

Dropbox Transfer - How to transfer large files very quickly across the network

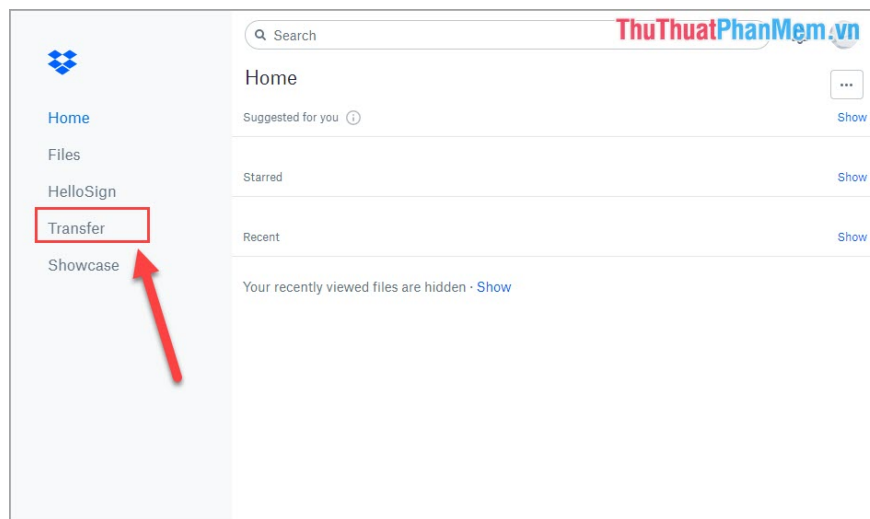

Dropbox Transfer is a feature that transfers data via the cloud extremely convenient and very fast speed. Dropbox Transfer is currently free for users, but there are certain limitations if your Dropbox account is not a PRO upgrade account.

Dropbox Transfer is a feature that transfers data via the cloud extremely convenient and very fast speed. Dropbox Transfer is currently free for users, but there are certain limitations if your Dropbox account is not a PRO upgrade account. In this article, the Software Tips will guide you how to transfer large files with high speed through the network by Dropbox Transfer.

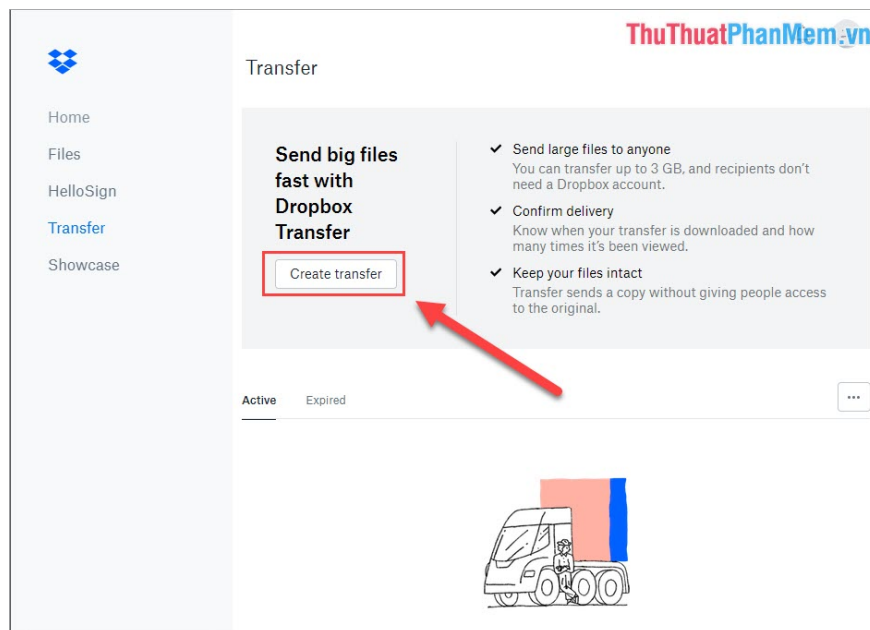

Step 1: You proceed to the Dropbox homepage <https://www.dropbox.com/> and **log in** with your Dropbox account.

