

# Experience some features on Skype Preview new version

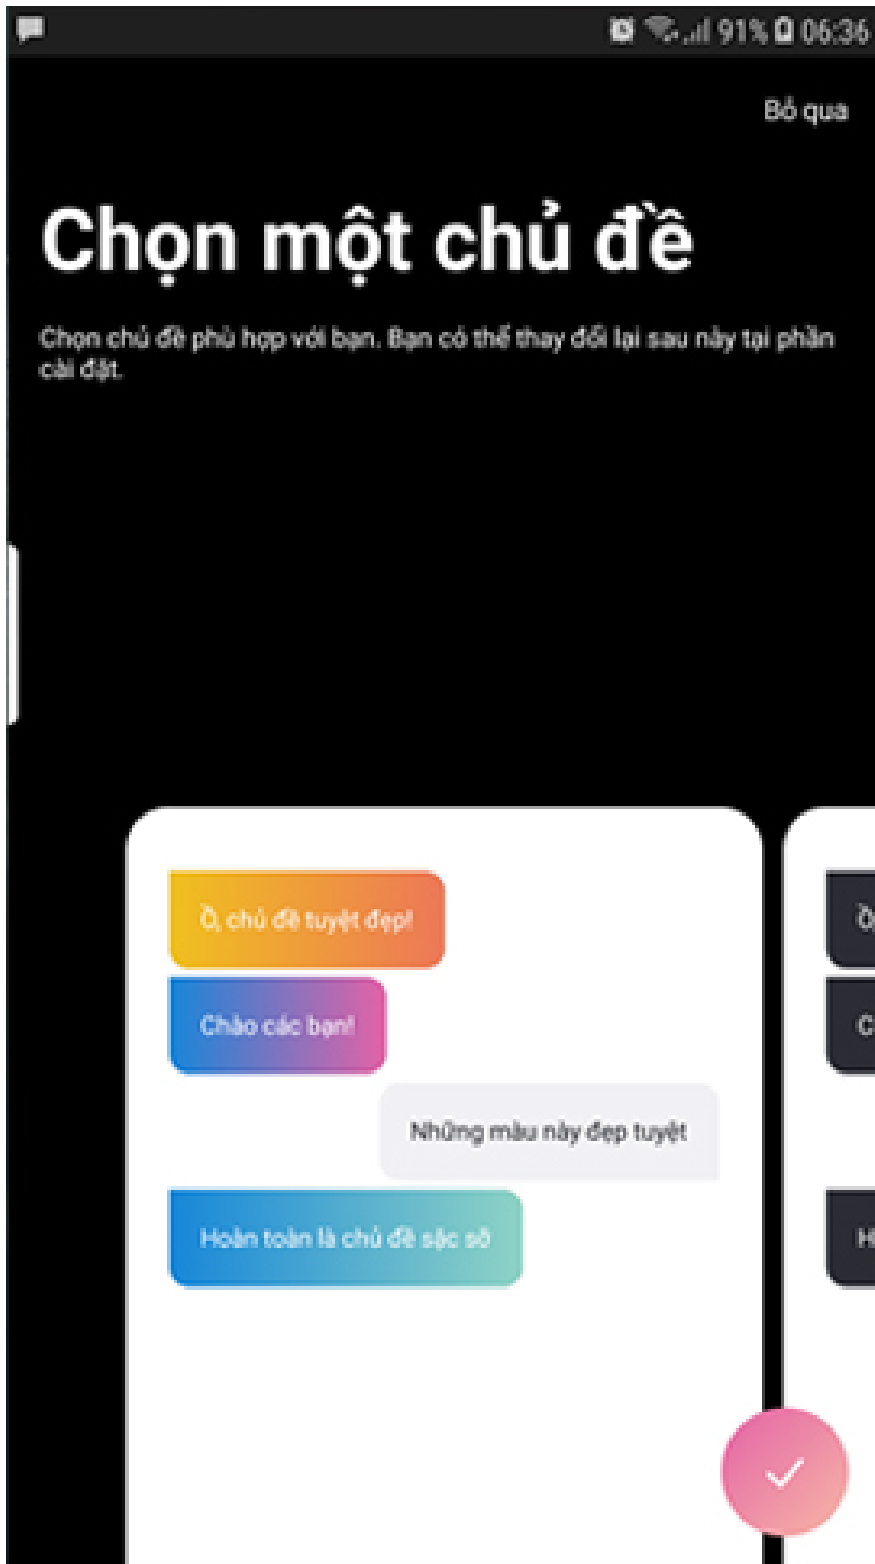

Microsoft released a completely new version of Skype Preview, with a changing interface and new features for Android 7.0 onwards.

According to the roadmap, Microsoft has officially released a preview of the Skype application called Skype Preview, for users of Android 7.0 or later operating systems. In this new version, the manufacturer has completely changed the interface, providing some new features in addition to basic features for users. In this article, readers can refer to some new changes on Skype Preview version.

After downloading, we proceed to install the application. This new Skype icon is similar to the old Skype version. We also need to **login** to **Skype account** to use.

After that, users will be able to **choose 1 of 2 overall interfaces** on the application, colorful interface or pure black and white interface only.

