

Epson launches ultra-economical monochrome printer

Epson has just launched the EcoTank monochrome printer line, which meets the needs of saving operating costs and optimal power usage.

The representative of Epson said that the Epson EcoTank monochrome printer (including the M1100, M1120, M1140 and M3170 series), introduced in Vietnam, is able to help users save costs to the maximum. With high page yield of up to 6,000 black and white pages for each bottle of ink, the cost per print of EcoTank printers is 17 times lower than current laser printers in the Vietnamese market.

EcoTank monochrome printers are also superior to laser printers in the ability to save energy and environmentally friendly, with 30 times lower power consumption than laser printers in Vietnam. Thanks to non-thermal mechanical inkjet technology, Epson's inkjet printers consume much less energy than laser printers, which consume a considerable amount of electricity to generate internal heat. printing process.

Epson M1140, M2140 and M3170 printers are equipped with PrecisionCore technology nozzle that delivers prints at a resolution of 1,200x2,400 dpi. Meanwhile, the EcoTank monochrome models such as M2140 and M3170 are capable of automatic duplex printing, scanning and copying, especially the M3170 model is equipped with automatic paper feeder and Ethernet connection.

In addition, the M3170 model also has connectivity solutions that allow users to print directly from mobile devices via Epson iPrint. The remaining connectivity solutions include Scan to Cloud, Apple Airprint and Mopria Print Service.