Step 2: At the Dropbox home page, select the **Transfer** tab to start using Dropbox Transfer.

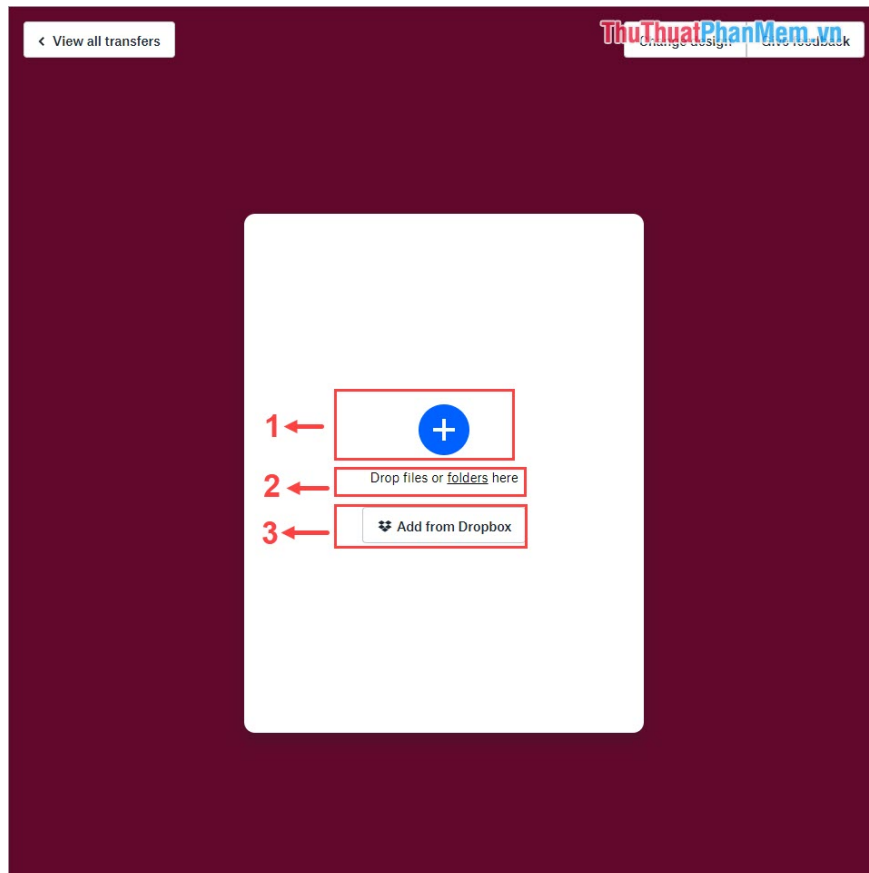

Step 3: Continue to select **Create transfer** to create a high-speed data **transfer** file.

