

# Experience CPL Launcher, like Pixel Launcher but with more features and it's free

CPL Launcher still retains Pixel Launcher's minimalist design, but adds many features that help users to customize the interface more, bringing a pleasant experience to users.

CPL Launcher developed by Amir Zaidi based on the Rootless launcher. CPL Launcher still retains Pixel Launcher's minimalist design, but adds many features that help users to customize the interface more, bringing a pleasant experience to users.

Some outstanding features of CPL Launcher:

1. Support all necessary customizations including: setting up the main screen, motion animation, app drawer, changing icons, adaptive icons and bright / cool themes.
2. Customize application dock bar with many colors.
3. Support search box or Google icon (record & virtual assistant).
4. Support to change fonts for each part of the application.
5. Full support for Pixel Launcher-like smart actions like double-clicking, press + hold home button, swipe up and down, two fingers swipe up / down, .
