

# eQuiz - Multiple choice test about Networking Basic

Welcome to the test series of TipsMake.com with topics related to the fields of information technology. And this time we will continue with the test of Networking Basic, there will be 13 questions in total with no time for answering each sentence. There will be some questions with many different answer options.

1. 1. Is the network cable used to physically connect computers?
  1. It's correct
  2. False
2. 2. . list shared resources on the network.
  1. My Computer
  2. My Network Places
  3. Entire Network
  4. Computers Near me
3. 3. P2P stands for?
  1. Peer to Peer
  2. People to People
  3. Program to Program
  4. Plan to Program
4. 4. Which operating systems do Microsoft servers work on?
  1. Windows
  2. Linux
  3. Unix
5. 5. Is the IP address really refer to a host?
  1. It's correct
  2. False
6. 6. Class task . is to transport a raw bit stream from one computer to another.
  1. Physical
  2. Data Link
  3. Network
  4. Application
7. 7. . acts as a central transmitter and receiver for wireless LAN.
  1. Access Nodes
  2. Access Points
  3. Access Hubs
  4. There is no right answer.
8. 8. Is the service required by the Data layer?
  1. Unacknowledged connectionless service
  2. Acknowledged connectionless service
  3. Acknowledged connection-oriented service
  4. All services on.

9. 9. Is the network simply 2 or more computers connected by cables (or in some cases wireless connections), right or wrong?
  1. It's correct
  2. False
10. 10. Data Link Layer:
  1. Provides predefined service interfaces for the Network layer.
  2. Handling transmission errors.
  3. Adjusting the data stream so that the slow receiver (slow receiver) is not overflowed by the fast sender.
  4. All the answers above.
11. 11. Which algorithm is part of the Network layer software, is responsible for determining the output line that the incoming packet will be transmitted.
  1. Routing
  2. Session
  3. Adaptive
  4. Nonadaptive
12. 12. Using the network, you can set up certain computer resources - such as a hard drive or a printer - so that other computers on the network can access that resource.
  1. It's correct
  2. False
13. 13. Both LPT1 and PRN refer to the first parallel port and can be used interchangeably.
  1. It's correct
  2. False
