

Experience all around you sounds with 8D audio

Basically, 8D audio is stereo music that adds effects echoing in space, making the audience feel like the sound turns around.

Basically, 8D audio is stereo music that adds effects echoing in space, making the audience feel like the sound turns around. With 8D audio videos, listeners don't need to have loudspeakers or go to the cinema, just a high quality headphone is able to enjoy the wonderful "all around you" sound.

Currently, on YouTube has appeared 8D songs with many millions of views, you just need to type the keyword '8D audio' on the search box, a series of suggestions will appear to help you choose different topics about 8D audio.

To experience 8D music, you can listen to music videos below. This is Better's 8D version, an R&B song rarely seen in the modern music market.

Many YouTube users said they felt like listening to "live music" when watching 8D audio videos.

According to Mel Magazine, 8D audio is not the original 8D remixes but edited by musicians from normal videos with software to split and coordinate audio streams in 360-degree virtual space .

To better understand the process of turning a normal song into 8D, you can follow the explanatory video of Dylan Tallchief, a Youtuber who is knowledgeable about the music below:
