half of 2019, it only included a very small number of additions, and those additions were insignificant.

The company has published the ISO files of the Windows 10 2004 update on the **Windows Insider** website . Microsoft began developing Windows 10 version 2004 in late 2019, which surprised many users. The company decided to upgrade to 19H2 and save the features, as well as major changes, for Windows 10 2004. Now, Microsoft has almost released Windows 10 19H2 to all users and the company is starting to focus on the next major update, Windows 10 2004.
