

Experience the Material Design 2 interface for Chrome, you can activate it

With the Material Design 2 interface, Google Chrome browser will get a completely different interface with the main blue, sharp and sharp lines on the menu bar, browser tabs replaced by the interface round and round corners.

In early March, Google launched Android P version, soon after this technology company introduced its completely new Material Design 2 design. Currently, Google is testing this new design interface in Chrome browser.

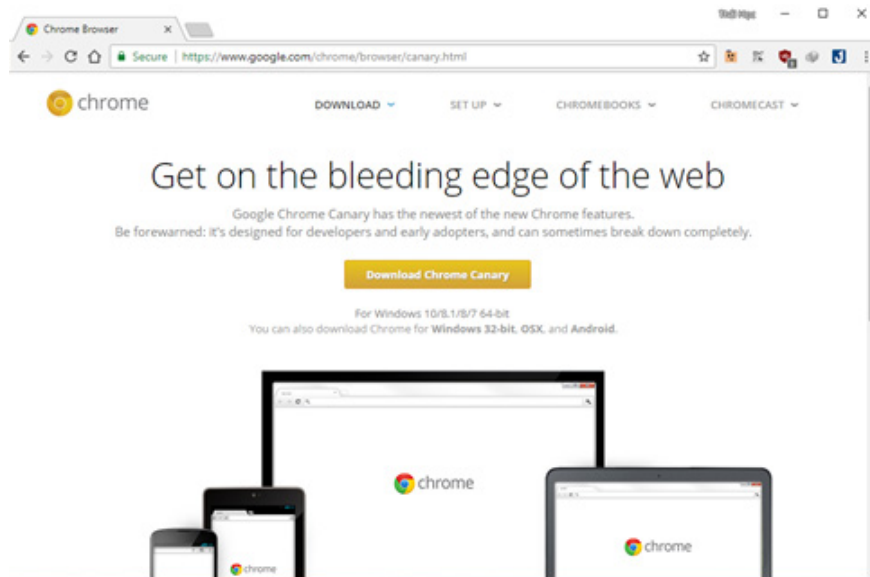

With the Material Design 2 interface, the Google Chrome browser will have a completely different interface with the main green color. In Android P, Google used to design everything and the company continued to bring this design on the Material Design 2 interface on Chrome, sharp and sharp lines on the menu bar, browser tabs were replaced replace it with a circular interface and round the corners.

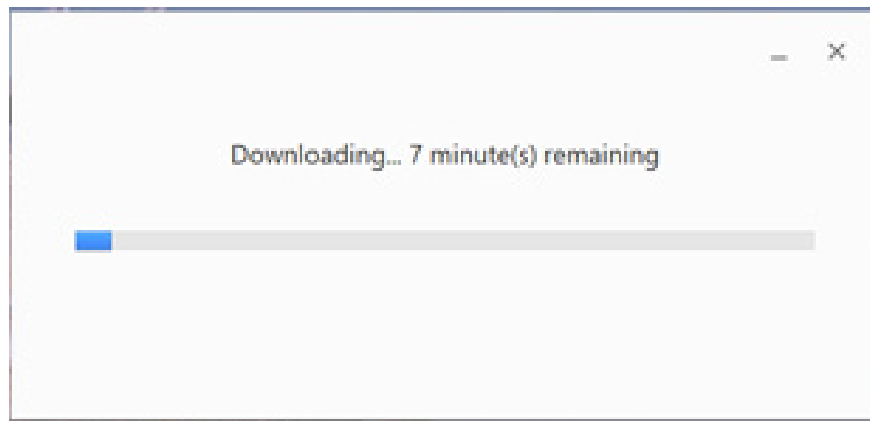

If you want to experience the Material Design 2 interface on Chrome, follow the instructions below to activate this interesting Google test.

Step 1: Visit the address below to download the latest version of Google Chrome Canary. Google Chrome Canary has the latest Chrome features.

