

# Dragon Raja Tips for Beginners

Dragon Raja Tips for Beginners, All the tips new players need to know about Dragon Raja - the hottest online multiplayer RPG game right now

Dragon Raja is one of the hottest MMORPG (massively multiplayer online role-playing game) right now. The game makes its mark thanks to its excellent visuals, great action gameplay, and interesting story. This game is released on most platforms, including mobile.

The game offers a lot of good content, but it is this variety that can make players find it difficult to understand. The following guide will help everyone to learn many tips and tricks to progress in playing Dragon Raja.

## Choose a character class that suits your playstyle

Dragon Raja has several classes for players to choose from when creating their character. From swordsmen and assassins to shooters and dancers, there's a unique blend of options. The important thing here is to choose a class that everyone feels is the best fit for them.

Each class has a difficulty level on combat. For example, Gunslinger is said to be the easiest to control thanks to its long-range combat ability.

Choosing the right level for each person's play style in Dragon Raja is quite easy, especially since there are only 4 characters. A quick summary of the game's levels will make it easier for beginners to get started:

1. Blade Master: Can be tank or melee DPS. Strong, durable and reliable in any situation. Reasonable choice for beginners.
2. Gunslinger: DPS with ranged attack that deals great damage from long distances and has a high crit rate and has a high crit rate.
3. Soul Dancer: Delivers punches in the form of magic damage with the help of a summoned twin. Soul Dancer also has a lot of solo potential thanks to its healing and damage dealing abilities, but is quite difficult to learn.
4. Assassin: DPS melee combat but unlike Blade Master, Assassin is fragile and learning moves is difficult. They have the highest damage potential in a group combat setup.

So, before making a decision to choose a class, consider the fighting style you want and the ability to control the character. If neither is of interest, then go for what everyone thinks is the best. Fortunately, gamers can change their character class if they are not satisfied with it.

## **Using character's ability**

Characters can attack with their abilities, even with swords, guns, or any other weapon. Dragon Raja has some extra abilities so make sure to use these as they can be very useful.

They are basically like special powers given to the character class. This can be great when gamers are dealing with a group of enemies. Just be careful not to use these abilities at the wrong time.

This means, each special ability will need a cooldown period. If you don't consider using it at the right time, this move will be wasted. Luckily the cooldown doesn't last too long, so gamers will be able to use it again for a short while. However, try to strike a balance between your basic attacks and your character's special abilities.

## Increase the stats according to each level

Dragon Raja is a little different from other MMORPGs in that, equipping and upgrading characters is not simple and automatic. Instead of just equipping the piece with the highest combat power, players will need to consider upgrading the stats of the other pieces.

This is because each tier benefits differently from certain stats, especially those that can perform more than one role in the team. For example, the Blade Master can act as either a tank or a melee DPS and depending on the role it also wants to equip defensive or physical attack equipment.

If you are a Soul Dancer, you need to equip titles and equipment that increase damage and reduce cooldown. In case people are not sure which stats to build, people can see suggestions on their character's screen. The parameters marked with a yellow M are the items that should be focused on increasing the stats.

## Unlock Dash and Ride

In the beginning, your character will move quite slowly, so unlocking the Dash and Ride feature will be a lifesaver. All you have to do is keep playing the game and you will get Dash for completing the quest called Hero's Apprentice. Besides, to unlock Ride, everyone needs to do the Alert quest.

Overall, these two features are pretty easy to get, just by continuing what you're doing in Dragon Raja. Increased movement speed will help the character glide around the open world easily.

Both Dash and Ride are of great help, discovering things faster than just running. So gamers need to make sure to complete the mentioned missions and to get access to these two very useful features.

## Explore the world in the game

Dragon Raja is not only about fiery battles. Remember that there is a huge world of mobile games waiting to be discovered by everyone. Feel free to run around and soak up some amazing views. The graphics are very impressive and make it all immersive. So the screenshot feature will be really helpful for this game.

In fact, there is a camera feature in the game and everyone will have a lot of opportunities to take great photos. If you are a fan of video game photography, then Dragon Raja is a perfect choice.

## Get free rewards

Dragon Raja gives a lot of rewards right from the start. From downloading resource packs, linking an account to logging in every day or completing certain challenges, the game offers a variety of rewards to start the journey.

People need to keep track of these gifts by clicking on Rewards Available at the top left of the screen and scrolling through the list of ready-to-receive rewards.
