

Effective support services for Dropbox

Dropbox is a popular hosting service today, but there are some essential features not provided on the service. So, you can use the 3 services in the article to add some features to Dropbox.

Along with OneDrive or Google Drive, Dropbox is now one of the popular cloud storage services. However, there are some features that are necessary for users but are not provided on Dropbox, such as automatic file deletion, automatic file sorting, etc. If you want to expand the features on Dropbox, maybe Use some of the services in the following article of Network Administration, effectively support the process of downloading data as well as managing on Dropbox.

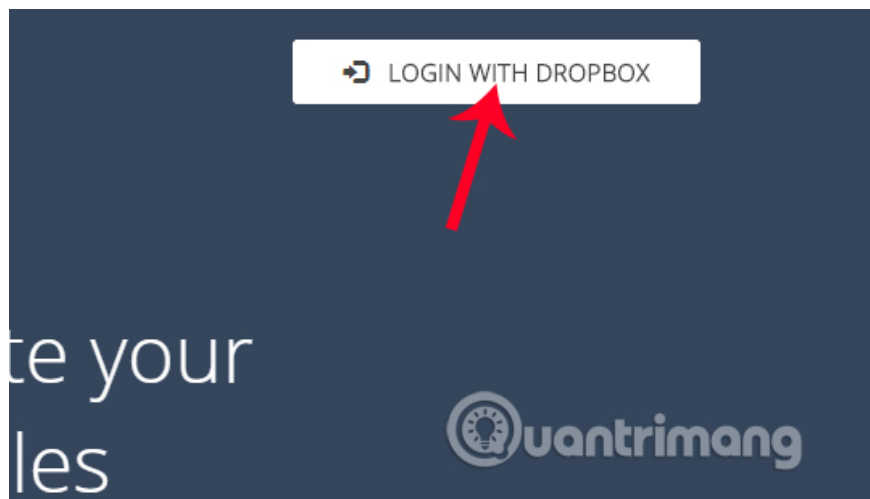

1. Delete files automatically on Dropbox:

On Dropbox does not have the feature to automatically delete data, so we will use Finesse service. When users want to stop sharing files, the Finesse will help you.

Step 1:

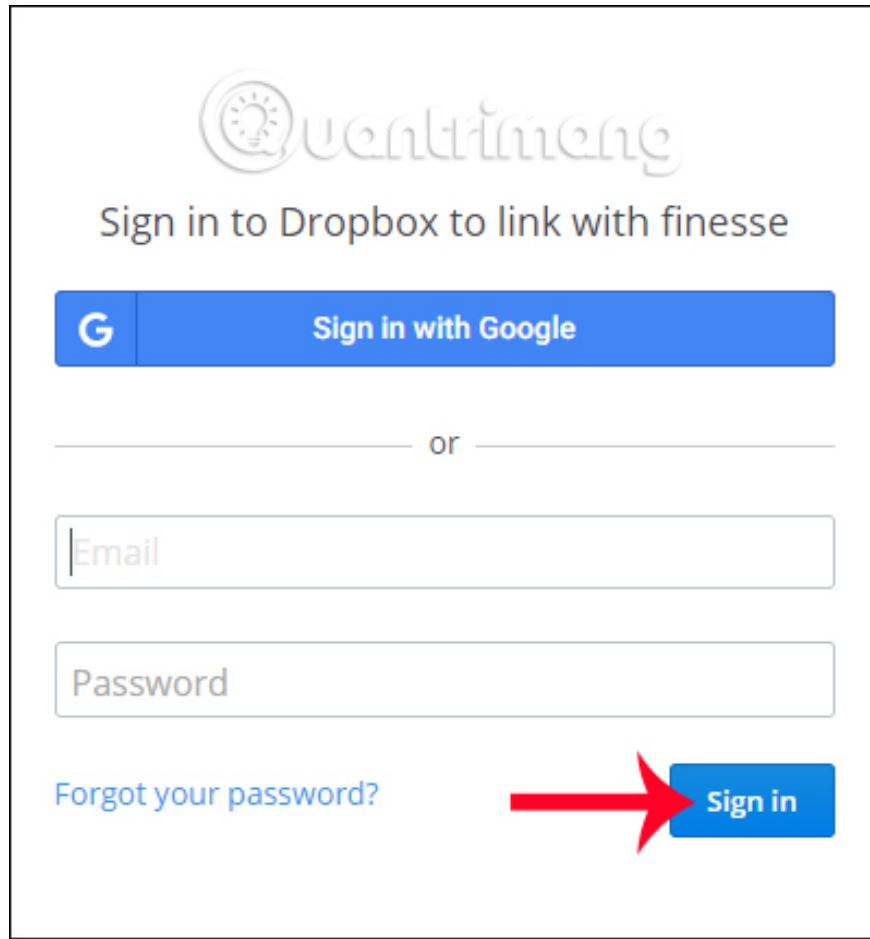

First, visit the link below to access the homepage of Finesse. Then, at the homepage interface, click **Login with Dropbox** to log in to your personal Dropbox account.

1. <https://www.finesseapp.co/>

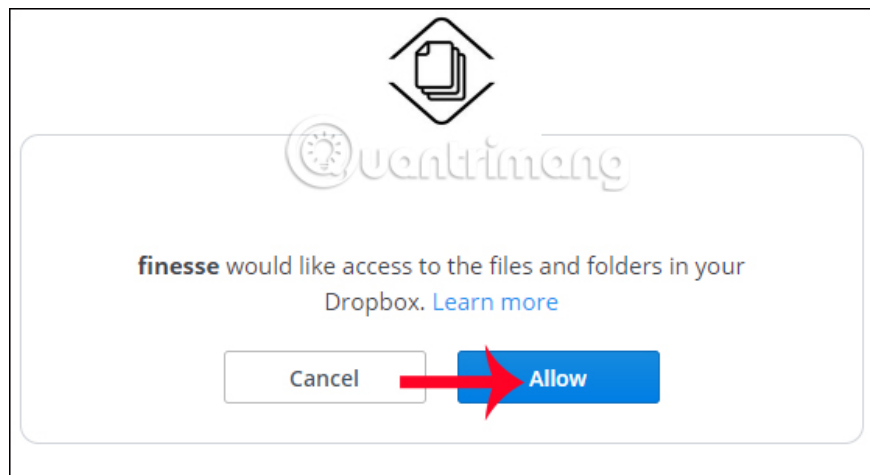

Step 2:

We enter personal account and then click **Sign in** to login.

The image shows a login interface for Quantrimeng. At the top is the Quantrimeng logo, which consists of a lightbulb icon inside a circle followed by the word "Quantrimeng". Below the logo is the text "Sign in to Dropbox to link with finesse". There are two main options for signing in: a blue button with a white "G" icon and the text "Sign in with Google", and a "Sign in" button at the bottom right. Below these are two input fields labeled "Email" and "Password". A red arrow points to the "Sign in" button. There is also a link for "Forgot your password?".

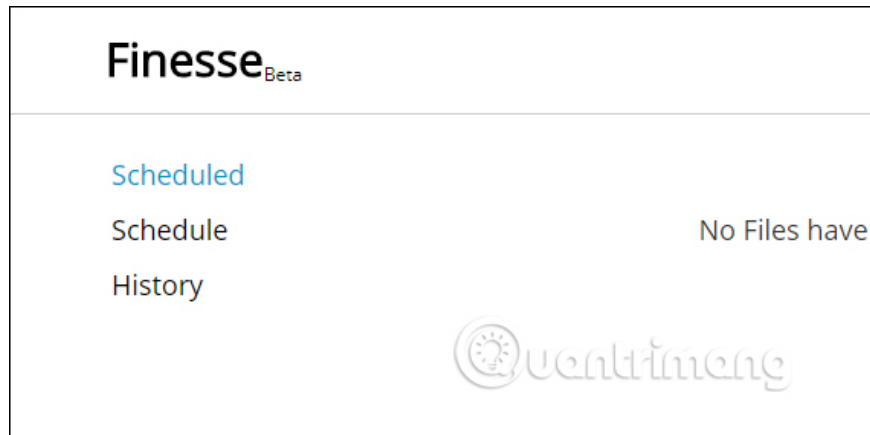

Finesse service will require users to allow connection to Dropbox account, click **Allow** to agree.

