

# Duolingo - Download Duolingo here

Duolingo - Learn Languages ??for Free, or simply Duolingo, is an educational program that allows you to learn and practice many different languages.

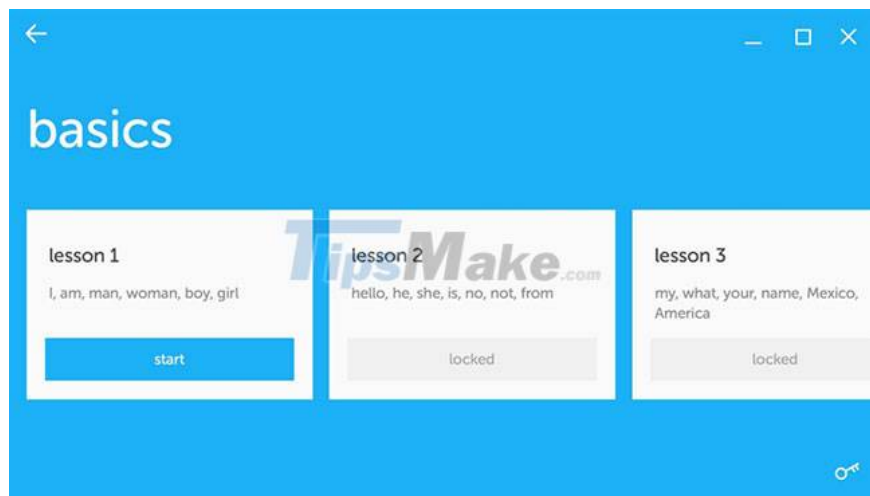

Duolingo Developed by Duolingo Inc., it is a language learning software that offers over 100 different language courses, available in 38 languages ??for both web, PC and mobile versions. The great thing about this app is that it encourages learning through game-like mechanics like leaderboards and a reward system.

## Duolingo helps master many different languages

At its core, Duolingo is a language education software, offering basic and advanced digital language courses, as well as language proficiency exams. With this app you can start learning both spoken and written languages, as well as some not so prominent languages ??from around the world. Duolingo is completely free, all you need is an account. However, if you want additional features, you need to sign up for a premium plan. Anyone can try Duolingo, regardless of their proficiency in other languages.

This is because you can take the test from the very beginning to identify skills related to the chosen language. This will tailor the lessons and quizzes available to you. Completing the lessons will give you points if you answer correctly. There are various questions and exercises on how to construct sentences, enter translations, transcribe, etc. However, you cannot use these points on the PC version as it only provides lessons and lessons practice.

The PC version also does not include the community-focused activities available in the mobile app.

Overall, Duolingo is a great alternative to getting used to a new language for beginners. However, for advanced learners, this application is not really effective due to the limitation of conversation lessons and skill accumulation.

#### Advantages

1. Teaching method is like playing game
2. There are many different types of exercises
3. Give daily quizzes to boost memory

#### Defect

1. No community features

2. Points cannot be earned or purchased using points
3. Not so effective in teaching compared to competitors