# Đồng bộ số địa chỉ của bạn

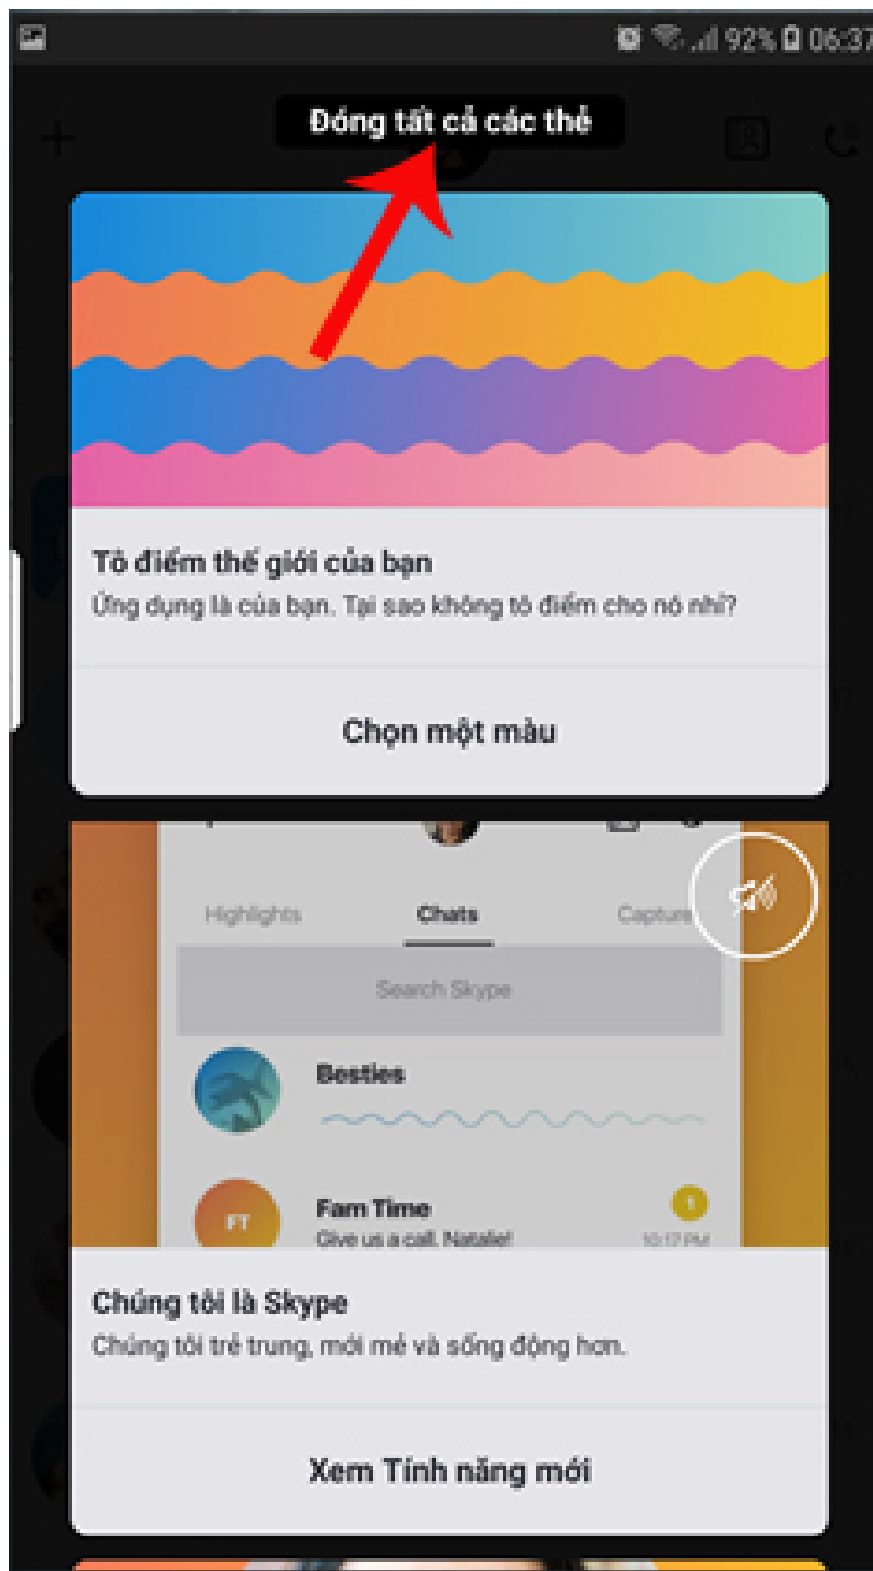

Để giúp tìm bạn bè trên Skype, chúng tôi sẽ định kỳ gửi danh bạ của bạn đến Microsoft. Bạn có thể thay đổi cài đặt riêng tư trong Hồ sơ > Cài đặt, bao gồm cả cách mọi người có thể tìm thấy bạn.

