

eQuiz - Multiple choice quiz about JAVA

Following are multiple-choice questions related to JAVA programming language, there will be 23 questions in total with no answer for each time. Let's get started!

1. Question 1. What is the size of 1 Char?
 1. 4 bit
 2. 7 bit
 3. 8 bit
 4. 16 bit
2. Question 2. 1 class cannot be declared in mode
 1. Static
 2. private
 3. Default
3. Question 3. Results after compiling int a code = 3.5
 1. L?i compilation
 2. Runtime error
 3. 3.5
 4. 3
4. Question 4. Result when compiling int a1 = 5; double a2 = (float) a1
 1. L?i compilation
 2. Runtime error
 3. Không l?i
5. Question 5. The result after compiling int a = 9/0 code
 1. Compilatino error: The division calculation must be in the try syntax
 2. Compilation error: DivideByZeroException
 3. Runtime Exception
 4. No Error: The result is NaN
6. Question 6. Result after compiling code: float a = 9/0
 1. Compilation error: The division calculation must be in the try syntax
 2. Compilation error: DivideByZeroException
 3. Runtime Exception
 4. No Error: The result is NaN
7. Question 7. 1 Class can work in transient - transient mode
 1. It's correct
 2. False
8. public static void main (String [] args) {System.out.println ('b is' + b);} }
 1. L?i compilation
 2. Runtime Error
 3. Runtime Exception
 4. The result of b is 1
9. } } class B extends A { }

1. Lỗi compile
 2. Runtime Exception
 3. Không lỗi
10. Question 10. Results after compiling code: `class A {public static void main (String [] args) {A a = new B ();}}` `class B extends A {}`
1. Error compiler
 2. Runtime Exception
 3. Không lỗi
11. Question 11. Structured, protected syntax can be called in any subclass of that class
1. It's correct
 2. False
12. Question 12. A abstract class can use the syntax of non - abstract
1. It's correct
 2. False
13. Question 13. Java keywords are declared in lowercase as well as in capital letters
1. It's correct
 2. False
14. Question 14. What is the instanceof concept?
1. Is the structure, command syntax in 1 object
 2. Is the operator structure and keywords
15. Question 15. Primitive datatype is allocated based on stack
1. It's correct
 2. False
16. Question 16. Can compare boolean value with integer
1. It's correct
 2. False
17. Question 17. If class A works with the interface part, it must implement all the interfaces of that interface
1. Yes, always like that
 2. No, unless that class A is abstract
18. Verse 18. `Integer a = new Integer (2); Integer b = new Integer (2).` What happens if we apply `if (a == b)` syntax?
1. Error compiler
 2. Runtime Exception
 3. It's correct
 4. False
19. Question 19. Does `wait ()`, `notify ()` and `notifyAll ()` structure in an object need to be called from the synchronized code?
1. It's correct
 2. False
20. Question 20. The Inner class can be initialized within the building blocks
1. It's correct
 2. False
21. Question 21. Synchronized is a keyword used to Thread choose any object that has been locked before continuing to execute the command
1. It's correct
 2. False
22. Question 22. The default switch syntax is always executed
1. It's correct
 2. False

23. Question 23. How to prevent 1 variable - variable becomes serialized - has serial capability
1. Marked as private
 2. Marked as volatile
 3. Marked as transient
 4. It is impossible to do