The image shows a permission dialog box from Dropbox. At the top is the Dropbox logo, which is a house icon with a document inside. Below it is the Quantrimeng logo. The text in the dialog says "finesse would like access to the files and folders in your Dropbox. [Learn more](#)". At the bottom are two buttons: "Cancel" and "Allow". A red arrow points to the "Allow" button.

Step 3:

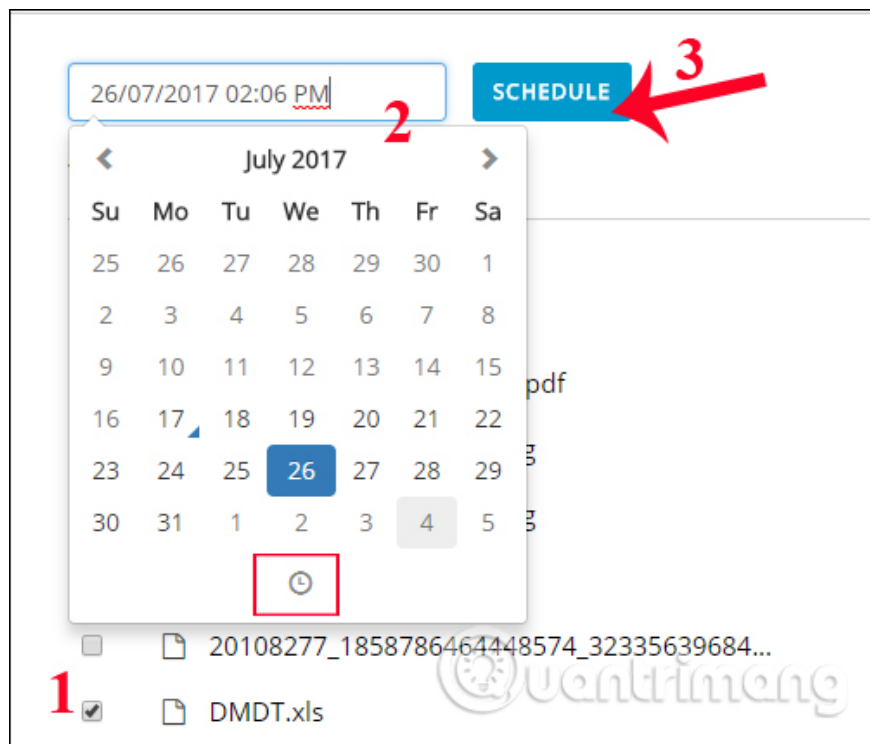

Switch to the main interface of Finesse. Here, you will see two main folders of interest including Schedule and Scheduled.

Step 4:

