

'Dragon mother' Emilia Clarke wants to join the Avengers family, just waiting for Disney to nod again

After a lot of colleagues like Kit Harington, Richard Madden or Maisie Williams all chose superhero movies as a stopover after Game of Thrones, Emilia Clarke also expressed her hope to join the MCU's Avengers.

Since the end of Game of Thrones in May 2019, 'dragon mother' Emilia Clarke has been quite active in the film segment with 2 works Above Suspicion and most recently Last Christmas. However, in the context of the popular superhero movie series in recent years, it seems that the actress is also having certain considerations for her future projects.

In a recent interview with The Times magazine, Emilia said she was willing to join the MCU because the movie universe was quite fun. Specifically, the actress said: *' If I have the opportunity, I would also like to join a new superhero project. I want to do something a little silly, stupid, like the Avengers, or anything else. Projects like that would make me giggle all day with my colleagues . '*

Emilia Clarke said that if she could join the Avengers, she would giggle all day on set.

Needless to say, Emilia's use of words like 'silly' or 'stupid' can make many sensitive fans angry. However, the actress expressed her share in a very positive way, because she said that the Avengers or the MCU movies are always filled with hilarious atmosphere, humor on screen and backstage. . And if you've ever watched the broken footage in Game of Thrones or many other programs, you probably know how 'emily' Emilia is, far from the powerful image of Khaleesi in the film.

Emilia's talent has been widely recognized after 8 seasons of Game of Thrones, along with a number of other major projects such as Terminator Genisys or Me Before You. However, the charming charm and expression from her unique eyebrows make her especially suitable for the environment of the MCU, especially when paired with Chris Hemsworth (Thor) or the Guard of the Strip. ha. Not to mention that there will be the opportunity to meet many close old colleagues like Kit Harington - who will play Black Knight or Richard Madden - as Ikaris in the film The Eternals, and Maisie Williams - Wolfbane of The New Mutants.

It looks so serious on the film, but Emilia Clarke is also "a lot of salt".

Previously, it was reported that Emilia Clarke almost joined the Iron Man 3 project 7 years ago. Although she didn't know which role she was cast for, the script writer Drew Pearce personally confirmed that the actress went to the script rehearsal with Robert Downey Jr. (Iron Man) and Don Cheadle (War Machine). However, because of the contradictions in the schedule, because at that time Emilia was still very busy with Game of Thrones, the two sides had to say goodbye.

In the context that the MCU is expanding after Disney acquired 21st Century Fox, Emilia Clarke absolutely has many opportunities to become a member of this big family. Interestingly, not so long ago, DC fans made an online complaint to call Warner Bros. let Emilia replace Amber Heard in Aquaman 2. This will help Khaleesi be reunited with Khal Drogo - Jason Momoa on the big screen. If both of the above deals happen in the near future, we will once again witness the two longtime rivals Marvel and DC directly confront each other to win the signature of the 'dragon mother'.

Emilia Clarke attended Iron Man's script rehearsal in 2013 and almost joined the MCU.
