

Energizer Power Max P16K Pro: phone model with 'monster' battery of 16,000 mAh

At the MWC exhibition, a smartphone with a 'monster' battery of 16,000 mAh appeared, 5 times the capacity of Galaxy S8 / S9 and iPhone X, which surprised the tech world.

At the MWC exhibition, a smartphone with a 'monster' battery of 16,000 mAh appeared, 5 times the capacity of Galaxy S8 / S9 and iPhone X, which surprised the tech world. Because the batteries in smartphones are now available in capacities ranging from 3,000 mAh to 4,000 mAh.

This phone with a 'monster' battery is called Energizer Power Max P16K Pro. And this is the Android smartphone with the largest battery ever appeared, users can freely use the phone within 1 week.

Power Max P16K Pro configuration remains pretty good:

1. 5.99 inch screen.
2. Resolution 2,160 x 1,080 pixels.
3. MediaTek Helio P25 processor.
4. 6GB RAM capacity, with 128 GB internal memory.
5. The back is a 13 MP and 5 MP dual camera, the front is an 8 MP camera.
6. The Energizer Power Max P16K Pro is about 15.2mm thick and weighs 350 grams.
7. Running Android 8.0 operating system.

With a 16,000 mAh battery in the device, many people believe that the phone is fully capable of becoming a backup charger for other devices.

The phone supports fast charging feature so the charging time for this 'monster' battery will be significantly reduced.

Energizer Power Max P16K Pro when placed next to iPhone X.

This "monster" battery phone is expected to be released in India in May. The price of this product is still unknown.
