

Experience the main Dark Mode mode on Android 9 Pie

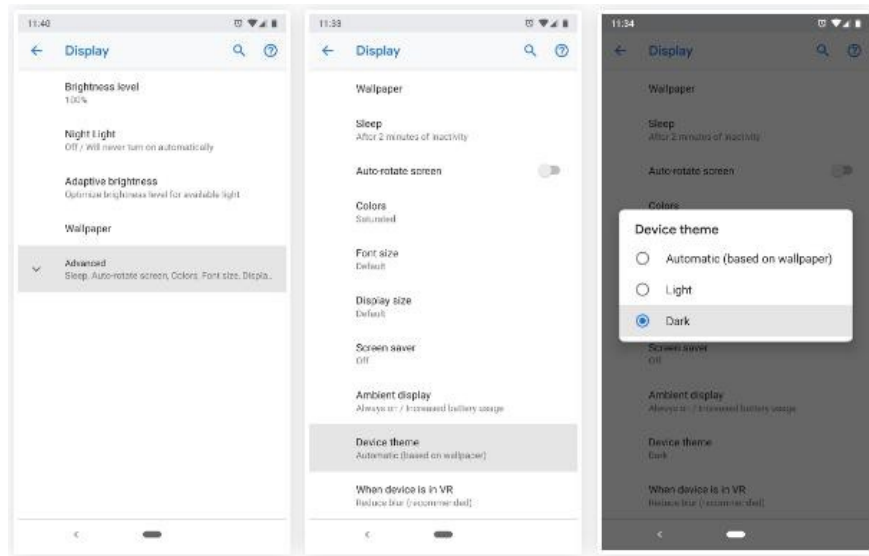

Google has officially released Android 9 Pie with many interesting features and improvements. One of the most popular features is Dark Mode, which allows users to actively convert the entire interface into dark colors if desired.

Google has officially released Android 9 Pie with many interesting features and improvements. One of the most popular features is Dark Mode, which allows users to actively convert the entire interface into dark colors if desired.

Currently, Google's Pixel smartphones can be updated to this new operating system, while other Android smartphones will have to wait until the end of the year.

To activate Dark Mode on Pixel smartphone, you need to access the Settings -> select Display -> select Advanced -> select Device Theme. You can choose from the following 3 modes: Automatic (automatically change depending on the wallpaper), Light and Dark.

After setting, most system interfaces are turned into dark tones except the Settings menu and other applications.