Tuyên bố về Quyền riêng tư của Microsoft

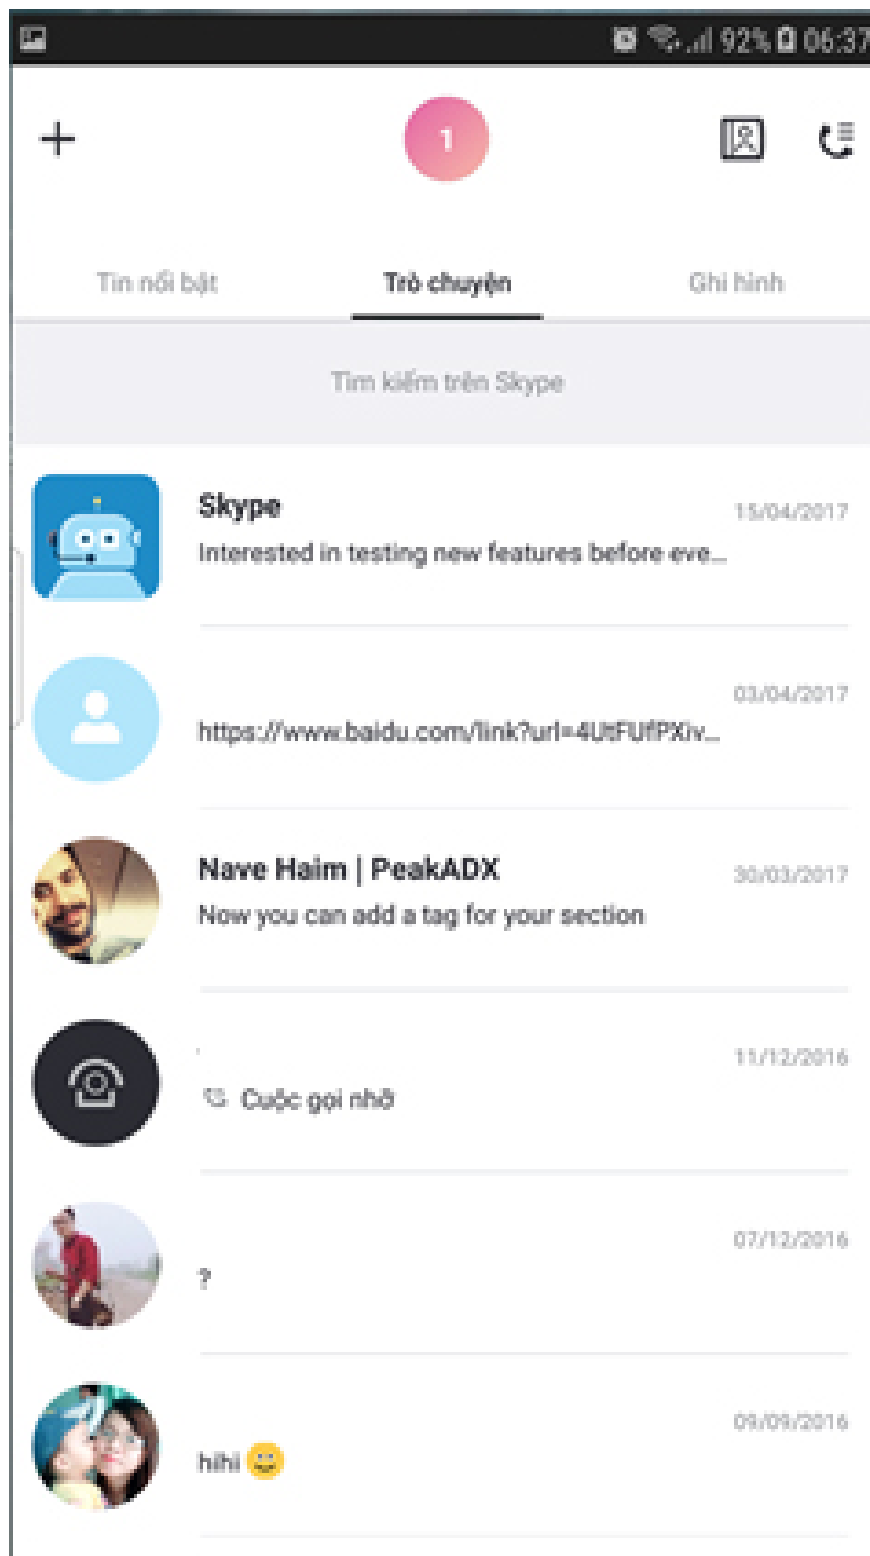

When it comes to the first interface, Microsoft will introduce new features to Skype Preview. To skip this introduction interface and use the new features, click **Close all tags** .

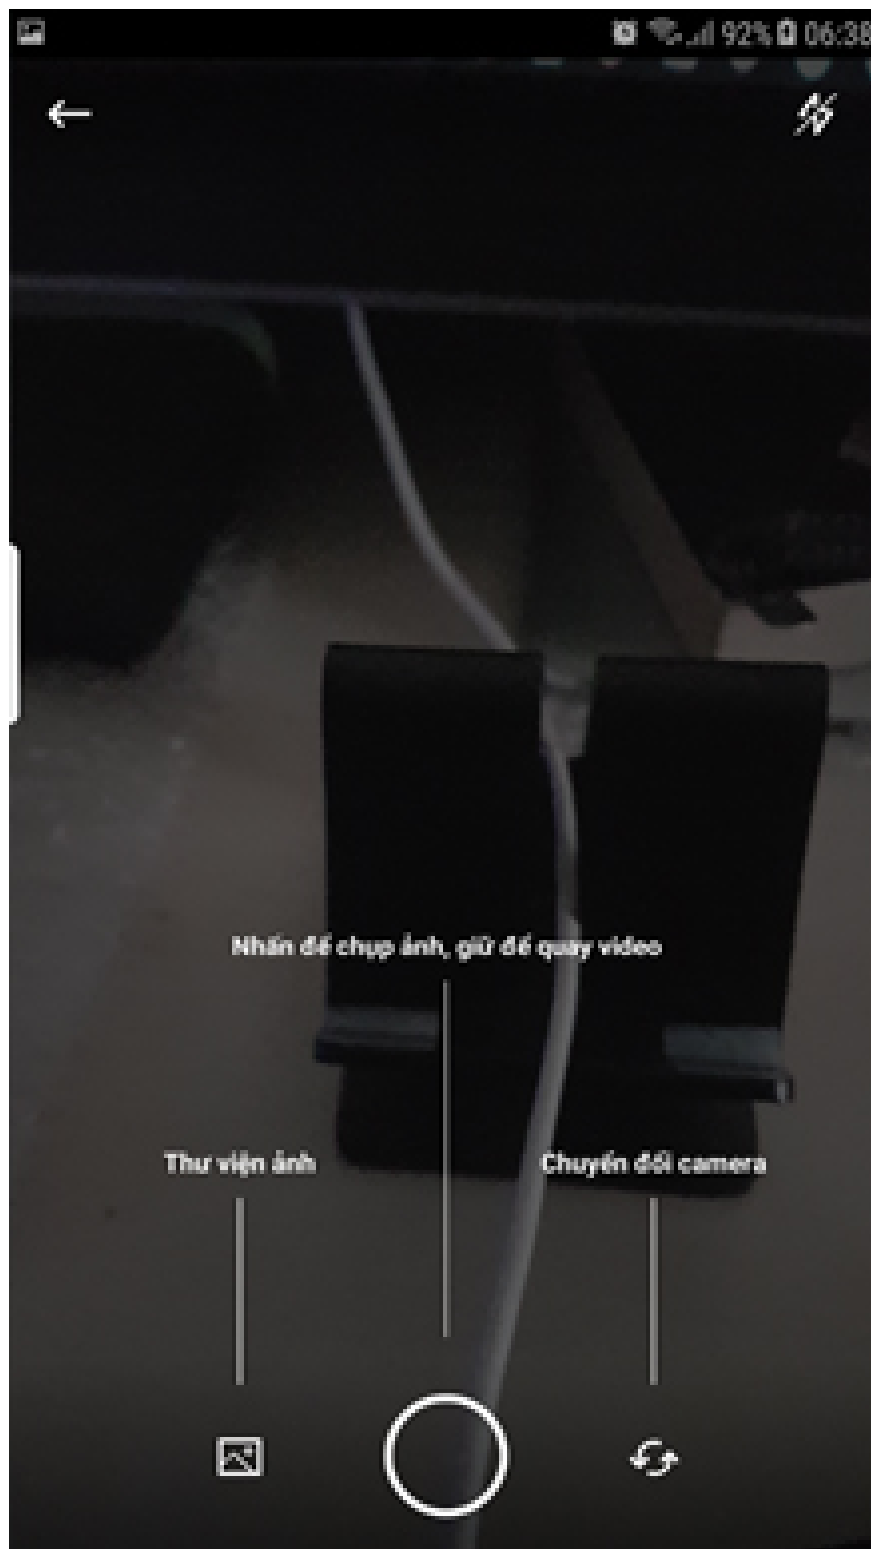

This main interface will feature 3 sections of **Highlights** with user-clicked information. Track from your friends' posts, **Chat** with a list of conversations and **Record** entries.

The Recording section is a significant change in the Skype Preview version. We can take photos, record videos and then decorate photos with stickers. This feature is not new on Facebook Messenger, Instagram, Zalo applications, but with Skype will bring a completely different look from the old version.

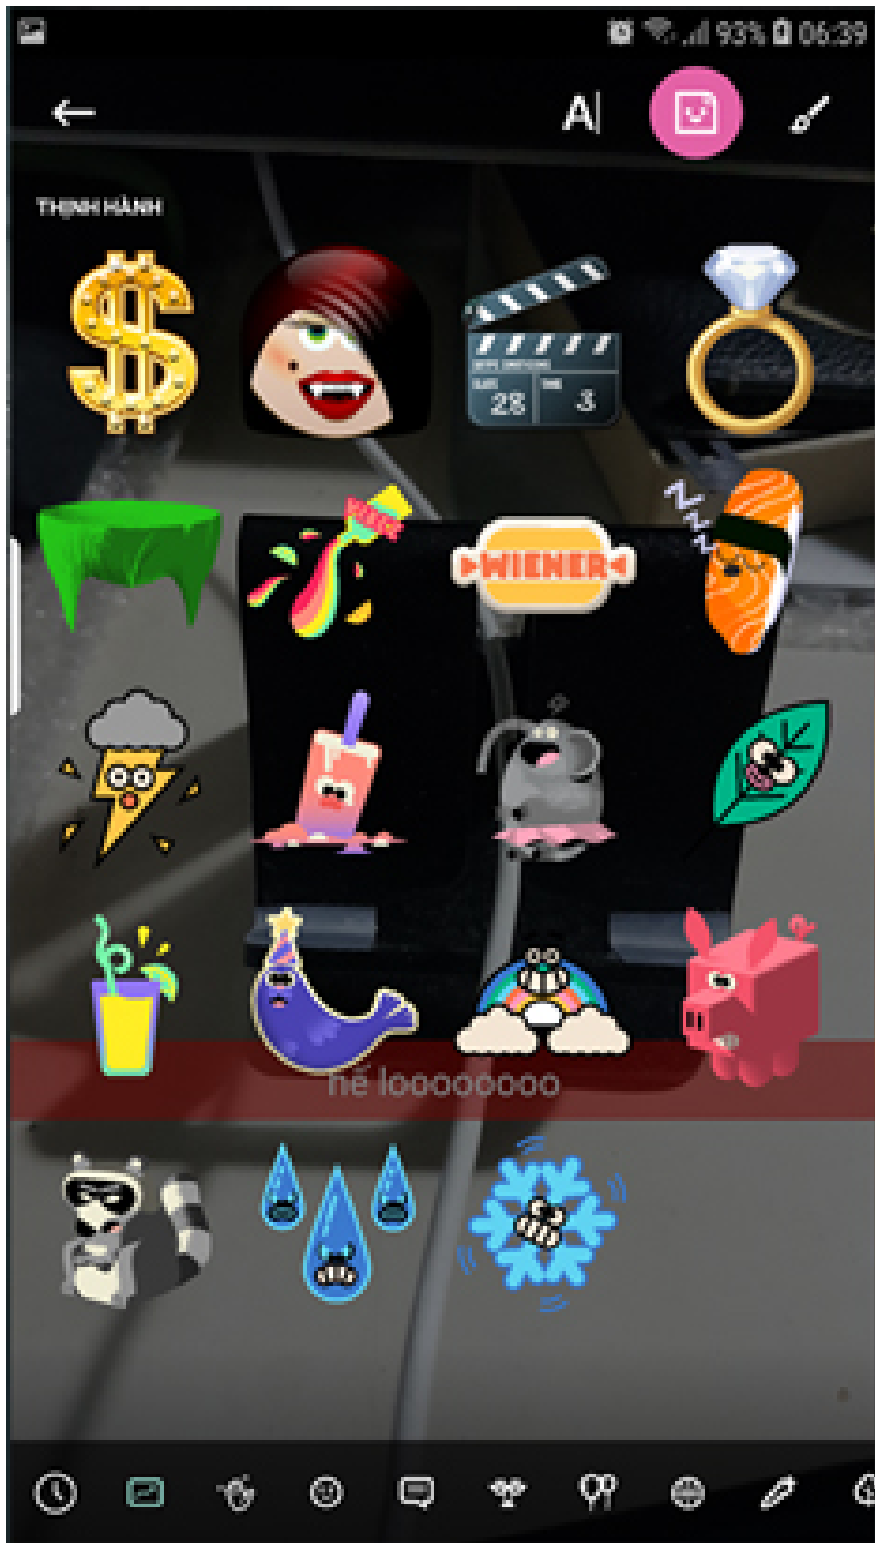

When clicking Recording, we can **take a picture** or press and **hold to record a video** by **pressing the center button** . After that, you can click the sticker icon to add a sticker to the photo, the A letter icon to add text and