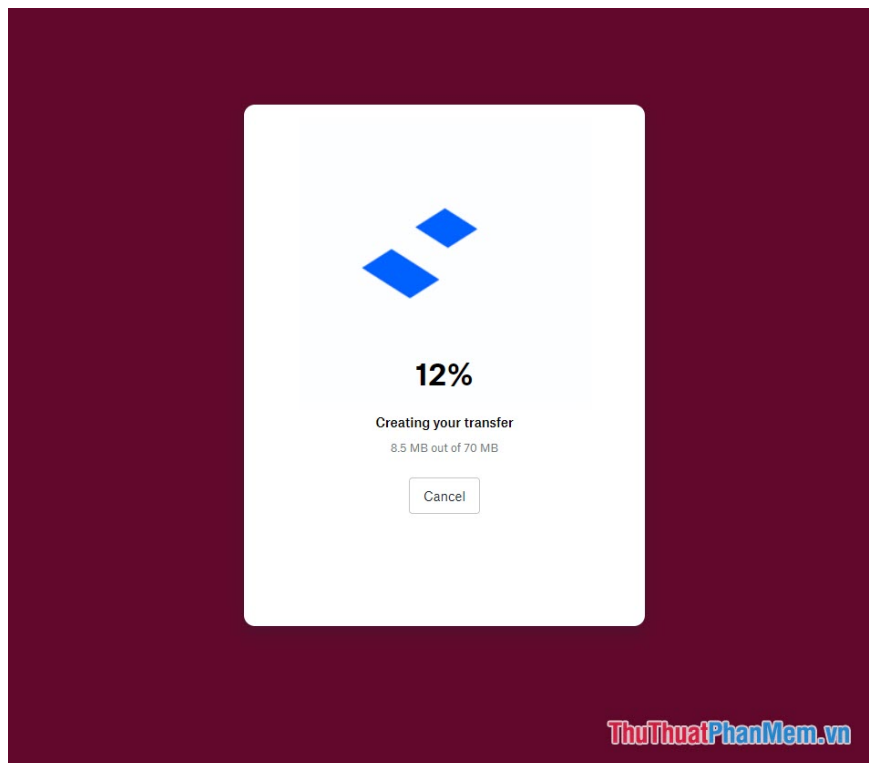

Step 4: There are 3 options for you to open the document to share.

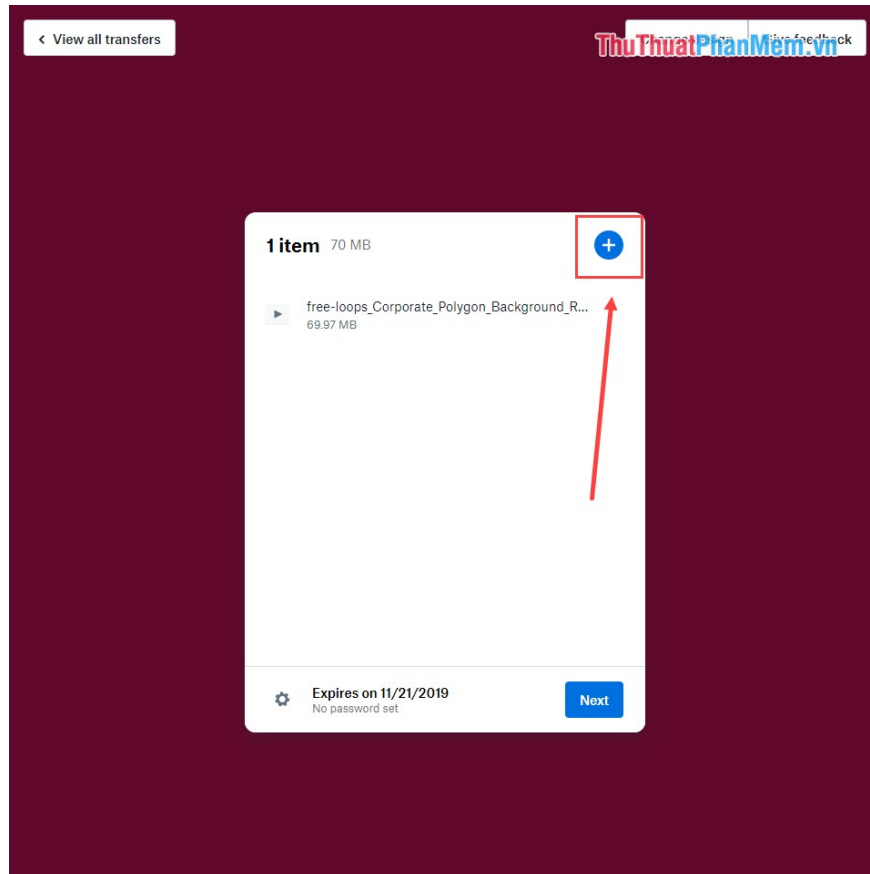

1. Select the data file from your computer to upload
2. Drag and drop the data file into
3. Select File data from Dropbox