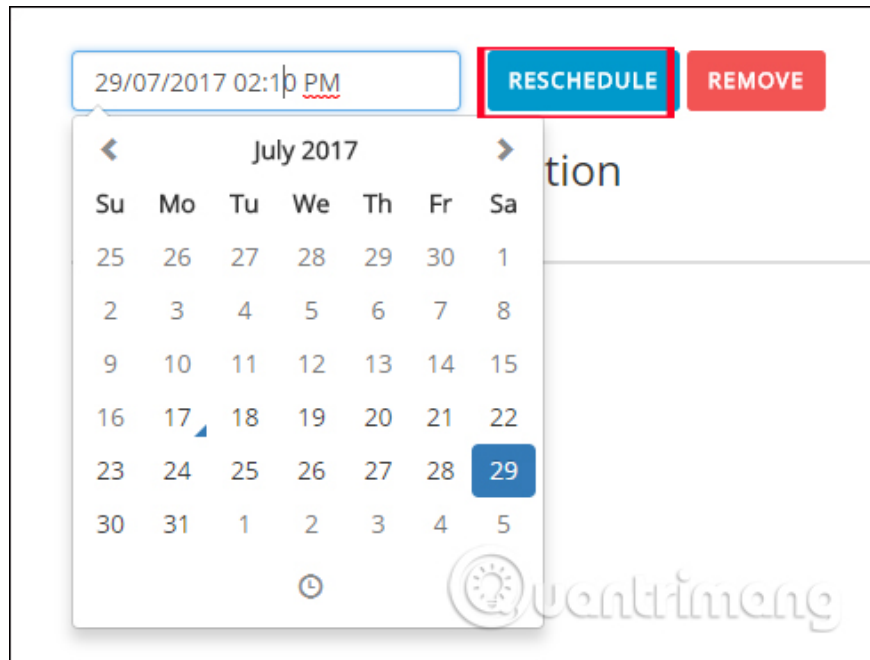

The **Schedule** item will display all the folders and data that users have uploaded to their Dropbox account. Want to delete a folder or file just tick it.

Next click on the **Select Date / Time bar** to select the date and time to delete, press **the clock icon** to select the time. Then, click **Schedule** to confirm the deletion schedule.

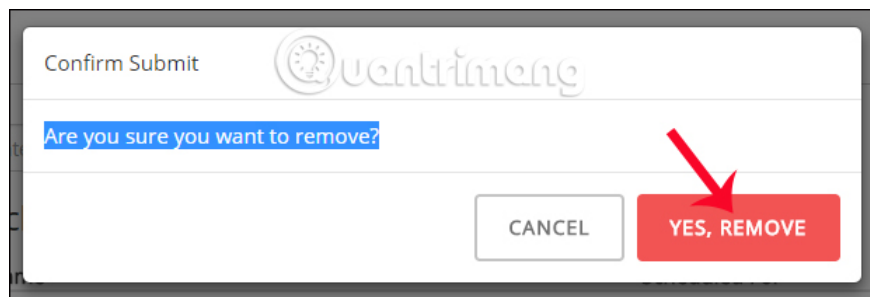

Step 5:

The **Scheduled** section will manage the data we have scheduled to delete. If the user wants to change the set time, click the **Select date / Time** button to select a new time, then press **Reschedule**.

If you want to delete the file from this list, select the file and then select **Remove**> **Yes, Remove** to confirm.

2. Arrange the file automatically with Sort My Box:

Sort My Box will support Dropbox users to organize data in a format, category to be able to search faster. Or you can set the rules for arranging Dropbox data through Sort My Box.

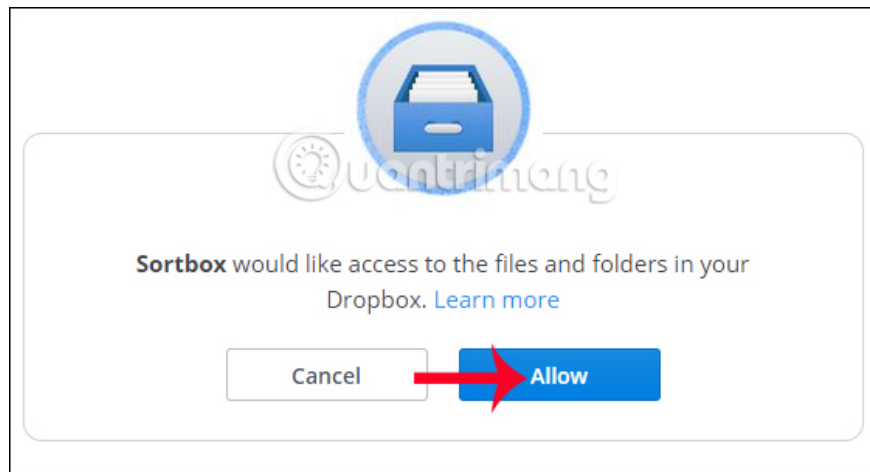

Step 1:

First, click on the link below to access the main page of the service. In this interface, also click **Login with Dropbox** .

