

# Entertainment with Akinator application, the god of lights can read your thoughts

Akinator is known as the god of light on the Internet, he can know who you are thinking in your head. So how to meet this god lamp? How does his behavior work? Or is there a way to trick him? Please follow the article below!

Akinator is known as the god of light on the Internet, he can know who you are thinking in your head. Akinator will ask some questions, then guess what character you're thinking of. This lamp god's precise prediction ability will make you gasp in amazement. So how to meet this god lamp? How does his behavior work? Or is there a way to trick him? Please follow the article below!

## A bit of information about Akinator

This game is based on an artificial intelligence software created by three French programmers in 2007. The idea of ??this game has been sprung up in their heads during a trip towards East. After launching, the application on this site has become famous worldwide. By 2010, the first mobile app version of this game appeared.

Akinator application is currently available on **App Store (\$ 1.99)** , **Google Store (\$ 1.99)** and **Window Store (\$ 1.99)** . You can also buy free Akinator version on your phone but the number of characters will not be as varied.

## How to play Akinator?

1. **Step 1** : Go to [akinator.com](http://akinator.com) or download the application to your phone. Enter your age then press Play.
2. **Step 2**: If you do not have the ability to read English, want to play Akinator in Vietnamese then use Coc Coc browser, click on the icon with the letter A in the right corner of the address bar. If you use Google Chrome, copy `chrome://settings` paste into your browser, scroll down and select > Advanced > Languages > Sort languages ??based on your options > click 3 dots along the Vietnamese language, select **Move to the top** , then select the 3 dot mark next to English > tick the **Suggestions page to translate pages in this language** (remember to turn on the **Suggest to translate pages not in the language you have read** ) option. F5 will return to the [akinator.com](http://akinator.com) website and will see the icon with the letter G, click on Translate website and wait for the interface to switch back to Vietnamese.
3. **Step 3** : Think about any character. It could be an actor, musician, singer, artist, politician, Youtuber . or even a character in a story, cartoon character, fiction .
4. **Step 4** : Akinator will ask you a series of questions, you will have to answer by selecting one of the options: **Yes (Yes)** , **No (Sai)** , **Probably (Probably right)** , **Probably not (Probably wrong)** and **Don't know (Unknown)** . Try to answer them as accurately as you can.

1. **Step 5** : The number of questions will depend on the popularity of the character you think of. Maybe only about 10 questions, the god of the lamp had guessed, but there could be about 70 questions.

1. **Step 6** : After asking, this genie will guess the character you're thinking of. If he guessed wrong three times in a row, he will give in and ask you to enter that character's name.

No

1. **Step 7** : If Akinator guesses correctly, you will get him to give you some information like the number of times that character was guessed, or the last time the character appeared in the game.

## How Akinator works

Akinator is a pretty interesting game. But the first question that many people will ask when playing this game is: "How can the game know what I'm thinking?".

According to the frequently asked questions section of the game website, the creators of the game responded as follows: "Akinator uses Limule software, produced by the company Elokence.com. I used it for this game that was created by ourselves. However, the way we created it is a secret. "

In fact, we don't know too much information in that answer, but according to how the game works, we can see that, when this goddess cannot guess the character you Who to think about, the game immediately required you to enter the image and the name of the character to increase the game's data. With millions of users worldwide, it is understandable why he knows so many people.

## Some tips and game settings

In the settings, you can select the language for the game. Although there is no Vietnamese, you can still use English to play because the questions of the genie are mostly easy to understand questions.

You can also go to the My World section to create your own characters to let the genie guess. If your kids also want to play Akinator, turn on child protection by going to **Settings** then moving **Children Protection** to **Yes** .

At the end of the game, after Akinator has guessed your character, you can suggest a new question by selecting **Add a question** . You will have to enter some keywords from the question and see if the question is already in the data.

In case that you want to trick Akinator by choosing questions randomly, unlike the person you're thinking, the application will recognize and remind you of that. Also Akinator can be guessed if you're thinking about a member of your family. So if you want Akinator not to know what you're thinking, try to think of a less famous person and answer the whole question correctly.

Wish you have a good time with this goddess of light!