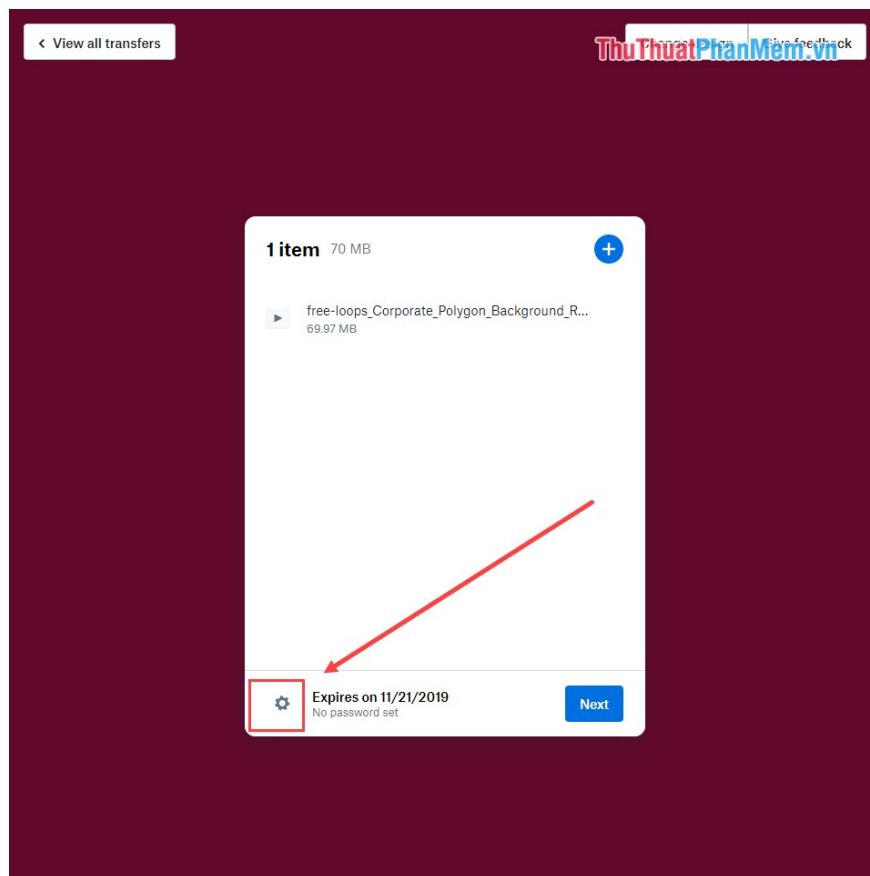

Step 5: After you select the file to upload, you need to wait a bit for Dropbox to create the data transfer file.