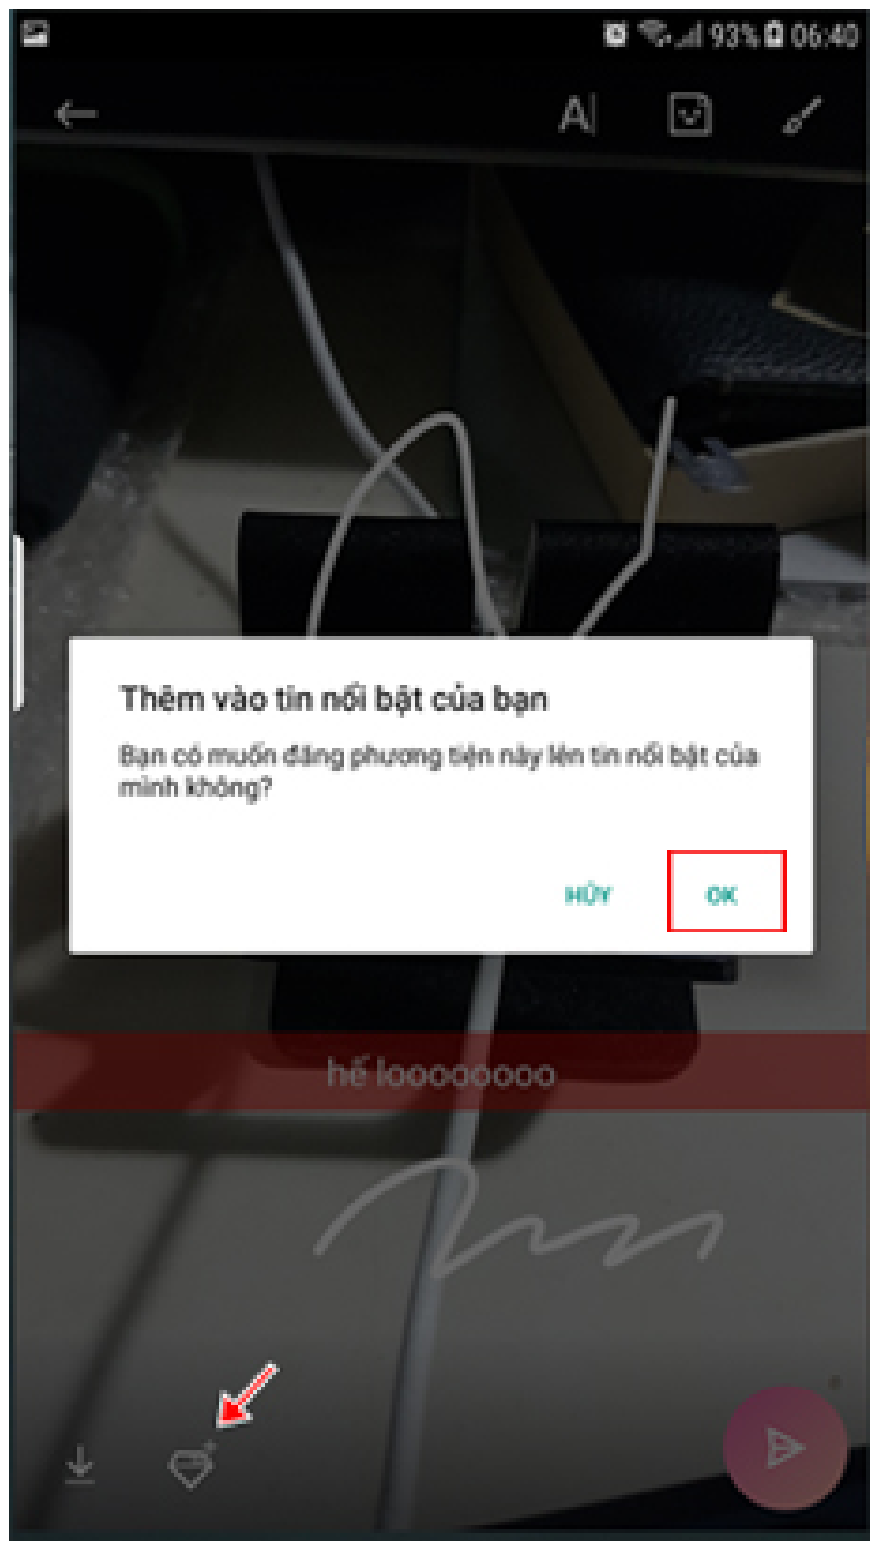

brush to add a drawing to the image.

