

Download this wallpaper for iOS 12.1, the iPhone screen will be interesting to make the folder become transparent

Sometimes, software errors do not cause problems and even give users interesting experiences. And an error called 'Mysterious iPhone Wallpaper' due to a recent @heyeased Twitter account discovered on iOS 12.1 update is an example.

Sometimes, software errors do not cause problems and even give users interesting experiences. And an error called 'Mysterious iPhone Wallpaper' due to a recent @heyeased Twitter account discovered on iOS 12.1 update is an example.

After downloading a few special wallpapers to your device, set the 'Reduce Transparency' setting in Settings. Your iPhone will crash on the screen, this is not a fatal error but will make the folder transparent look very fancy.

If you want to have an interesting experience like this, you can try activating this error by going to **Settings** -> **General** -> **Accessibility** , turning on **Reduce Transparency** .

Next, visit the link below, click on the wallpaper you want and download.

1. Wallpaper for iPhone with rabbit ears
2. Wallpaper for iPhone without rabbit ears

Finally, you just need to select the wallpaper for the iPhone. With iPhone with rabbit ears, choose Still, and choose Perspective for iPhone without rabbit ears.

As a result, the entire background of the main screen of the iPhone will have a monochrome color while the folders are transparent as shown below.
