Immediately after installing and using TeamViewer 64-bit for Windows 10/11, you can not only experience remote control services, but also connect with contacts and private groups through VoIP calls, video conferencing, instant chat, etc., anytime, anywhere in the world.

How to install and use TeamViewer 64-bit for Windows 10/11

I. Download link for Teamviewer 64-bit for Windows 10/11

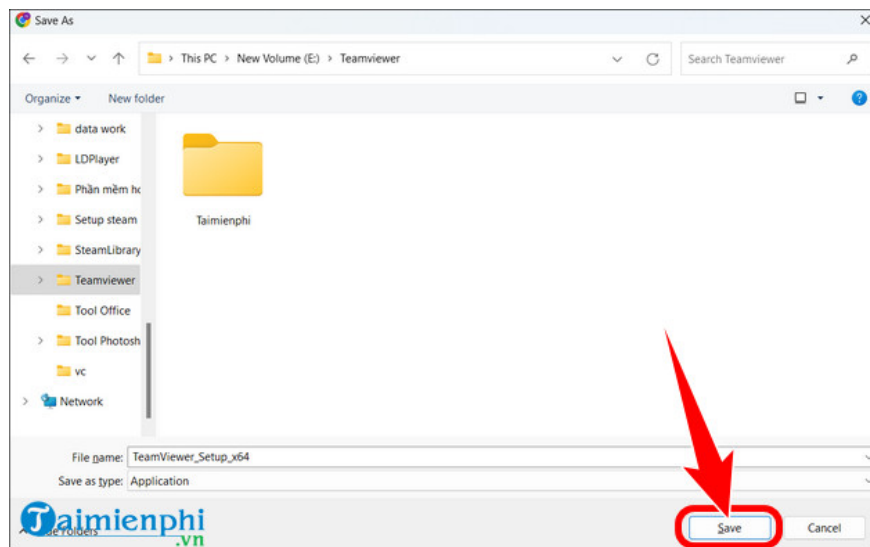

- Download link for Teamviewer 64-bit for Windows 10/11

II. How to install TeamViewer 64-bit for Windows 10/11

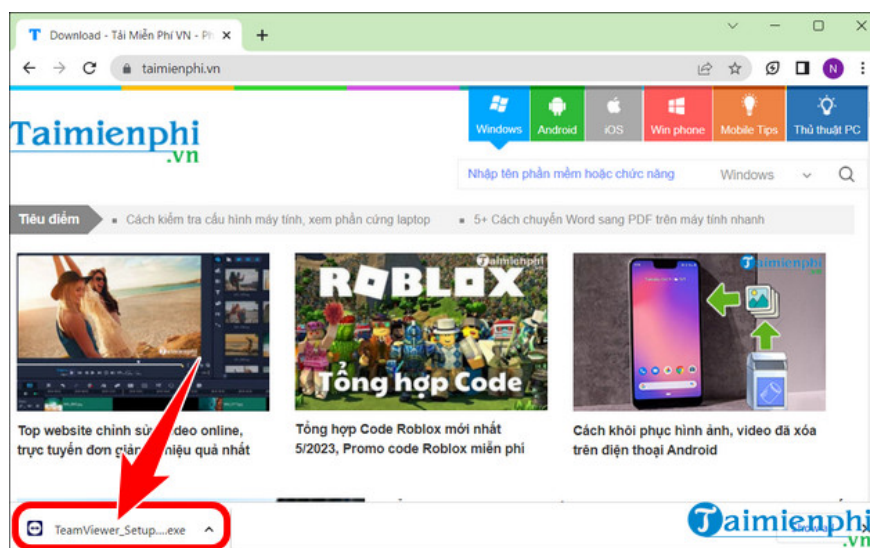

2. Detailed instructions

Step 1: Access **the Teamviewer 64-bit** download link for Windows 10 and 11 shared above.

