

Dying Light player configuration on the computer

This is the minimum level of configuration and configuration required for the Dying Light game on the computer

If you are a fan of horror game genre, Dying Light will definitely not be missed, the horror game - the dead body combined with the attractive parkour climbing style.

In the game, the player plays the undercover agent **Kyle Crane** from **Global Relief Effort (GRE)** , infiltrating the ruined city of Harran throughout the land.

His mission is to find a way to regain the formula containing the antidote for Zombie disease from a confidential file in Rais's hands - the leader of Harran city group. And try not to reveal your identity.

Dying Light's gameplay shows that this game is a combination of many other titles. From Dead Island's melee gameplay, the parkour-style climbing mechanism of Mirror's Edge reaches the FarCry's role-playing element.

At the time of launch, Dying Light had a configuration that was considered quite high for most PC configurations at that time. If you want to see if your computer configuration meets Dying Light's requirements, please compare the Dying Light configuration below.

1. Tom Clancy's configuration Rainbow Six Quarantine on the computer
2. Ring of Elysium player configuration on the computer
3. Configure Far Cry New Dawn to play on the computer

Minimal Dying Light configuration on the computer

1. **Operating system:** Windows 7, Windows 8, Windows 8.1, Windows 10 (64bit)
2. **CPU:** Intel Core i5-2500 @ 3.3 GHz or AMD FX-8320 @ 3.5 GHz
3. **RAM memory:** 4GB
4. **Graphics card:** NVIDIA GeForce GTX 560 or AMD Radeon HD 6870 with 1GB VRAM memory
5. **Available memory:** 40GB

Configure Dying Light request on computer

Operating system: Windows 7, Windows 8, Windows 8.1, Windows 10 (64bit)
CPU: Intel Core i5-4670K @ 3.4 GHz or AMD FX-8350 @ 4.0 GHz
RAM memory: 8GB
Graphics card: NVIDIA GeForce GTX 780 or AMD Radeon R9 290 with 2GB VRAM memory
Available memory: 40GB

Compared to the present time, Dying Light's required configuration is only average compared to many current PC games. So building a PC configuration based on the level of Dying Light configuration is not too much compared to many current gamers.
