

# Experience the game on Toshiba Satellite L755

L755-1004X plays 'smooth' some games with default or highest graphics customization even when exporting to other Full HD standard screens.

**L755-1004X plays "smooth" some games with default or highest graphics customization even when exporting to other Full HD standard screens.**

With Nvidia GeForce GT 525M graphics card 1GB VRAM capacity, Core i5-2410M chip clocked at 2.3GHz, L755-1004X plays well for Street Fighter IV, Call of Duty 7 and NFS Shift 2 with graphic options in medium some quick tests.

When using a VGA cable to connect to a Full HD standard monitor, it still supports good gaming on this resolution without the appearance of jerking or tripping.

Along with Intel Core i5 processor, 5GB RAM, 500GB hard drive and attractive price of about 16.9 million, L755-1004X is a laptop suitable for many gamers.

**Below is a video to play the game on Satellite L755 in Vietnam:**