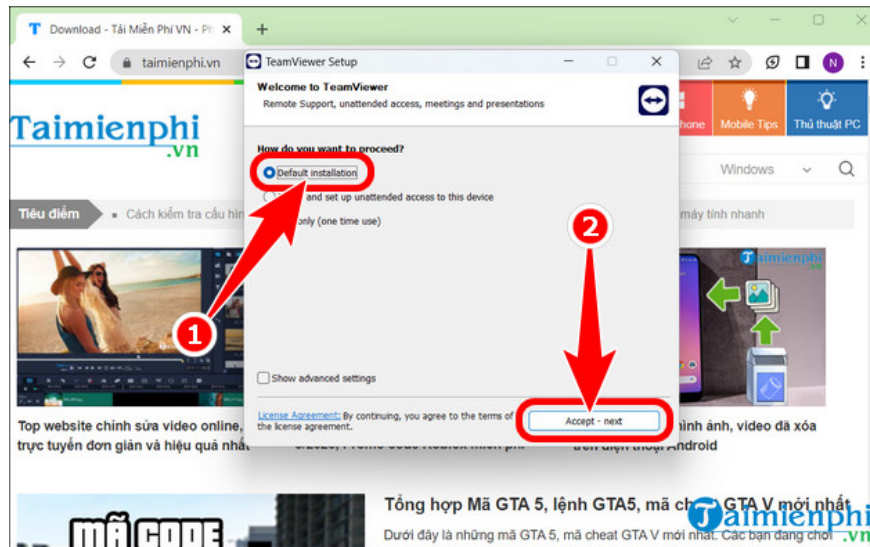

- Choose a location to save the installation file => press **Save** .

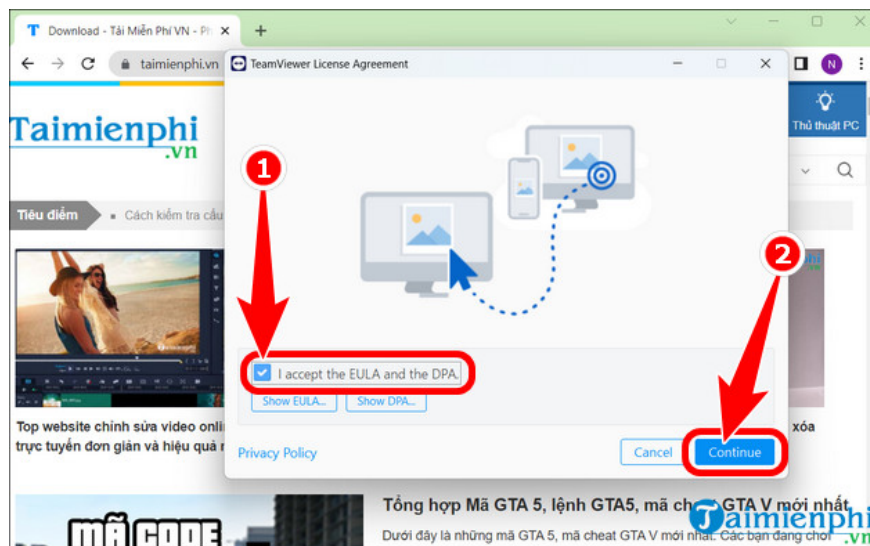

Step 2: Click **the Teamviewer Setup file** .

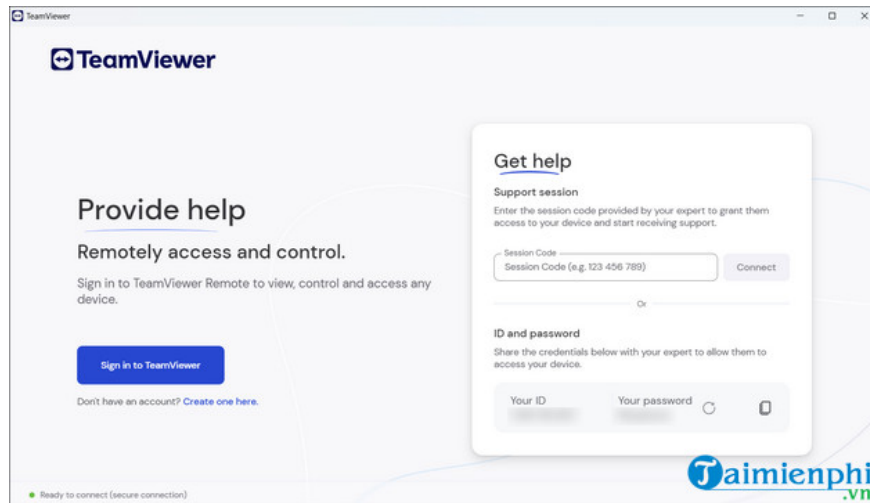

- Select **Default installation** => press **Accept - next** .