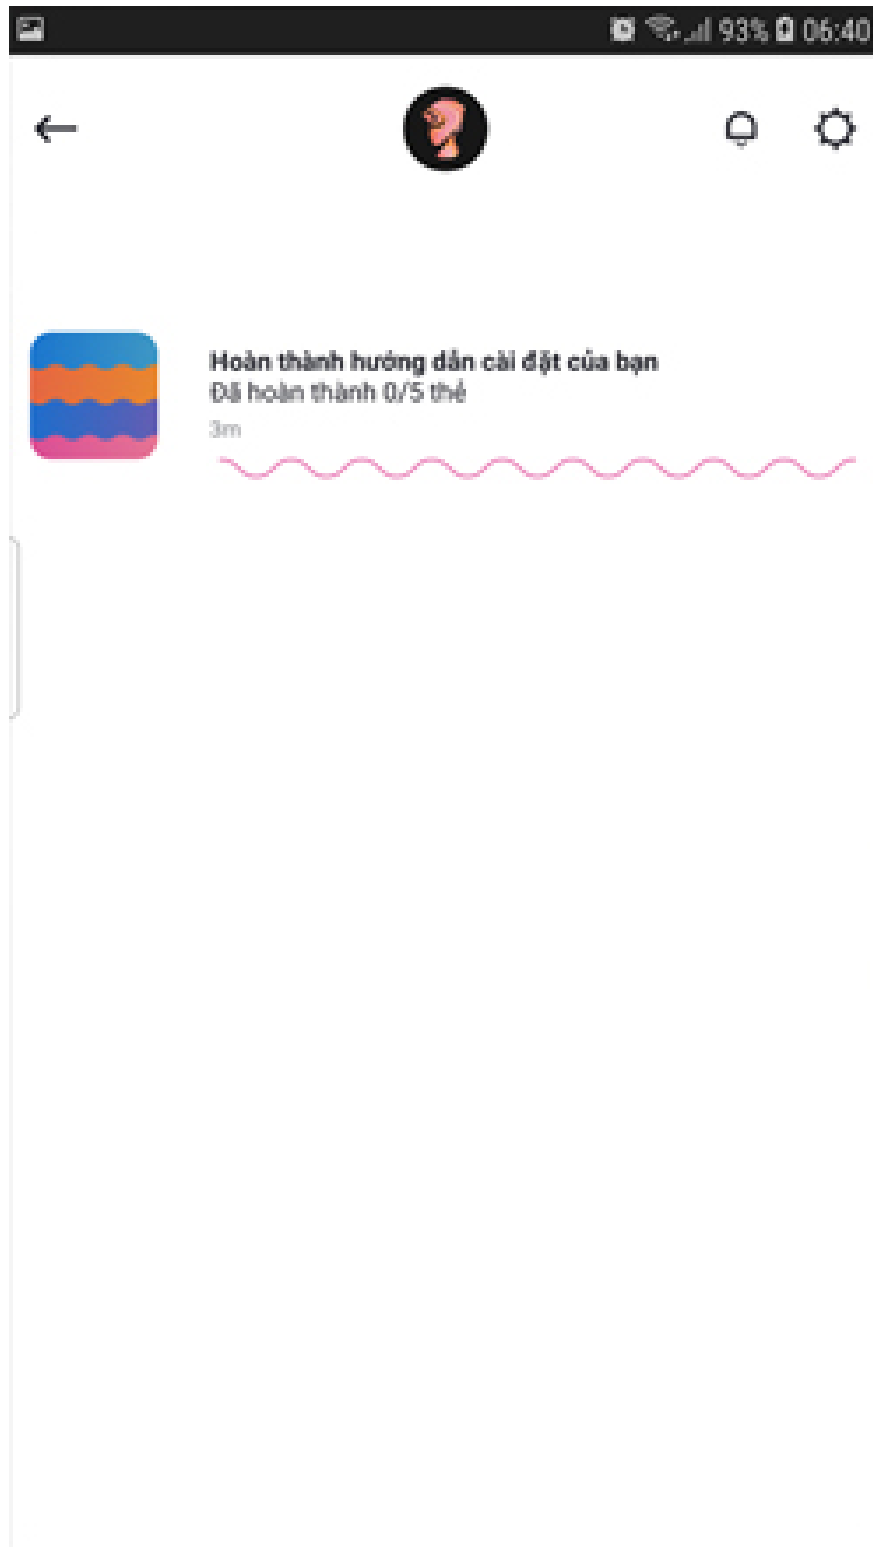

List of sticker on Skype Preview pretty much for you to choose. After that, we can download images or post as featured news, similar to your Day feature on Facebook or Instagram Stories, .