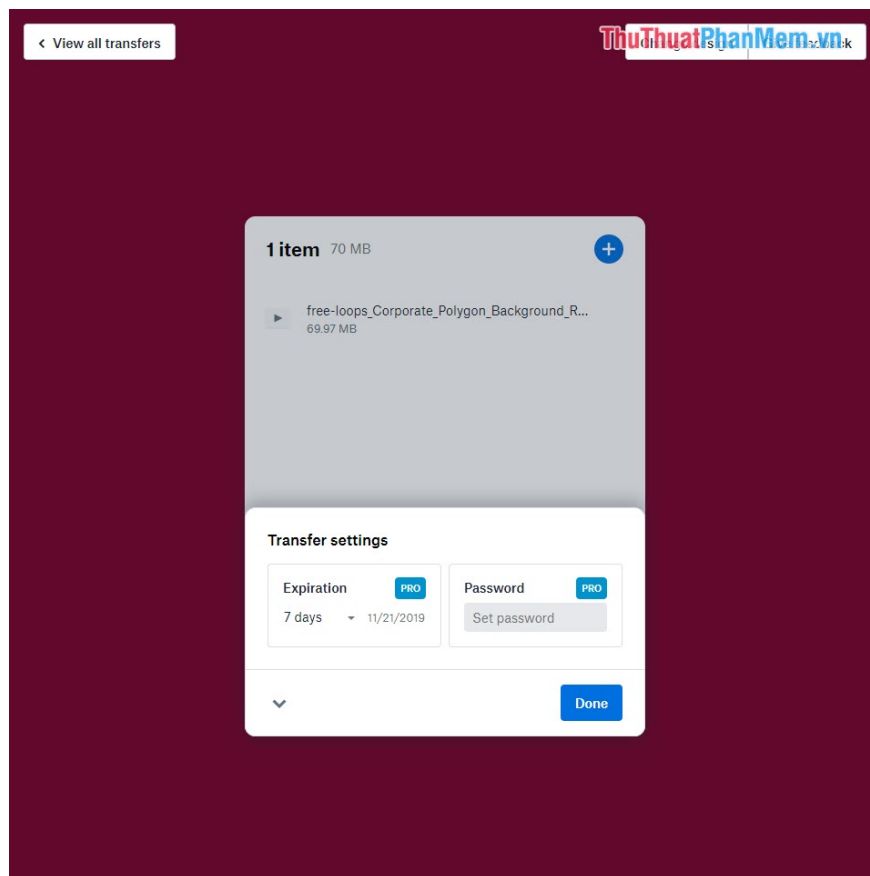

Step 6: After the data file has finished uploading, you can select the "+" sign to upload more data files.

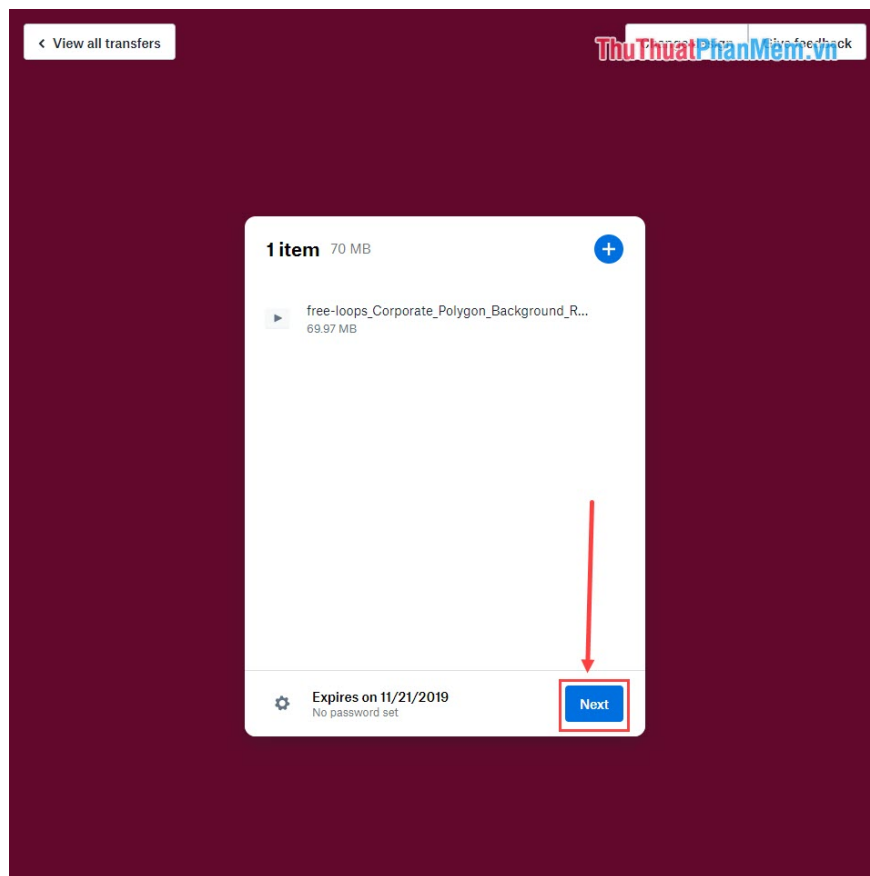

Step 7: At the **Setting** icon you can set some information, but to set it up you need to upgrade to a PRO account.