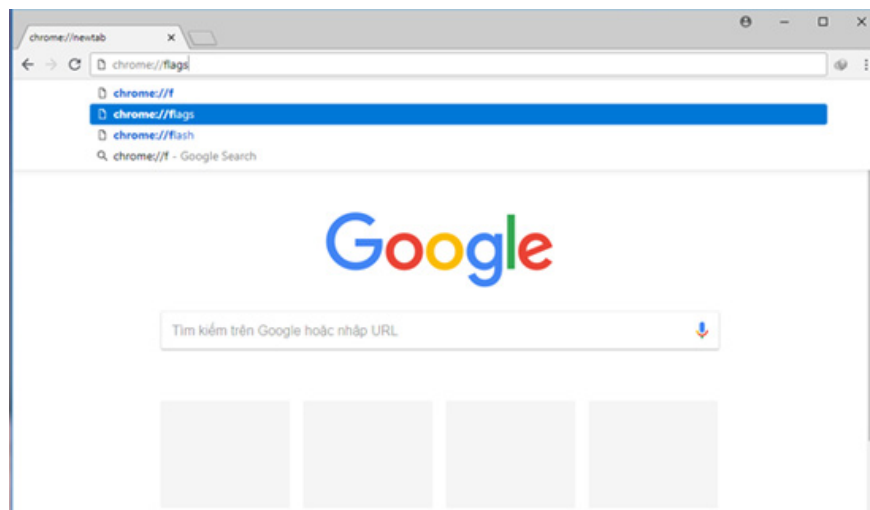

1. <https://www.google.com/chrome/browser/canary.html>

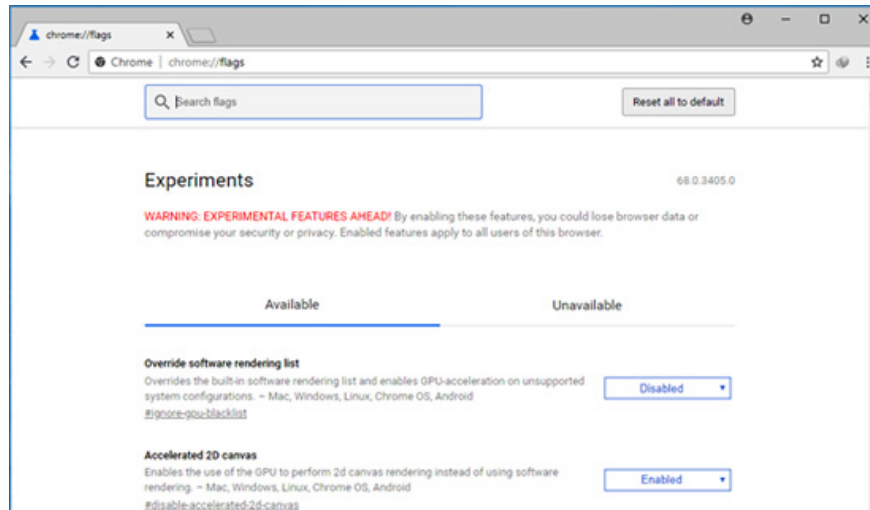

Chrome Canary computer installation process requires an Internet connection.

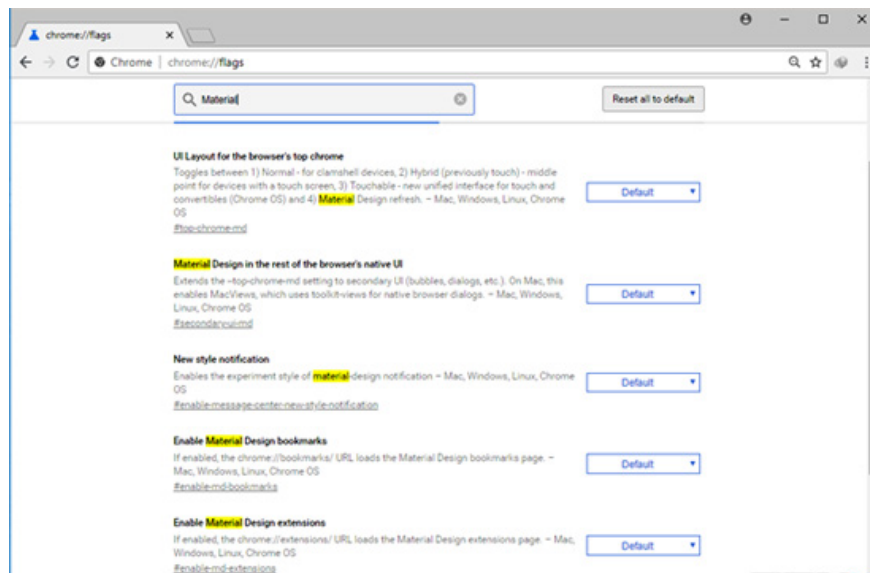

Step 2: After installation is complete, start the browser and then visit the Chrome Canary hidden feature page at '**chrome://flags**' address.

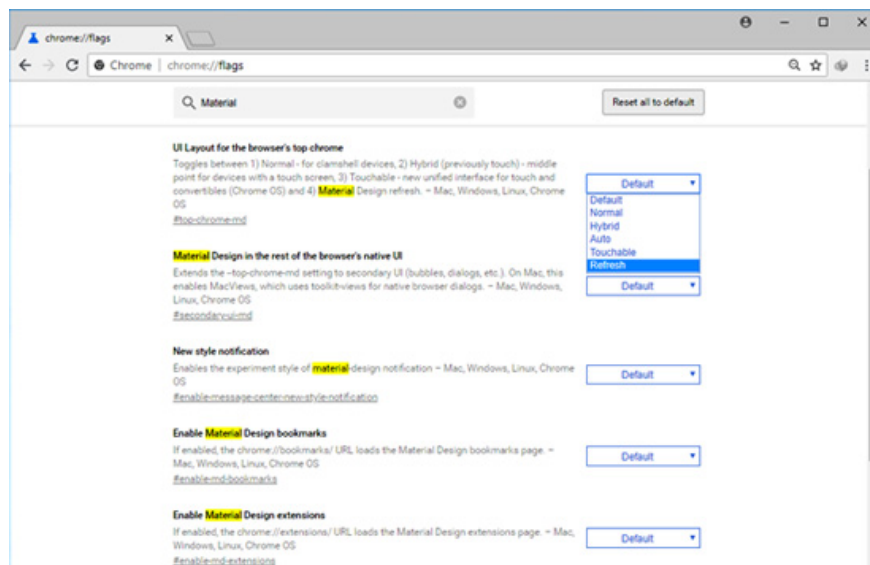

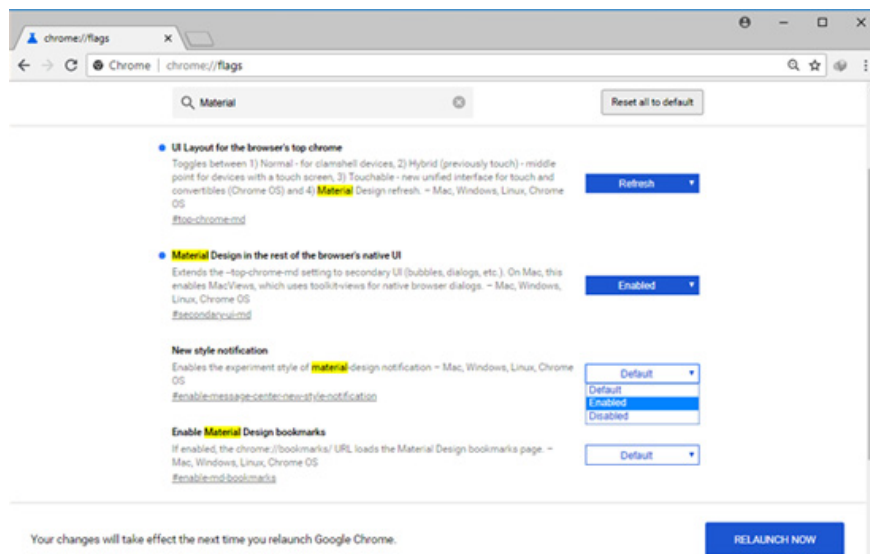

Step 3: In the search box type in the keyword 'Material' -> the list of options related to Material will appear.

