

Eee PC 1000H is about to be available in Vietnam

On September 27, Asus will bring the highest-end mini-laptop in the super-cheap 'Eee PC' line to Vietnam. The EeePC 1000H has an impressive battery life of up to 8 hours that will 'hit the shelf'

On September 27, Asus will bring the highest-end mini-laptop in the super-cheap 'Eee PC' line to Vietnam. The EeePC 1000H has an impressive battery life of up to 8 hours that will 'hit the shelves' for \$ 539.

The 10-inch version of the EeePC 1000H is the largest and most advanced mini laptop among Asus's mini computers.

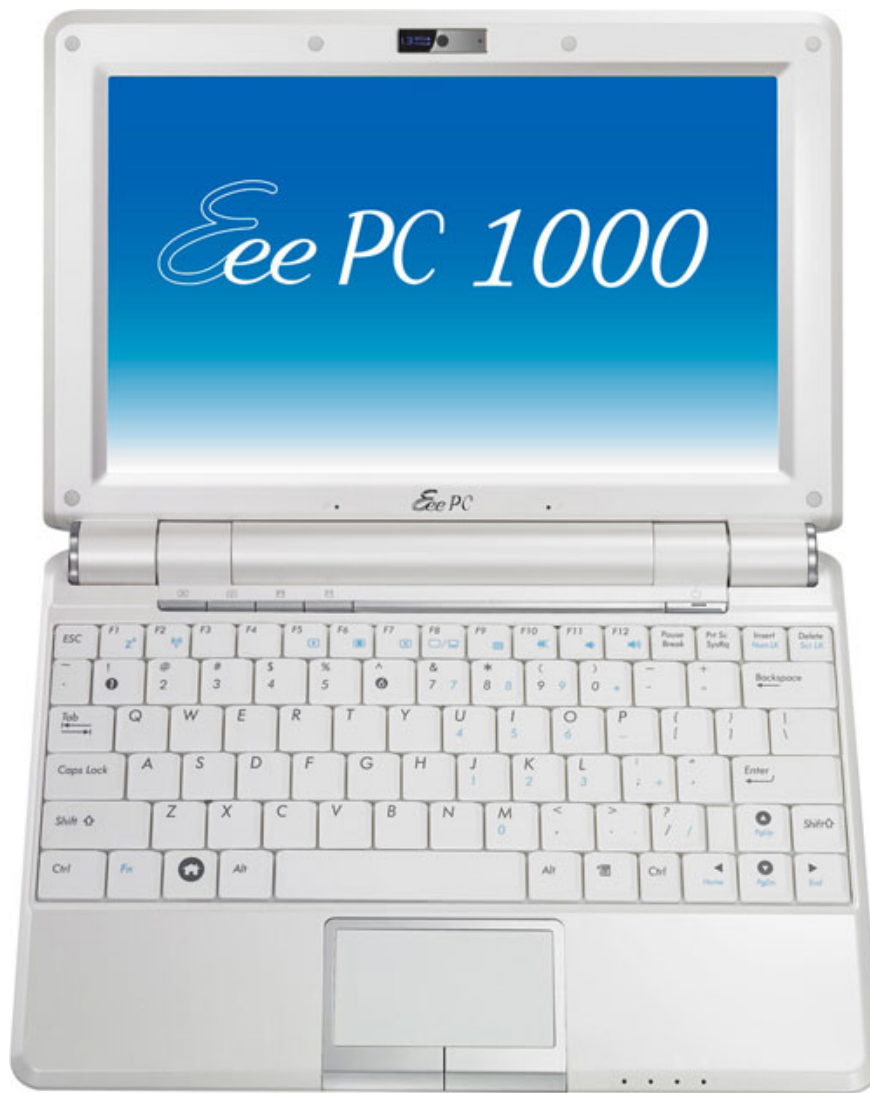

The most striking feature of the EeePC 1000H is its battery life of up to 8 hours - an impressive time as normal laptops have a maximum usage time of about 3 hours.

In addition, this mini laptop has a spacious screen with a resolution of 1,024x600 pixels. The keyboard is also wider than the 700 and 900 versions of the Eee PC - by 92% of the full keyboard size of a normal laptop. The device is equipped with a 1.6GHz Intel Atom CPU and 1GB of RAM - the most powerful configuration among mini laptops available on the market.

In terms of mini laptops, the 1000 version of Asus is slightly larger, bulky and more difficult to move than the 900 and 700 series. It weighs 1.33kg. And, unfortunately, the EeePC 1000H supports Wi-Fi, Bluetooth, but does not support 3G connectivity. The Eee PC 1000 is more expensive than previous Asus models.
