The application supports finding and deleting components:

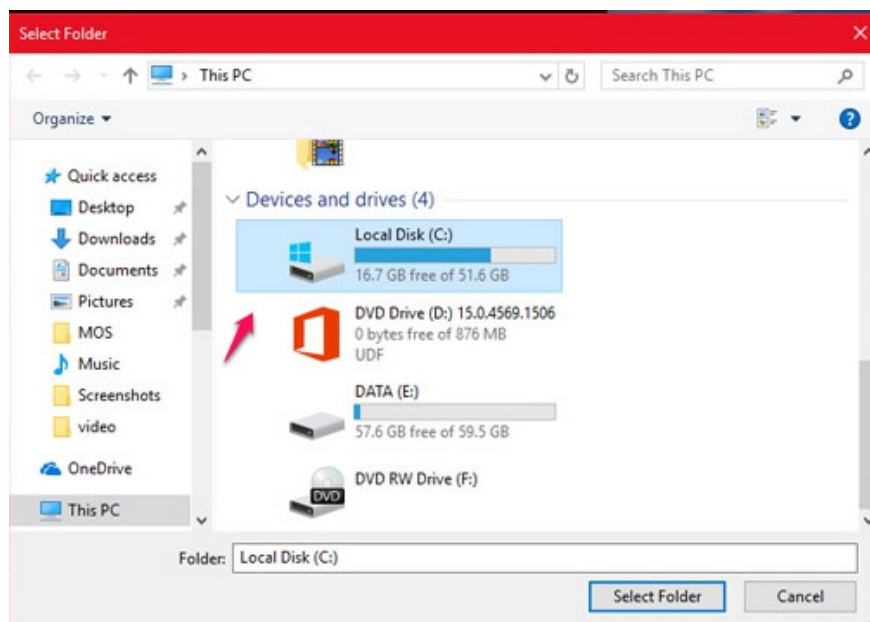

1. System Caches: System cache.
2. Application Caches: The cache of all active applications.
3. Mail Caches: Cache of the system Mail application.
4. Office Caches: Cache office software MS Office.
5. Browser Caches: Browser caching.
6. Downloads: File in the system's Downloads folder, which contains files downloaded from the web.
7. Large Files: Files larger than 100 MB.

How to use Total PC Cleaner:

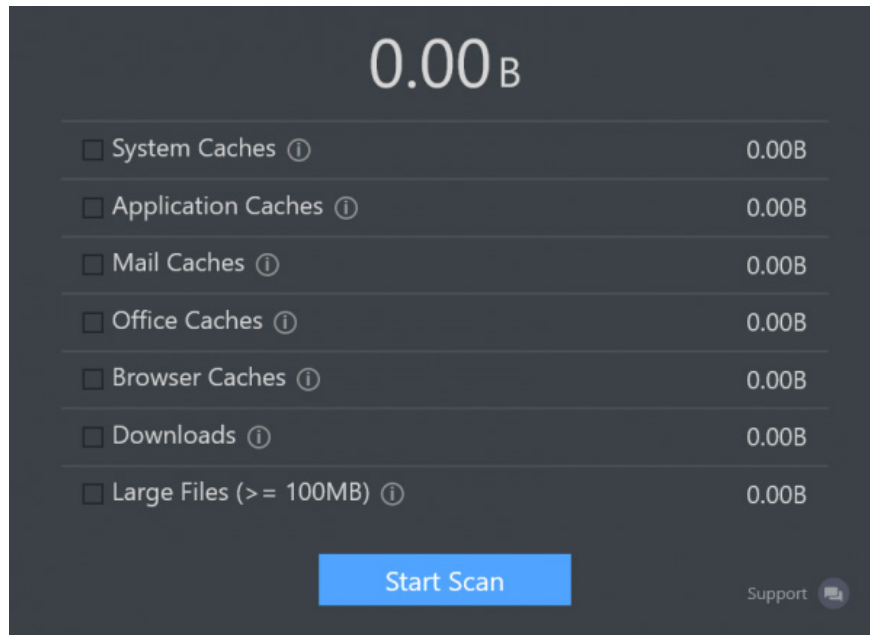

Step 1: After downloading the application to your computer, you start the program. In the window that appears, click the **Continue** box.

Step 2: Select Windows installation partition -> select **Select Folder**.

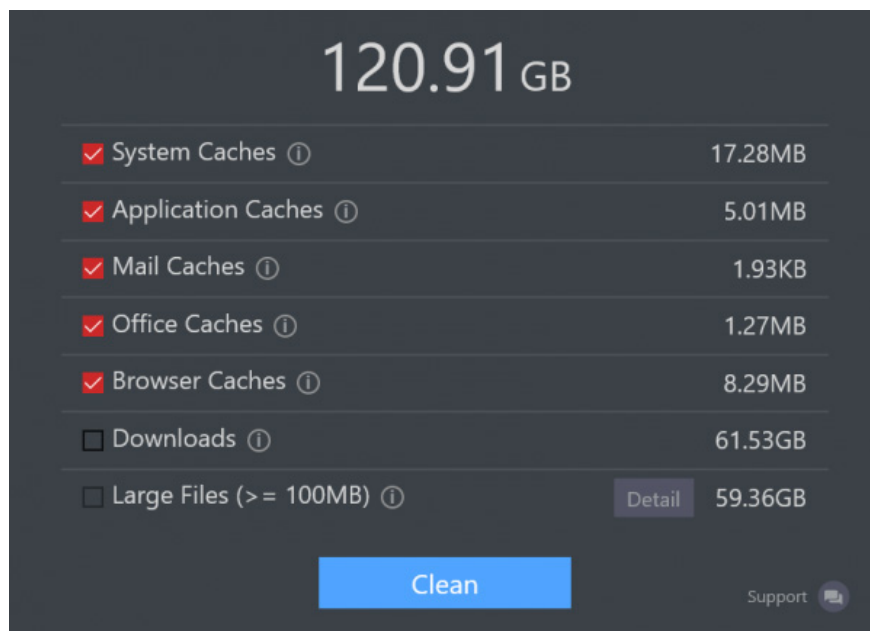

Step 3: In the new window, click **Start Scan** to scan all the unnecessary files on your computer.

Step 4: After the scan is complete, the size of the junk file will be displayed. Junk files in System Caches, Application Caches, Mail Caches, Office Caches, Browser caches are pre-selected by default. With Downloads and Large Files, you should check the component before deleting.

1. Downloads: go to the Downloads folder to check.
2. Large Files: Click the Detail box directly above the application's interface to check.

Then click Clean.

Step 5: After the deletion process is complete, click Done. When done, your computer has been cleaned without interference in the registry like CCleaner or affecting the computer.