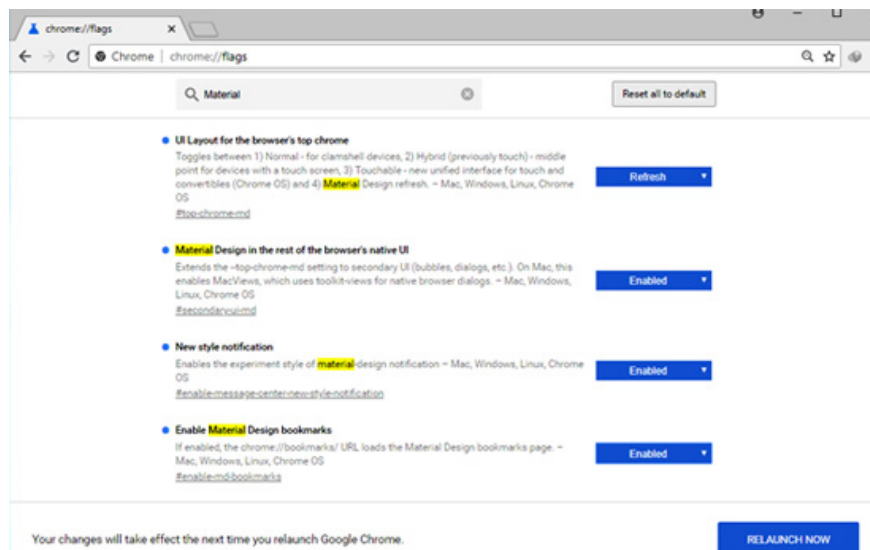

Step 4: At 'UI Layout for the browser's top chrome', select the change option to 'Refresh'.

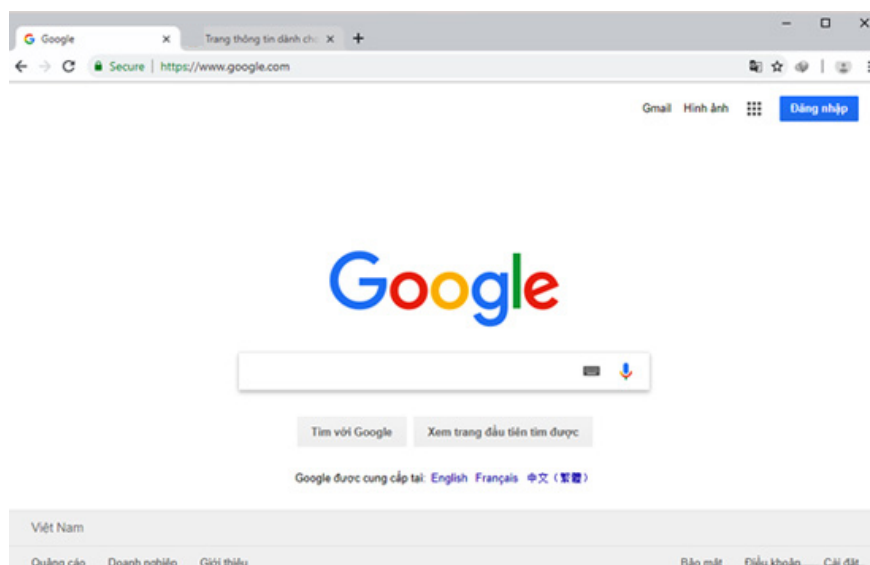

The remaining options change to 'Enable'.

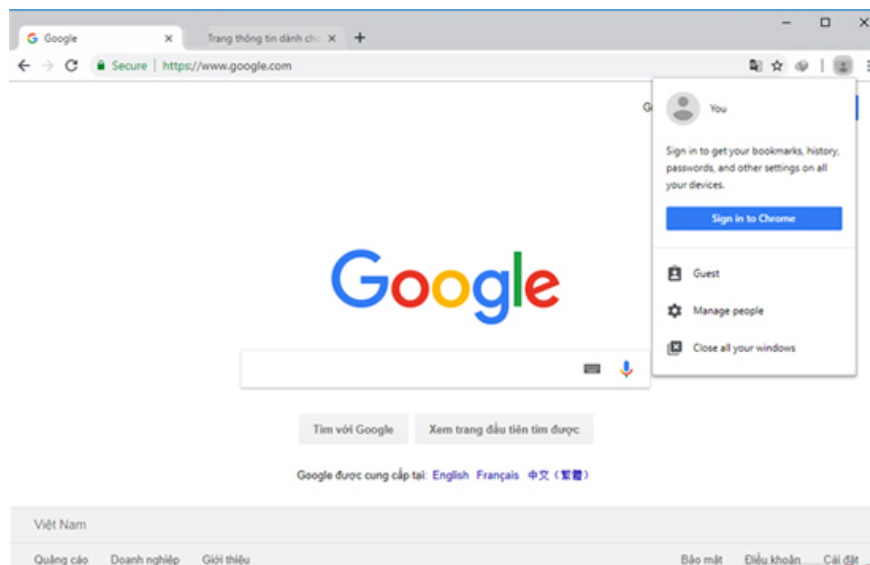

Step 5: Click on ' **RELAUNCH NOW** ' to save the changes and restart the browser.

