

Excellent laptops show the spirit of 'Creative inspiration - Continuous improvement'

Unlike any previous laptop, the ASUS NX90 delivers premium B&O sound quality on an 18-inch widescreen for the best multimedia entertainment experience.

ASUS NX90

Unlike any previous laptop, the ASUS NX90 delivers premium B&O sound quality on an 18-inch widescreen for the best multimedia entertainment experience.

The ASUS NX90 has an impressive appearance with a vertical box speaker that fits on both sides of the screen and a glossy aluminum cover with a palm rest also in aluminum. Double touchpad with Desktop Rotation software is an ASUS design enhancement that gives users a touch-sensitive interface when using both hands to feel like a real DJ. Special NX90 has NVIDIA GeForce GT 335M graphics card, port for Blu-ray / DVD dual drive, support for dual hard drive and USB 3.0 connection.

While the speaker quality of previous notebooks was often limited, the ASUS NX90's speakers produced the most realistic sound thanks to SonicMaster technology and ARC audio calibration solutions. SonicMaster is an exclusive ASUS audio technology that combines both hardware and software solutions to deliver the most impressive sound. The ASUS SonicMaster loudspeaker delivers maximum clarity with less noise, deeper bass and 8cc volume higher than that of a normal laptop.

ASUS NX90 will become the center of your living room and become the attention of the crowd wherever it comes.

Fourth generation ASUS Eee PC

These four generation Eee PC models are stylish netbooks and long batteries for modern customers and focus on fashion. With its soft, curving designs and smooth coating, Eee PC 1015PE, Eee PC 1018P, Eee PC 1016P and Eee PC 1215 look very light with many fashionable colors. ASUS Super Hybrid Engine technology and USB 3.0 transmission port provide rare long battery life of 13.5 hours. Cloud computing allows users to access data anywhere thanks to 500GB of ASUS WebStorage memory.

Collection of U Series and U Series bamboo casing

U Series notebooks balance between strong performance and light looks. ASUS U Series can be used for all day-to-day operations and is easy to use and gentle thanks to its unique creative design. These are the perfect companions of entrepreneurs and customers who need to move a lot. Unique fashion features include leather and bamboo cover and the latest technology to ensure the optimal combination between high performance and long battery life.

The superior 'green' laptop of the year is the new collection of ASUS U Series Bamboo (Bamboo Cover) (U33JC, U43JC, U53JC). The luxurious outdoor bamboo cover brings the classic look to the business customers. NVIDIA Optimus technology allows switching the graphics mode to optimize machine performance and battery life, and the VGA port supports screen display with high resolution and refresh rate. This laptop model is very suitable for customers who have a high sense of environmental responsibility.

Game series

ASUS recognizes the diverse needs and passion of gamers and responds to their specific needs with the most powerful products of overclocking and fine tuning.

Three-dimensional games began to become popular from CeBIT 2010 and ASUS is ready to bring users into the world of dynamic 3-dimensional gaming with CPU power, the ability to champion overclocking and peak graphics performance. The ASUS G51JX 3D laptop possesses the most powerful component components at the moment and is created to provide the most spectacular '3D' gaming experience.

ASUS G51JX 3D is the first laptop in the world to use NVIDIA GeForce 3D Vision technology including NVIDIA GTS360M graphics card with 1GB of memory and up to 4GB of system memory to deliver vivid and dimensional realism deep on the 15.6 inch screen. The ASUS G51JX 3D comes with a pair of 3D glasses, transmission and 120Hz LCD screen.