1. <https://www.sortmybox.com/>

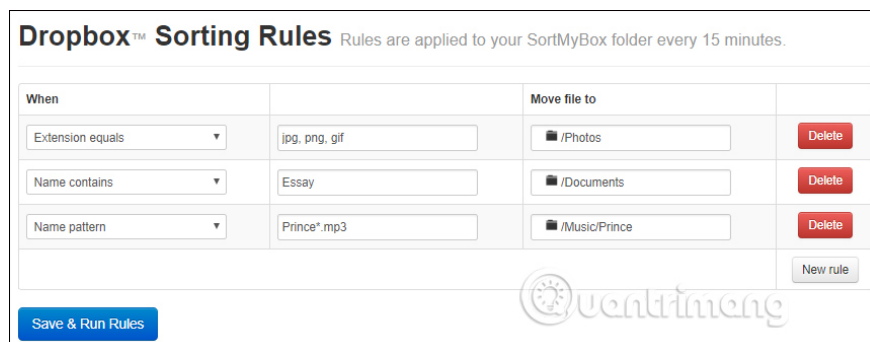

After that, Sort My Box also requires the user to allow the application to link to Dropbox to use, click **Allow** .

Step 2:

Switch to the main interface of Sort My Box service. Here, you will see the default set up service available in **3 rules** including **Extension equals** (by extension, file format), **Name contains** (by file name), **Name pattern** (by template) name) in the When section, next to the content frame.

Step 3:

If the user wants to **set up videos** of various formats such as mp4, avi, mkv, . saved automatically to the Video folder, select **Extension equals** and then import **mp4, avi, mkv, .** in the next frame. Then select **the Video folder** at Move file to. Click **Save & Run Rules** to save.

When		Move file to
Extension equals	mp4, avi, mkv	/Video
Name contains	Essay	/Documents
Name pattern	Prince*.mp3	/Music/Prince

[Save & Run Rules](#)

However, the user must wait 15 minutes for the rule to take effect.

Name contains	ABC
Name pattern	Prince*.mp3

[Save & Run Rules](#)

Success!
Your rules will run every 15 minutes.

Recent activity

None yet. Create some rules and save files in your SortMyBox folder to get going.

Or if you want to save the **text file named ABC into the Document folder** , enter it according to the instructions **Name contains> enter the name ABC> select the Document folder** .

When		Move file to
Extension equals	mp4, avi, mkv	/Video
Name contains	ABC	/Documents
Name pattern	Prince*.mp3	/Music/Prince

If you want to **save the music file named ABC.mp3 to the ABC folder of Music** , the sorting rule is the **Pattern name> ABC * .mp3 > Music / ABC folder** .

When		Move file to
Extension equals	mp4, avi, mkv	/Video
Name contains	ABC	/Documents
Name pattern	ABC*.mp3	/Music/ABC

Save & Run Rules

Step 4:

In case the user wants to **create a new rule** , click **New rule** . If you **don't want to use any rules** in the list, press **Delete** .

All changes on Sort My Box we have to click Save & Run Rules to save.

When		Move file to	
Extension equals	mp4, avi, mkv	/Video	Delete ✓
Name contains	ABC	/Documents	Delete ✓
Name pattern	ABC*.mp3	/Music/ABC	Delete ✓
Name contains			Delete

New rule

3. Create a photo sharing page for Dropbox:

Bopbx is a service that helps users create a separate interface with full information set by the user, to share photos on Dropbox.

Step 1:

Click on the link below to get to the interface of Bopbx.