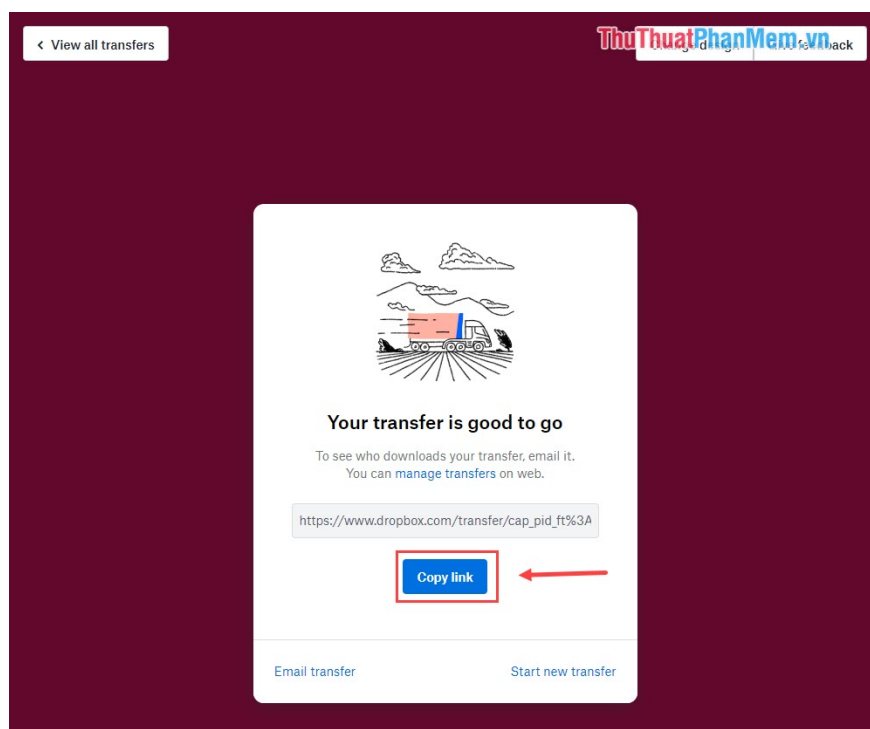

Step 8: By default, Dropbox Transfer will store your data transfer file for 7 days. If you want to extend the time, you need to upgrade to a PRO account. Besides you can set a password (only for PRO accounts).

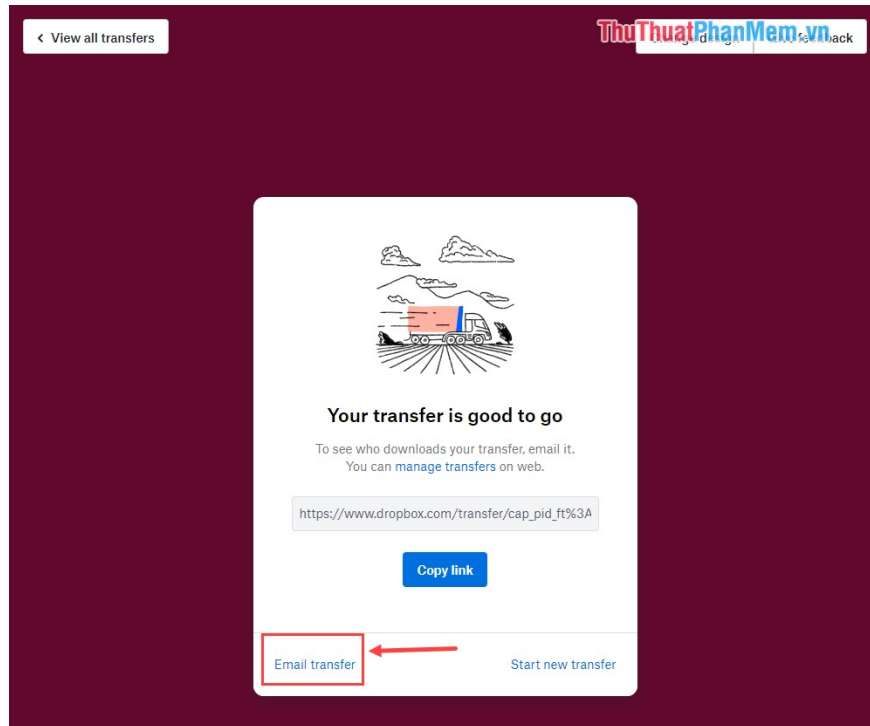

Step 9: After you're done, click **Next** to receive the sharing link.

