

Elements of the Form in HTML

This article introduces all the elements of the form used in HTML.

This article introduces all the elements of the form used in HTML.

Element

The most important element when creating a form in HTML is `<input type="text">`. This element can display multiple ways, depending on the `type` attribute

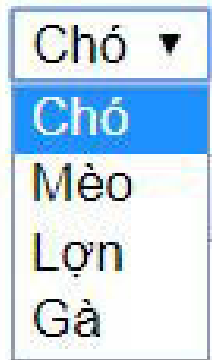

If the `type` attribute is omitted, the data fill field will leave the default type as text (text). All input data types for the form will be mentioned in the following article.

Element

Element used to define a drop-down list.

- Chó
- Mèò
- L?n
- Gà

Phần tử select

A dropdown menu with a light blue border. The top bar is white with 'Chó' and a downward arrow. The menu is open, showing a list of options: 'Chó' (highlighted in blue), 'Mèo', 'Lợn', and 'Gà'. A vertical scrollbar is visible on the right side of the menu.

The drop down list to choose from

Element Define a selected option. By default the first option in the list will be selected, if you want to define another option, use the `selected` attribute