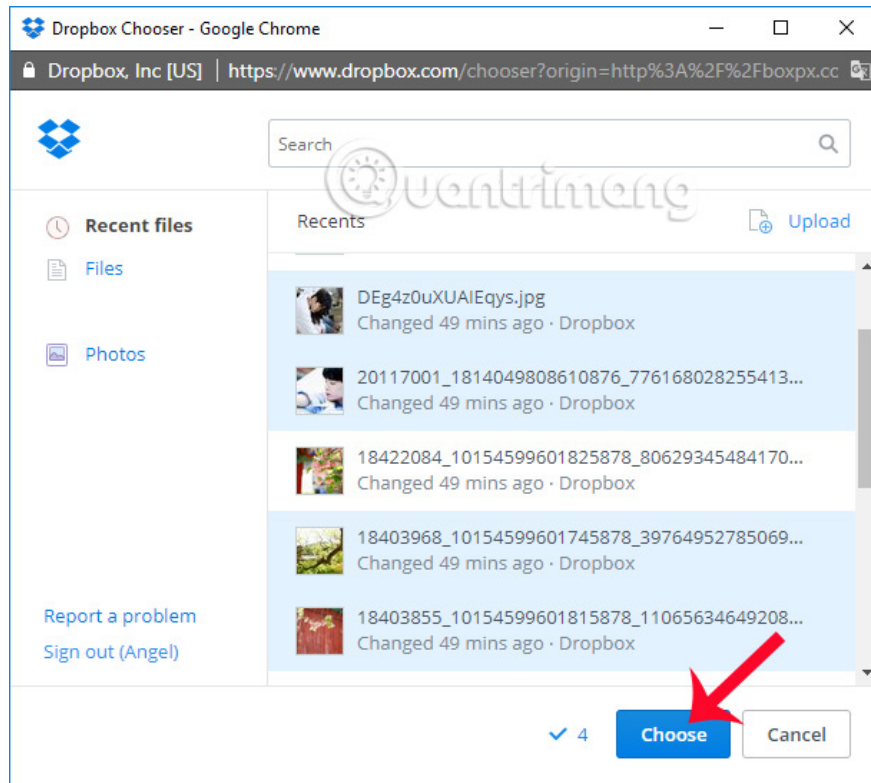

1. <http://boxpx.com/>

Step 2:

Then, click the **Choose photos from Dropbox** button and then log into Dropbox.

Appears all uploaded images to Dropbox account. Click **on the image** you want to share and click **Choose** . The number of images selected will appear next to the Choose button so that users can know the number of images selected.

Step 3:

Go back to the Boopx interface with the **Edit Album Setting** dialog box . Here, you can name the album at **Title** , add a description of the photo information at **Description** , position the images at **Rearrange images by drag-and-drop** , add a caption for each image at **Add captions** .

In case you want to add photos, click **Add images** . Or you can select the image display size on the album in **Size** .

Finally click **Save & View Albums** to save the newly created settings.

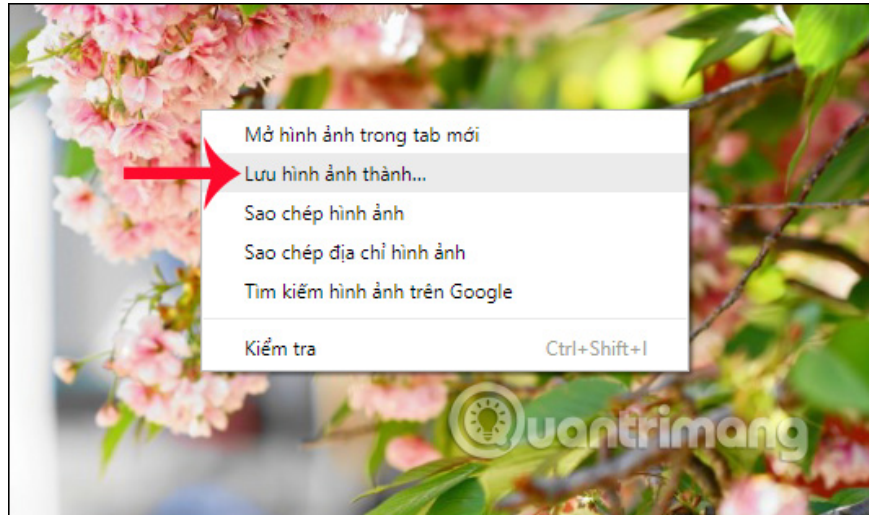

Step 4:

Soon you will be transferred to the new interface, with the **shared link** (Share link) and **the edit link** (Edit album link). Below will be the entire image uploaded.

When clicking on each image, there will be an option to download images to the device.

Above are some online services, additional support for Dropbox when users download data or share images on accounts. With Finesse, we will have more tools to delete files automatically according to the scheduled schedule, Sort My Box sort files according to certain rules and Bopbx create photo sharing album on Dropbox with more image settings. Hopefully with this article, readers will have more tools when using Dropbox, increase the experience as well as add many useful customizations when using.

I wish you all success!
