

Experience Google Veo creating AI videos from text for free

Google Veo text-based AI video generator is now free for all users to experience. Here is a guide to using Google Veo to create AI videos.

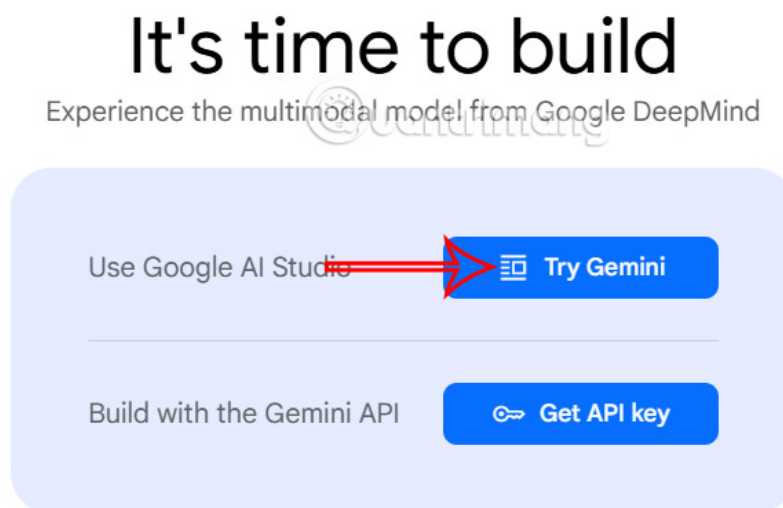

Google Veo text-based AI video maker is now free for all users to experience. Veo can create videos with a maximum duration of 8 seconds at 720p 24fps resolution, in 2 video orientation options: landscape (16:9) and portrait (9:16). Users can use Google Veo to create AI videos for free by logging into Google AI Studio with their personal Google account. Here is a guide on how to use Google Veo to create AI videos.

How to use Google Veo to create AI videos

Step 1:

Open [aistudio.google](https://aistudio.google.com) page via the link below and log in to your Google account. In this interface, **click on Gemini** as shown below.

1. Visit Google Veo AI video creation

[View Gemini API documentation](#)

Step 2:

In the new interface, **click on the Video Gen feature** to use AI video creation.

Google AI Studio

 Stream

 Video Gen

 Starter Apps

 History
Quantimeng

 Enable save

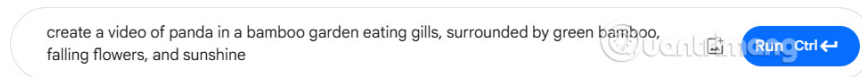

Continue to select **Veo 2** in the right menu as shown below.

Step 3:

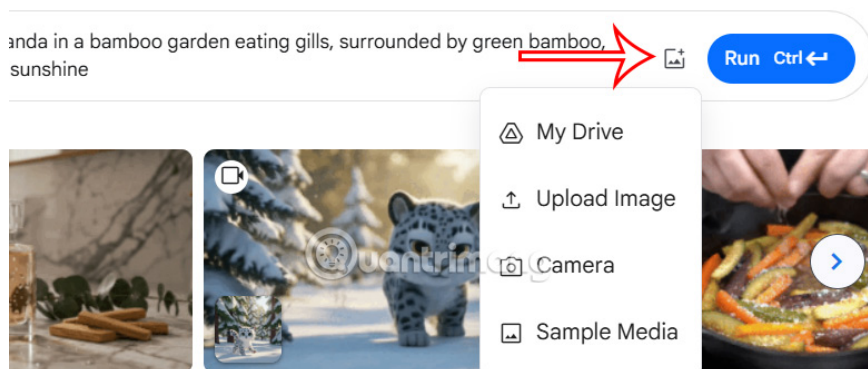

Now in the AI video creation information entry section on Google Veo, we **enter the detailed content of the video to be created**. The more detailed it is, the easier it is for Google Veo to analyze and create videos for you.

Generate videos with Veo 2

You can also **add an image** and ask Veo to use it as a reference for the upcoming video, by **clicking on the image h**.

Finally, **press the Run button** to send the AI video description to Google Veo.

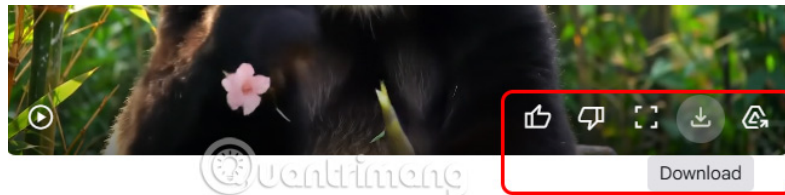

Step 4:

The process of creating an AI video on Google Veo can take up to 1-2 minutes depending on the content you describe and the details that appear in the video. Once the video is available, **click the play icon to watch** .

If you like it, click **the save icon** to download the video or share it to your Google Drive account.