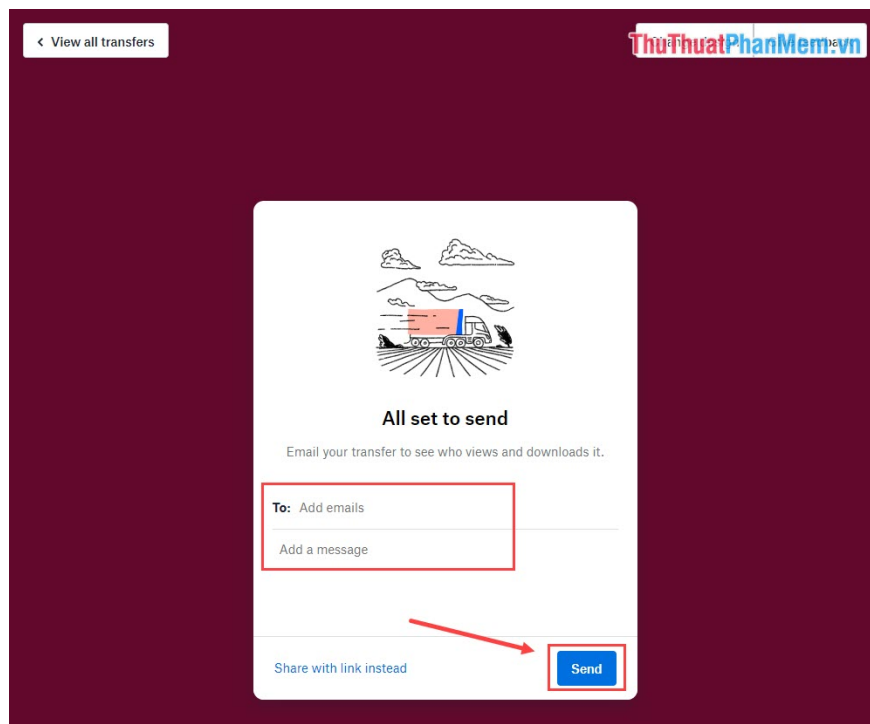

Step 10: Here you can copy the link to send to everyone. Those who download this file of yours just **Click the link** and download (no login required).

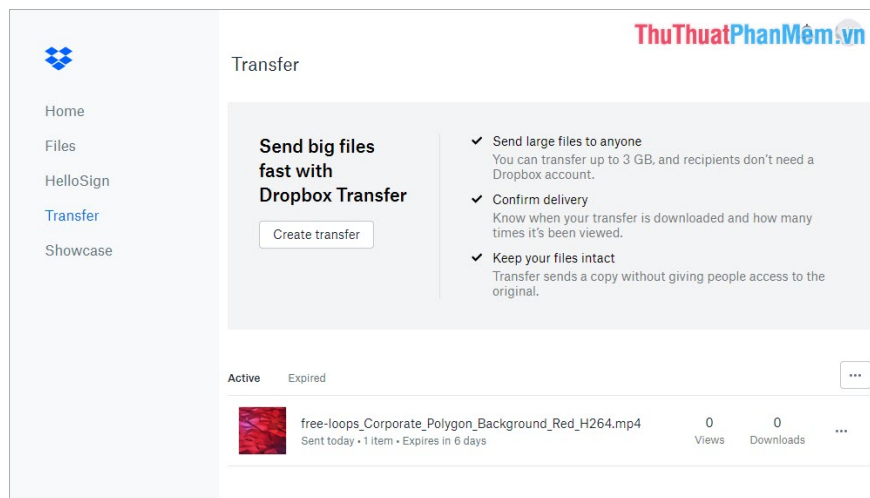

Step 11: In addition, you can share directly via Email.

Step 12: Enter your email account and content, finally click **Send** to send.

Step 13: At the homepage of Dropbox Transfer, you can track the remaining time, number of views, number of downloads of Transfer.

In this article, a software tip has shown you how to use Dropbox Transfer to send data fast. Good luck!
