1. Slow iOS 11.2.6 update error

Reason:

There have been many people complaining the process of updating iOS 11.2.6 on iPhone, iPad takes place very slowly, although this updated version is less than 100MB (only from 30MB to 60MB). In fact, the cause of this is due to your poor Internet connection through Wifi, 3G, 4G connection.

How to fix:

To fix the iOS 11.2.6 update error that takes place "slowly like a turtle", you need to ensure the Wifi connection on iPhone and iPad has a high degree of stability. Avoid downloading this update using 3G, 4G connection on the device if you do not want to charge the phone fee excessively according to the packages you are using.

2. Error Verifying Update iOS 11.2.6 when updating, Update

Reason:

Verifying Update iOS error when updates usually occur on each new version of this operating system released. And with iOS 11.2.6 is no exception, many people have encountered when trying to perform the latest iOS 11.2.6 update for their device. Usually this error stems from the process of connecting data from the device to the iOS 11.2.6 update registration system, there is a problem.

How to fix:

1. When unable to search for the latest update version, please restart the device.
2. Can perform iOS 11.2.6 update at a different time.
3. Make sure the connectivity, Internet access from 3G or Wifi connection on your device is stable.

3. iOS 11.2.6 update collapsed source

Reason:

A follow-up error that you may encounter is that when you just started iOS 11.2.6 update, the device crashed. It is possible that you have chosen to upgrade iOS for iPhone with OTA, but the battery life on iPhone and iPad is low and there is not enough data loading process, so an error occurred.

How to fix:

The easiest way to fix the iOS 11.2.6 update error is to shut down the source. Please connect the device to the charger to limit the process of collapsing the source when iPhone and iPad are having low battery life during the update process. . In case, iPhone, iPad has collapsed source when upgrading iOS 11.2.6, you need to put device

into DFU mode and Restore iPhone to rescue device at this time.

4. An error occurred during iOS 11.2.6 update with iTunes

Reason:

Most of the causes of having iOS 11.2.6 update errors with iTunes often come from the fact that you haven't checked and used the latest version of iTunes tool, along with the main iOS 11.2.6 Firmware version loaded from Apple.

How to fix:

1. Download and install the latest iTunes tool to fix an error when updating iOS 11.2.6.
2. Download iOS 11.2.6 Firmware suitable for the device you are using from the Apple homepage.

5. Computer does not accept iPhone for iOS 11.2.6 update

Reason:

This error often happens to those who use iOS 11.2.6 update with iTunes, the computer does not recognize the iPhone will prevent you from continuing the iOS upgrade process for the device. The main reason may come from the connection port, the connecting cable on the computer has a problem.

How to fix:

If you encounter a situation where your computer does not receive iPhone for iOS 11.2.6 update, you can refer to the following options:

1. You need to confirm the reliability after connecting your iPhone to your computer on the phone screen with the computers that first connect to iTunes.
2. Check if the computer can recognize the iPhone by changing the cord, the port that connects the iPhone to the computer.
3. If the two ways still don't work, learn more about how to fix computer errors that don't accept iPhones in iTunes so that you can quickly handle this situation.

6. iPhone does not find iOS 11.2.6 update

Reason:

The reason your iPhone doesn't find iOS 11.2.6 updates is because of two main reasons:

1. Your iPhone, iPad device does not meet the requirements for iOS 11.2.6 updates (from iPhone 5s and above).
2. Most likely your iPhone, iPad device has installed iOS update blocking.

How to fix:

For the first case, there is no other way to overcome that you have to upgrade to a new device. However, with iPhone devices that have accidentally blocked iOS updates, you can fix the problem below:

Step 1:

You access **Settings and** then move to **General settings** . Here you scroll down and select **Configuration** .

Step 2:

Now select the configuration of iOS update block that was previously installed on iPhone and click the **Delete configuration** item to fix the error when upgrading iOS 11.2.6 this update cannot be found.

Above are all the errors when upgrading iOS 11.2.6, hopefully with the information on you can continue the steps to perform iOS 11.2.6 upgrade for your device. And for those of you who still don't have a clear understanding of this update and are wondering if iOS 11.2.6 should be upgraded? Then refer to the article we shared earlier.
