

Error of Messenger Video Call with Inverted Image - Solution

Video call messenger with the image reversed is a situation that many of you encounter during use. So how to fix errors quickly?

Video call messenger with the image reversed is a situation that many of you encounter during use. So how to fix errors quickly?

Messenger video calling is a commonly used feature in today's 4.0 era. The feature helps users easily communicate with each other when the device only needs an internet connection. However, during use, you often encounter the error of **Messenger video calls with the image reversed**, causing many inconveniences in the conversation. So how to fix this error? Join **TipsMake** to see more information below:

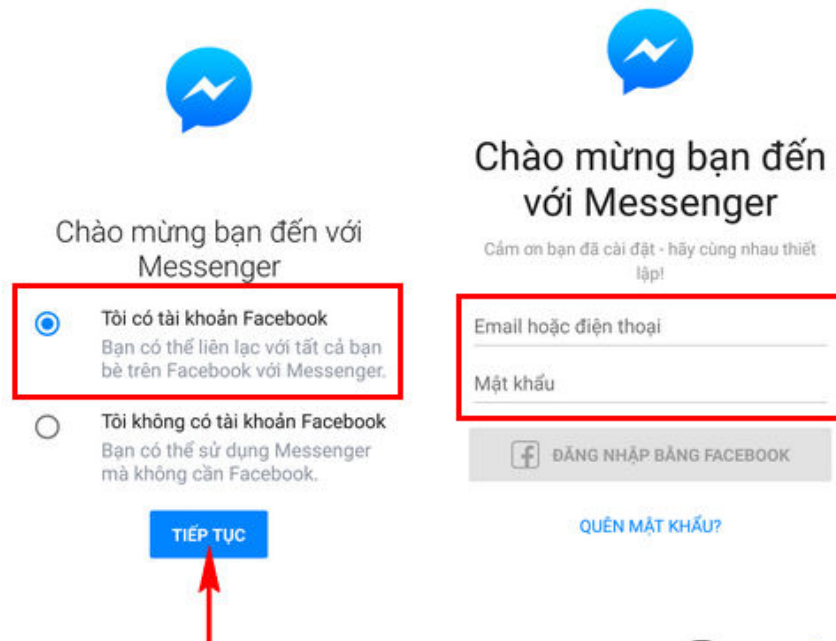

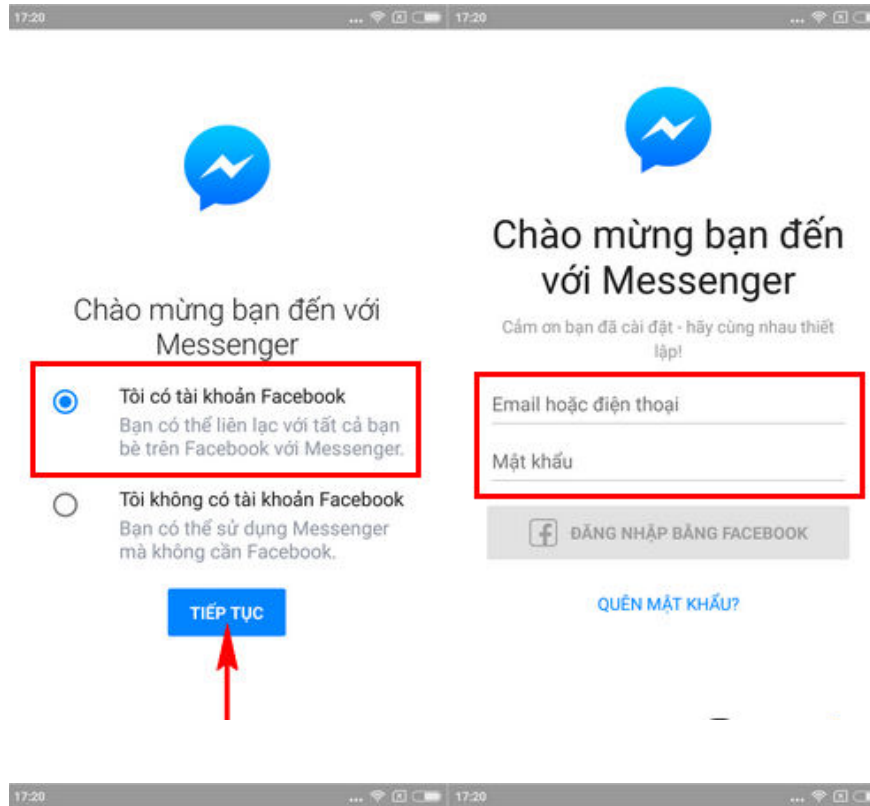

Instructions on how to fix the error of messenger video calls with the image reversed

Facebook video calls are upside down, making you extremely uncomfortable. Because at this point, to see the viewer's face in the right direction, you have to turn the phone upside down. This error is mostly due to a messenger application error or a software error on your phone.

So how to make video calls without being reversed? Please do the following procedure immediately:

Log out of Messenger and log back in

During operation, the application often crashes, causing the camera to flip when calling the messenger. So please *exit your Messenger account* on your phone then *log back in* and check for errors!

Rotate the screen horizontally when calling messenger

Rotating the screen horizontally is a way to make video calls on Messenger without being reversed that many people use and is quite effective. Simply rotate the screen horizontally when calling the other person to pick up the phone and then rotate it back to the original position.

In addition, if your phone often sets the screen to rotate horizontally, this may be the reason why Facebook video calls are reversed. So, please turn off horizontal screen rotation by: *Pulling down the status bar on the screen* >

Turn off horizontal screen rotation .

Uninstall the messenger app and reinstall it

It's possible that the Messenger version you're using is corrupted or the version is too old, leading to the error of the Messenger video call having the image reversed. So please remove the messenger application from your phone then go to Appstore or CH Play to reinstall the application.

Messenger - Cách nhắn tin nhanh hơn.

In addition, you should update the latest version of messenger to ensure you experience the latest features.

Some other ways:

? On some Android phones, you should reset the camera on the device to fix the error of the front camera video flipping the image. Go to the camera settings and activate ' **Reflection image**', ' **Photo in preview**' .

? **Reset all settings on the phone** : this method will cause your phone to erase all settings on the phone but will not lose data! *Proceed as follows:*

1. **iPhone** : *Settings > General > Reset > Reset all settings.*
2. **Android**: *Settings > General Management > Reset > Clear all settings .*

Hopefully, the above information will help you successfully fix the problem of **video calls on messenger having the image reversed** . See other articles on the website to learn more tips!
