

Experience traveling safely into the rain for the near-sighted people

In the reluctant cases you have to go in the rain, your eyes are close, how do you do to have a safe trip.

You are passionate about traveling, like traveling everywhere in beautiful roads in Vietnam. In those cases, you have to go in the dark and it rains heavily, your eyes are close, you should prepare rain gear so there is reflective color to be easy to see in rainy conditions. As such, other drivers will see you when traveling on the road. Not only does it ensure safety, rain clothes also help you keep your body warm when it rains, besides that a dedicated helmet when it rains, it can protect your face from getting rusty because of rain, If you get close, don't worry about getting wet when the car is running at high speed to help you be safe. Besides, when traveling on the road to safety, you also need to note the following.

1. From A to Z travel experience watching sunflower Nghe An
2. Journey to discover Vietnamese history and culture by motorbike

1. Should tie things neatly

People who often go on a trip, surely have to bring quite a piece of furniture with them to be able to use on every journey, so when traveling on the road, especially in the rain you should tie bags and bags tightly In the back, to be sure when moving, you don't have to stop to fix the item again, then cover it with a raincoat to make sure it doesn't get wet and should not wear anything on the shoulder to be comfortable when moving. turning in the rain.

As you move, keep the raincoat you wear without flying and the raincoat that covers your clothes and not hanging down on the wheel, it will be very easy to wrap it in the wheel when you travel long distances.

2. Turn on the headlights when moving

Surely everyone knows motorbikes will have two light modes that are headlights and cos. Headlights use when traveling long distances to be able to light farther away, while cos lamps go in residential areas. However, you should also be flexible when you turn on the headlights and cos lights because there will be times when cars go in the opposite direction, when you turn on the headlights will blind the person going in the opposite direction, so let down the cos, after Go through, then re-open the headlights to go normally.

3. Run after another car

This is the best way for those who are near, when it rains. Go on the road if you come across a motorbike that is walking in the same direction as you, then follow them, because the close-eyed people are often difficult to see, especially when it rains, the visibility will also be limited. so many, so much. However, you should note that even if you follow it, you need to keep a minimum distance of 5 meters to help you react to the signal light when the vehicle in front of you turns.

4. Run with the truck

If on the road you travel without a motorbike going in the same direction, you can apply this way. However, this is a risky, unsafe plan so the drivers are weak, absolutely not try.

When driving on an empty road without a street light, you can follow the truck, you should run to the right of the road for motorbikes and run in front of the truck 1-2 meters away to be able to use You can light your car when running. When running in front of the truck, you should pay attention to the truck with a whistle to know. If you follow, the truck driver understands that you want to follow.

When you follow a truck, you have to concentrate on and hold the steering wheel firmly in order to reflect it in any situation.

Note : You absolutely should not ride a motorbike in the back of a truck, because it is impossible to see the road and cannot avoid potholes or obstacles when encountered.

With the experience of going on a long journey into the rain above, hope you will accumulate more for yourself to be able to apply. However, a heartfelt advice for you is not to apply it too often, and only use it in a reluctant situation, there is no other way and should not be risky.

Wish you all go safe!
