

Enhance your experience with the ViewFinity S9 monitor and T7 Shield portable hard drive

The Samsung ViewFinity S9 5K display provides a large display space, with sharp 5K resolution. Meanwhile, the PSSD T7 Shield portable hard drive provides the ability to store and access data smoothly and at high speed.

This is worthy of being called the 'perfect duo', helping to enhance the experience and increase work efficiency for users of the macOS operating system.

Delivers top performance on macOS

For macOS users, the ability to optimize display space and data processing speed is worth paying attention to when choosing a working screen, as well as using a portable hard drive for storage tasks.

While Samsung ViewFinity S9 stands out with its 5K screen, helping to improve display quality with outstanding parameters; The SSD T7 Shield portable hard drive is a tool that allows storing thousands of data: from design graphic files to high-resolution images and videos. This helps the Samsung 'duo' become a worthy choice that MacOs users are looking for.

According to technology experts, the 3 most important criteria to evaluate the quality of a working screen include: resolution, brightness and color accuracy. On the Samsung ViewFinity S9, all three of these criteria are highly appreciated, especially when used on the macOS operating system.

First, this screen has a resolution of up to 5K with a pixel density of 218 PP. At a normal distance when sitting and working, users cannot recognize pixels on the screen - an important criterion for an exceptionally smooth visual experience.

Next, the Samsung ViewFinity S9 has a brightness of up to 600 nits. The anti-glare panel is impressive even when the user places the desk next to the window.

Finally, the color standard of Samsung ViewFinity S9 is amazing with a super low color deviation rate $\Delta E_{2.0}$. Not to mention, Samsung ViewFinity S9 also produces good color parameters with sRGB 99% and DCI-P3 99%. This is very important for people who work in movies, art, graphic design.

Combining luxurious appearance with flexibility and seamless connectivity, it is not surprising that the Samsung ViewFinity S9 has become the 5K screen that has been of interest to creatives over the past 2 years.

Meanwhile, as an effective support tool for content creation anywhere, the SSD T7 Shield portable hard drive is the ideal choice for storing and transmitting high-resolution data thanks to its ability to transfer large files without sacrificing performance quality. Widely compatible with various file formats and operating systems such as: exFAT, NTFS and HFS+/APFS; This compact device allows users to save and edit high-resolution graphics, images and videos on Windows, Android and especially macOS. Along with the ability to easily connect to many devices via USB Type C-to-C and Type C-to-A cables, SSD T7 Shield provides a seamless working and creative experience for users. Additionally, the device maintains stable performance thanks to regular program updates provided through the Samsung Magician software.

Worthwhile investment

Possessing outstanding technology from Samsung, the Samsung ViewFinity S9 duo and SSD T7 Shield portable hard drive also impress with their reasonable price. With a price that many users consider low in its segment, this is an effective investment not only for users on macOS devices, but also for users looking for 5K screen solutions and storage devices. Store and transmit quality mobile data.

Not stopping at high performance and reasonable price, Samsung's two products are also famous for their durability. While the Samsung ViewFinity S9 screen is designed to provide high durability with a screen LED lamp life of up to 100,000 hours, meeting the needs of long-term use for users; The SSD T7 Shield portable hard drive is meticulously designed, can withstand shock when dropped from a height of 3m, and is IP65 certified for dust and water resistance. The hard drive also maintains stable performance in temperatures below 60°C, meeting IEC 62368-1 safety standards.
