

# Evaluate the top 3 best humidifiers today

The following article will help you get an overview of the top 3 best humidifiers today. Let's refer to offline

Air humidity is a fairly important factor for human health. Many doctors and experts recommend that the air humidity level in the room should be maintained at 45-50% to ensure health.

However, due to the influence of many factors, the humidity level does not always reach the standard in that threshold. A solution for you, that is to use a humidifier.

In recent years, this device has become more and more popular and popular.

This article by **Quantrimang** will introduce you to the top 3 best humidifiers today. Let's check it out!

## I. Top 3 best humidifiers today

### 1. Medisana UHW room humidifier - Reference price: VND 1990,000

Medisana is a worldwide famous brand in health care, founded in 1981 in Germany. In Vietnam, the Medisana brand is best known by consumers through medical devices such as:

1. Blood pressure cuffs
2. Portable massage machine
3. Thermometer measures infrared forehead or scales of electronic health .

Medisana UHW humidifier is considered a popular item. Thanks to the integration of ultrasound technology with high frequency oscillation, which contributes to transforming water into ultra-fine mist particles into the air to

increase the amount of moisture in the room.

In addition to the eye-catching and refined design, Medisana UHW also has a rather compact design with a weight of only about 2kg. 4.5 liter water storage capacity ensures that the whole family can use it freely for a long time up to 20 hours.

The 32W operating capacity combined with the mist flow rate reaches 230ml / h, Medisana UHW will really suit the rooms with an area of  $\approx 30\text{m}^2$  or less. Smooth operation and noise reduction are also obvious advantages in this product.

### **Specifications:**

1. Warranty: 36 months
2. Brand: Germany
3. Made in: Germany
4. Capacity: 32W
5. Capacity: 4.5 liters

## **2. Tiross TS-843 Humidifier - Reference price: VND 1,230,000**

Except for the line of mini humidifiers of Sunhouse, Tiross is a brand of humidifier distributed to the market with the most low cost products today. Tiross TS-843 can be considered as an effective solution for balancing room humidity with low cost.

Tiross TS843 humidifier is European-style, possesses elegant colors thanks to the combination of the golden and white tones. Outer shell made of high quality and durable ABS plastic.

Tiross TS843 is quite flexible with the nozzle design that can rotate 360 degrees, integrating advanced sediment filter to bring pure and cool steam flow throughout your family room, keep your skin dry when staying long in a room with air conditioning.

It has smooth operation and low noise level of less than 30dB for a long time. After a period of about 15 hours, the system will automatically emit dry water lights so you know how to add more water, thereby ensuring that the humidification spray process will be maintained continuously.

Modern LED display for clear visibility of parameters, spray mode for your convenience to monitor and control. Containers with a capacity of up to 4 liters and a high capacity of 30W will well meet the needs of rooms with an area of 25-30m<sup>2</sup>.

### Specifications:

1. Warranty 12 months
2. Brand: Poland
3. Product weight: 3kg
4. Capacity: 30W
5. Noise level: 30dB
6. Scope of use: 15 - 20m<sup>2</sup>

### 3. Beurer LB44 air humidifier - Reference price: VND 1,590,000

For families with limited budgets, cheap humidifiers like **Beurer LB44** will be ideal.

The device is equipped with a container with a maximum capacity of about 2.8 liters, which helps this product meet the humidification needs of rooms with an area of 25m<sup>2</sup> or less. Beurer LB44 operates on the principle of bringing water into the air environment in the form of ultra-fine mist which is easy to clean.

One of the highlights of this product is the design. The eye-catching ABS plastic housing is healthy and safe, Beurer LB44 also has a convenient adjustable knob design that helps you adjust the levels you want.

Strong moisture production capacity, maximum can reach 220ml / h to fully meet the amount of moisture needed for room space during dry weather.

Finally, the ability to operate smoothly and minimize noise.

### Specifications:

1. Warranty: 24 months
2. Brand: Germany
3. Scope of use: 25m<sup>2</sup>
4. Capacity: 20W
5. Capacity: 2.8 liters

Above is an overview of 3 best moisture generators today. However, to choose the right machine, you should also refer to some criteria to evaluate this product line. Here are some basic criteria:

## II. Criteria for evaluating good humidifier

### 1. When should I use a humidifier?

Regular use of air conditioning, dry weather . are the cases where you need the help of a humidifier. Some cases of too low humidity also cause many troubles and health impacts. If any of the following symptoms indicate low humidity alarms and the use of humidifiers are extremely necessary:

1. The phenomenon of dry lips cracked.
2. The phenomenon of dry eyes, dry skin.

3. The phenomenon of cough, sore throat.
4. Indoor wooden furniture has cracked phenomenon.
5. Electrostatic phenomenon.
6. People with asthma and allergies no longer relapse frequently.
7. The wooden designs in the house are loose, uncertain (especially chairs)

## 2. Select the capacity that matches the room area

Room space is also something you need to pay attention to when buying a humidifier. If the room size is large, the storage capacity is too small to meet the needs of humidification, in addition it is quite time consuming to light up.

Currently, in the market popular types of humidifier with storage capacity range from 2.5 - 4.5 liters, equivalent to the room with an area of less than 35m<sup>2</sup> and used continuously for 10 - 15 hours.

## 3. Moisture generation capacity

Besides the storage capacity, capacity is also an important factor. Some machines with an operating capacity of about 30W will be able to produce a flow of 200-300ml / h moisture.

In addition, utilities such as energy-saving ECO technology, automatic power-off mode when necessary moisture is reached . will help you better when using.

## 4. Noise level

With humidifier, noise level of less than 35dB will not affect the sleep of children in particular and the whole family in general. Please pay attention to this element when making a purchase.

## 5. Price

The majority of humidifier nebulizers on the market today come with various models and types, which are very rich prices. Stretching from the line of mini humidifier products at quite cheap prices only a few tens of thousands to the line of high-end humidifier products with a price of several dozen million dong.

Therefore, how to choose will depend much on your family's financial condition.

1. If the need to use your humidifier is not regular, use on dry weather days, you can choose the mini animal humidifier products such as the mist sprayer with the price below 200,000 VND.
2. Conversely, if you use a humidifier in the room to regulate regularly, the choice of mini humidifiers is not an effective solution, forcing you to consider the humidifier higher level.