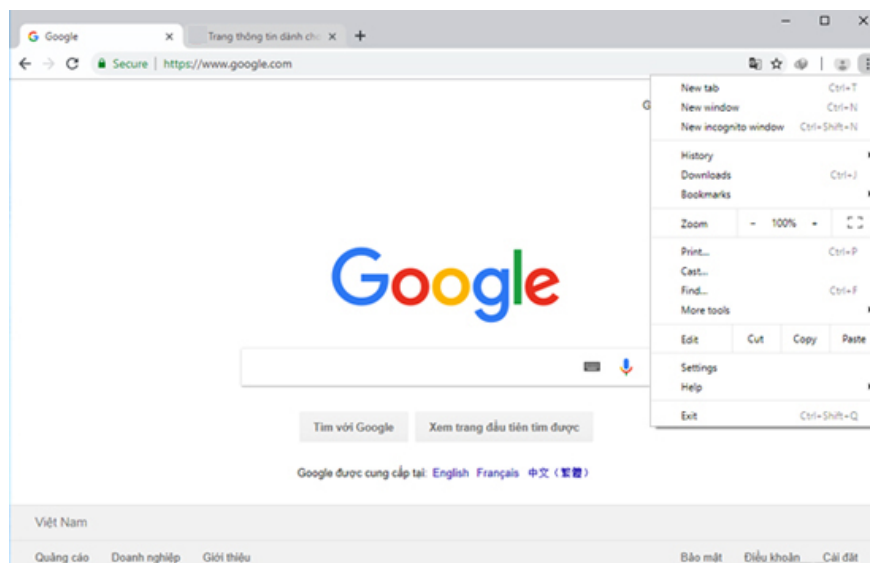

And below is the Chrome Canary browser interface has switched to Material Design 2. This new interface focuses on rounding and rounding everything from sharp and sharp lines on the menu bar to tabs Browser.

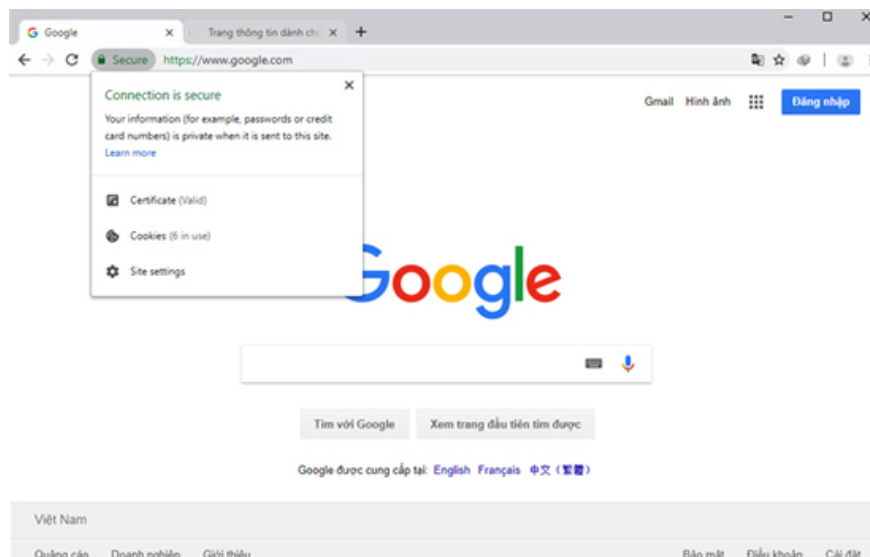

The icon for the Google account is moved down and placed at the end of the address bar.

The drop-down menu bar is like a 3D image due to changing effects and making it appear more floating.

The security key is no longer separated from the domain name by a vertical brick as it was previously placed in an oval shape. The browser tabs above are no longer trapezoidal, but instead rounded corners.
