

Experience the reality of Windows 8 pre-beta

Windows 8 build 8175 is being demonstrated at CES 2012 and Microsoft has demoed some of the latest features to the crowd of attendees. The most recent build includes a new touch to close the Metro app in 'view' mode, improving the keyboard, mouse and port of the Metro video / music app.

Microsoft announced the pre-beta version of Windows 8 at CES 2012.

Windows 8 build 8175 is being demonstrated at CES 2012 and Microsoft has demoed some of the latest features to the crowd of attendees. The most recent build includes a new touch to close the Metro app in 'view' mode, improving the keyboard, mouse and port of the Metro video / music app.

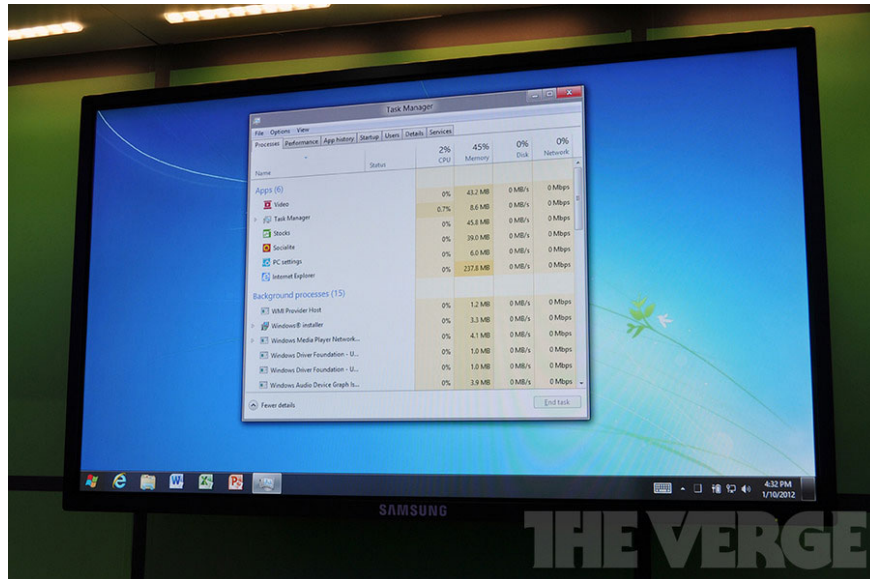

Microsoft also confirmed some recent leaked images of color picker for Start Screen boot screen and blurred Charms Bar. Windows 8 build 8175 allows switching the Start Screen color and the actual images below show the high customization of the operating system. The software giant who promised Windows 8 beta will appear in late February with the Windows Store app store.