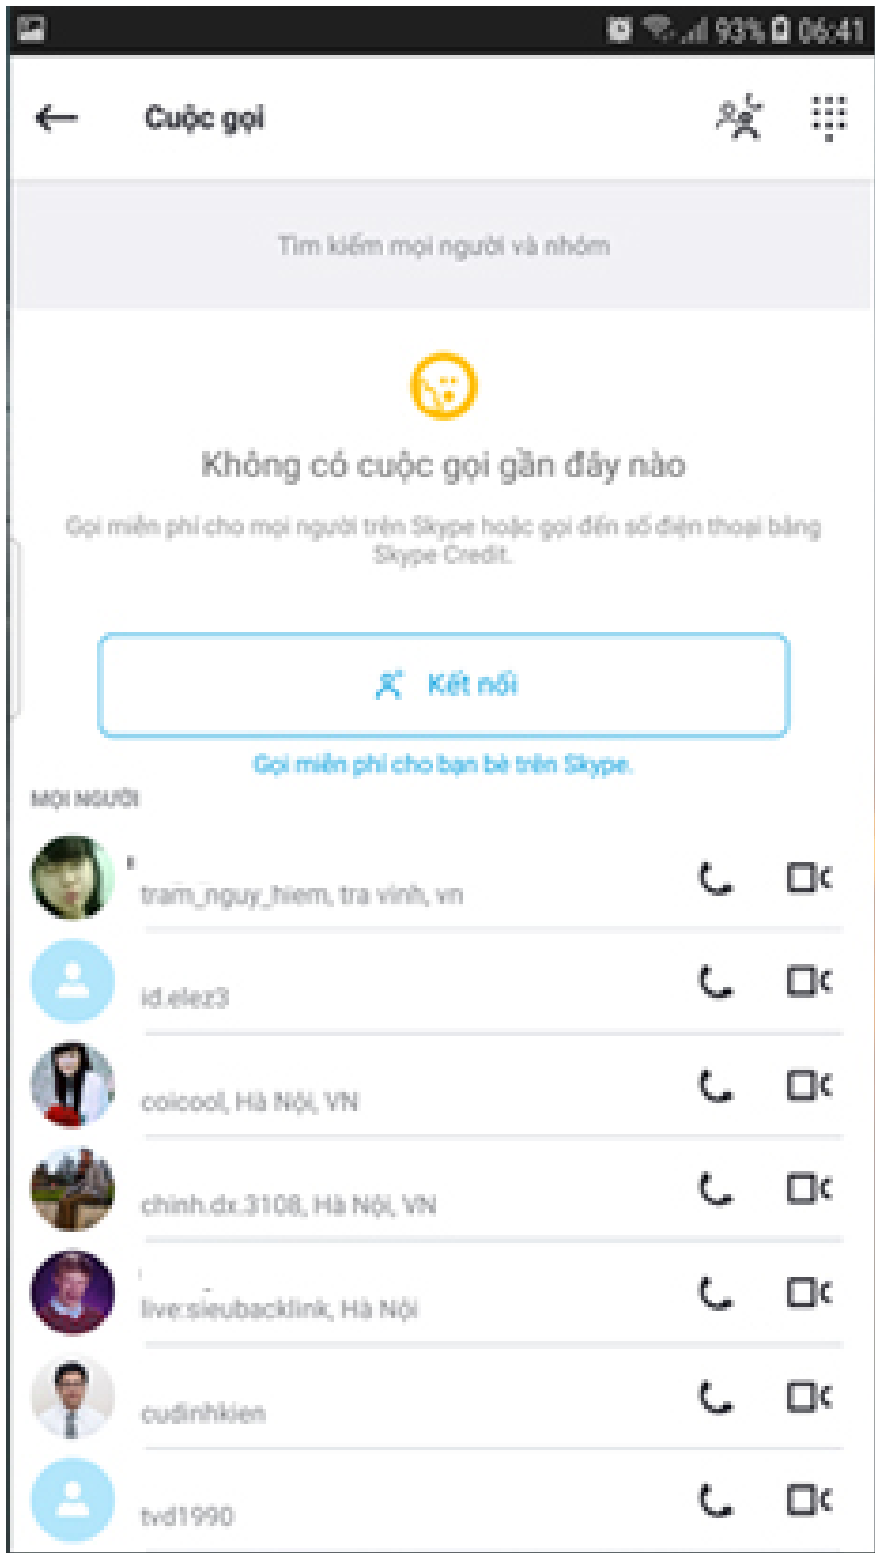

When clicking on a **avatar** , you will see **the activity history** on the application.

