

Evaluate quality 40-liter Fujie moisture-proof cabinets

Fujie moisture-proof cabinets are not only appreciated by users because of their resistance to moisture but also in their cost. Currently, Fujie has created many models with various sizes to meet the needs of everyone. In it, Fujie AD040 moisture-proof cabinet is one of the favorite anti-moisture devices.

Fujie moisture-proof cabinets are not only appreciated by users because of their resistance to moisture but also in their cost. Currently, Fujie has launched many models with diverse sizes to meet most people's needs. Let's quickly evaluate the Fujie AD040 moisture-proof cabinet, the moisture-proof cabinet is popular.

Evaluate the external form of Fujie moisture resistant cabinets AD040

Fujie AD040 moisture-proof cabinet is made of high quality corrugated iron and is coated with two layers of electrostatic coating to prevent rust. The cabinet is designed to be compact and consists of a glass door, two scratch-resistant layers capable of withstanding the impact and to ensure absolute humidity inside with rubber gasket system from surrounding to create certainty whenever opened. close.

Fujie moisture resistant cabinet design AD040.

Just like the Fujie AD030 moisture-proof cabinet, this 40-liter Fujie moisture-proof cabinet features two removable and adjustable distance trays.

In general, a 40-liter moisture-resistant cabinet is considered suitable for the majority of camera users' needs, you can put 2 camera bodies and 5 to 6 lenses of medium size into this camera cabinet. . You can even add some other items like medicine and electronic devices.

Evaluation of moisture absorption capacity of Fujie moisture resistant cabinet AD040

Similar to other modern moisture resistant cabinets of Fujie, Fujie AD040 moisture-proof cabinet uses dehumidification technology by IC, this is a completely new desiccant technology that is cooled, condensed moisture in the form of mist and is attracted going out like air conditioners.

Your digital devices will always be safely protected by Fujie moisture resistant cabinets AD040.

When using for a period of time, it shows that moisture-resistant cabinets are very quiet and quiet. Especially, the speed of dehumidification is faster than other products but does not consume too much electricity. However, the only minus point of this moisture-proof device is that when the power is lost the moisture will return to its original state as if it had not been dehumidified.

In short, with a price of more than two million VND, you can own a moisture-proof cabinet that is too good quality as Fujie AD040 has just absorbed quickly, smooth operation and easy use.