- Check the box to agree to the terms and conditions => Continue .

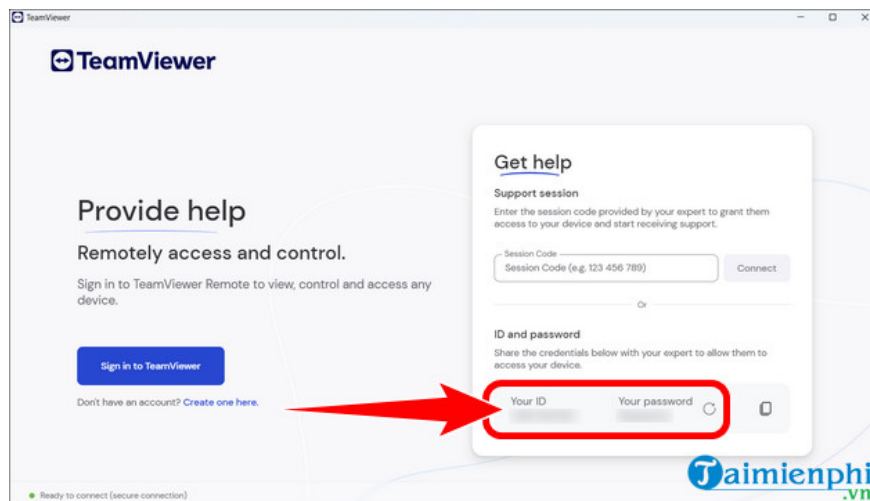

Step 3: After the installation process is complete, the main **Teamviewer 64-bit** interface on Windows 10/11 will appear as shown below.

III. How to use TeamViewer 64-bit for Windows 10/11

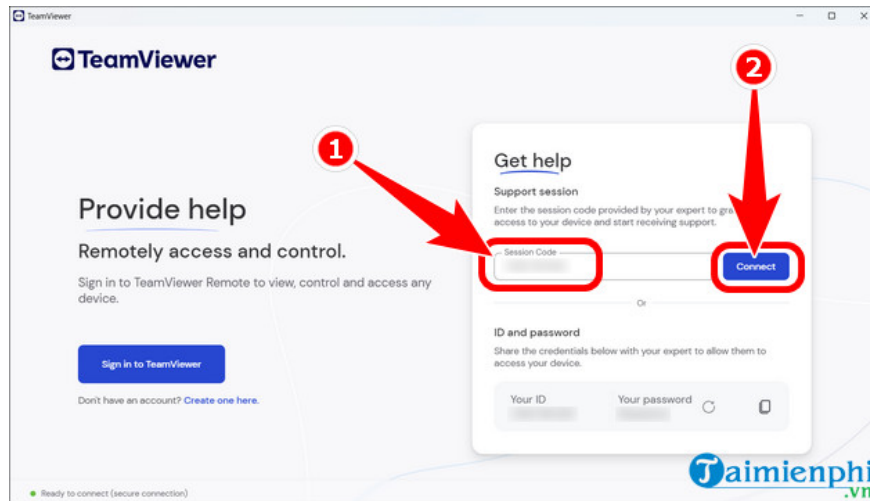

Step 1: Open the **TeamViewer** software you just installed. On the main interface, you will see some information you need to pay attention to:

- **Your ID:** TeamViewer assigns a 10-digit ID to each device, which remains unchanged.
- **Your Password:** This consists of 8 digits and changes frequently each time the software is reopened.

Step 2: To use TeamViewer to connect to another PC, both devices need to have **the same version of TeamViewer** installed .

- Next, enter **the Partner ID** (the ID of the computer to connect) in the **Session Code** field => click **Connect** . A message box will appear asking for the password to access that computer => Enter the **password** and then select **Connect** to complete the connection process.

IV. Key Features of Teamviewer

- Supports remote control of other computers.
- Ensures secure connections through AES 256-bit session encryption and RSA 2048-bit key exchange.
- Allows users to restart the system or server while on the go.
- Easier data transfer to partners.

TeamViewer now has a new version. You can download TeamViewer 15 here to use the latest features of this version.

However, for future convenience, you can **register for TeamViewer** and unlock features such as account management, sending emails, photos, and messages, maximizing the capabilities of this remote computer control software.