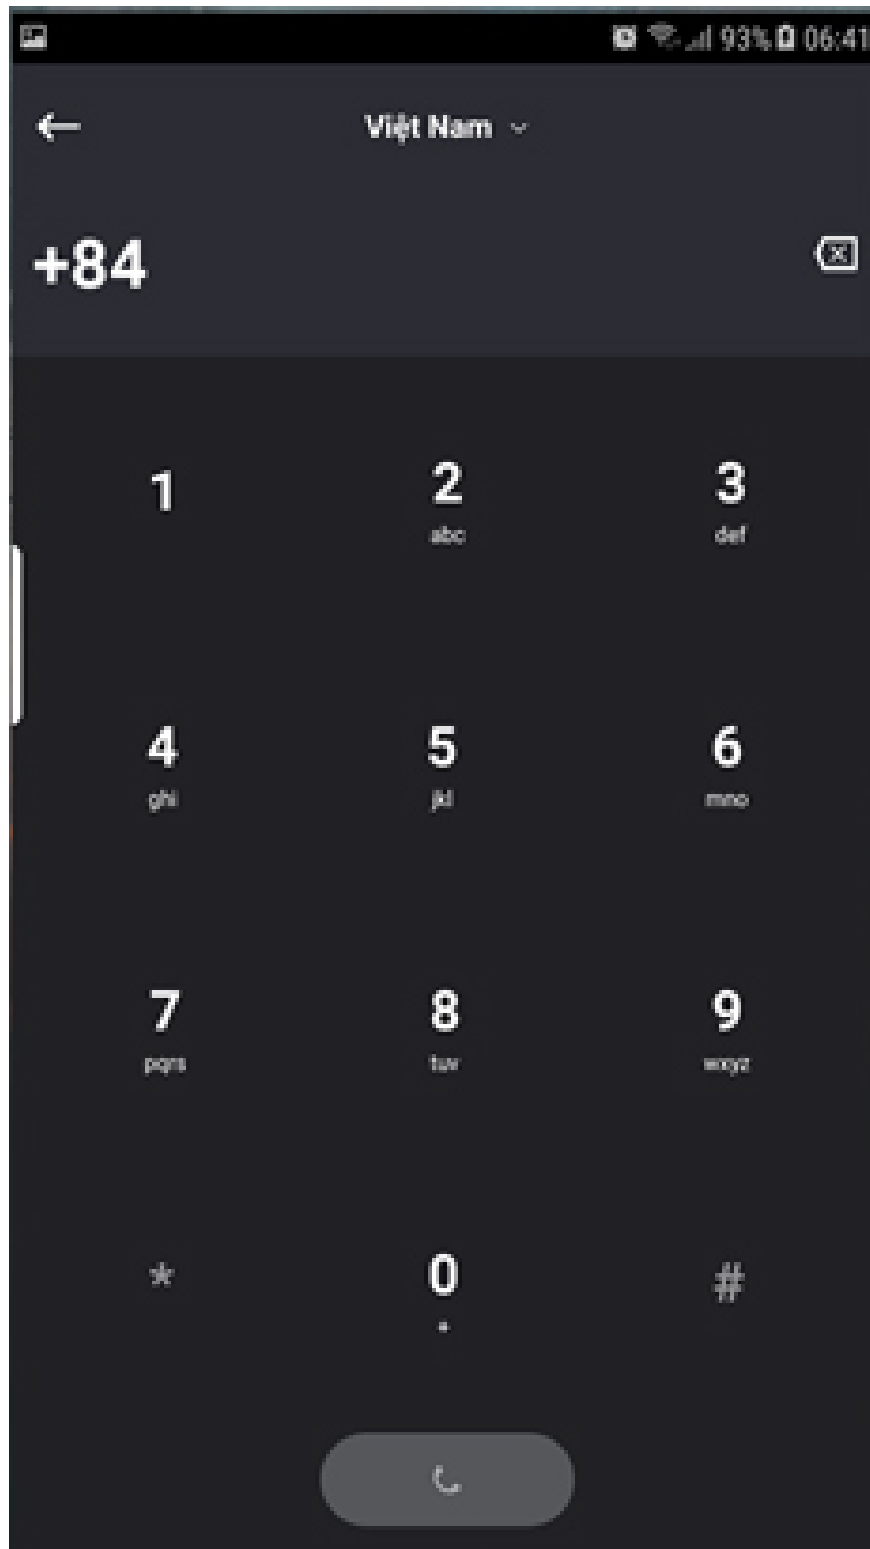

At this interface, when clicking on **the bell icon** , users will not be bothered by notifications sent to the application.

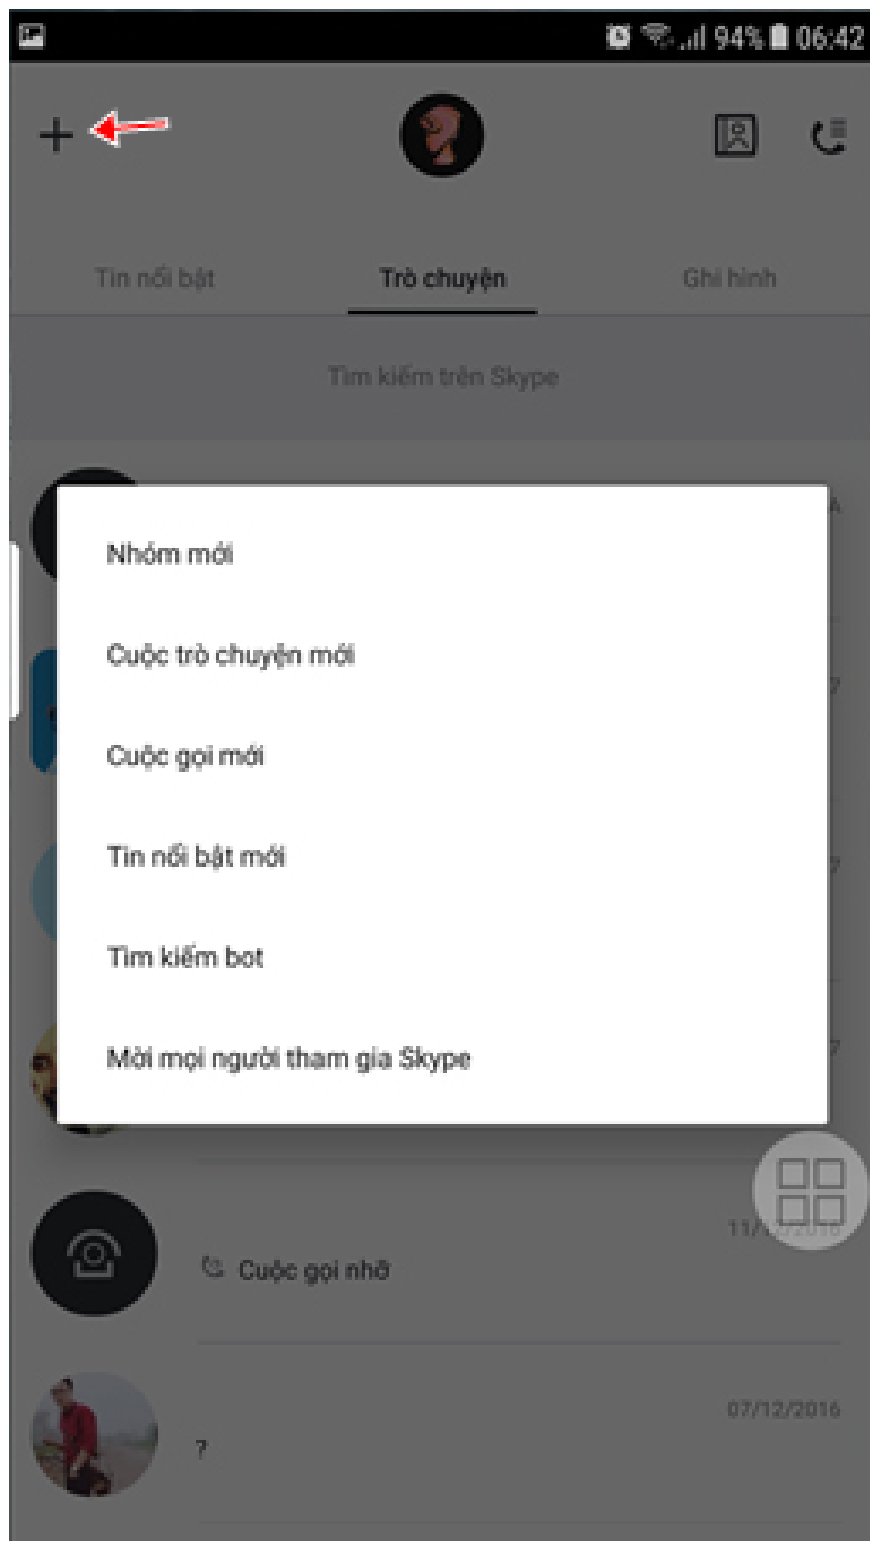

In addition, **the interface to enter and manage calls** on the Skype Preview is simple and clear for us to easily use and manage.

When clicking **Chat** and clicking **the plus icon** , users will have a list of new chat and search settings.

In the messaging interface, you can still send images, choose a sticker or icon to send, .
