

Experience the new lag and upload speed feature of FAST.com

Recently, Netflix has updated to let FAST.com show more tests on upload speeds and latency to help users get more information about the Internet they use.

In 2016, Netflix launched FAST.com, a website dedicated to checking Internet speed of users at any time and anywhere.

Recently, Netflix has updated to let FAST.com show more tests on upload speeds and latency to help users get more information about the Internet they use.

Measuring network speed with FAST is very simple, you just need to visit FAST.com website or open FAST application, tests will be performed. You just need to wait for the results to be returned.

Your Internet speed is

19 Mbps 

Show more info

If you choose to display more information (**Show more info**), the upload speed and load time test will be performed. The results you get not only show upload speed, latency but also IP address, ISP name, server name, client name .

Your Internet speed is

19 Mbps 

Latency

Unloaded

21 ms

Loaded

26 ms

Upload

Speed

74 Mbps

Client

Server(s) Tsuen Wan, HK

⚙ Settings

70MB 

270MB 

To configure some options such as connection number, show details as soon as the test starts, save the configuration . you can click on **Settings** .

Your Internet speed is

19 Mbps

Parallel connections: Min: Max:

Test duration (seconds): Min: Max:

- Measure loaded latency during upload
- Always show all metrics
- Save config for this device

With just a few simple steps on FAST.com, users will be able to have a more comprehensive view of the Internet quality they are using.

According to Netflix, there have been more than 500 million speed tests via the web or via iOS and Android applications made by its FAST.com speedtest tool. And over the past seven months, the number of uses of this speedtest site has doubled.
