

# Explore a special high-tech bathroom with the ability to control everything by voice from the toilet to the mirror

This new set of products, called Veil Lighted, allows users to control lighting, colors and colors on the decorative lights of all objects in the bathroom thanks to the application of free voice support technology. Kohler Konnect hand.

Recently, Kohler - a company specializing in selling famous kitchen and bathroom products has introduced a new line of high-tech products for bathroom space with voice control capabilities.

Specifically, this new set of products, called Veil Lighted, allows users to control lighting, color and color on decorative lights of all objects in the bathroom by using assistive technology. Kohler Konnect hands-free voice.

Thanks to the support of Alexa virtual assistant or Google Assistant, these devices can adjust the light according to your mood. You can even request a toilet seat before using it. The devices in this kit include mirrors, sinks, smart toilets and bathtubs. And of course they are all equipped with voice control technology.

Kohler has partnered with Signify (Philips Lighting), a group specializing in famous lighting equipment to create intelligent lighting systems on objects. Depending on the time of day or depending on the user's mood, the light on objects can be changed accordingly, helping to better synchronize with the natural biological rhythm of people.

Of course, the price of this modern bathroom furniture is not cheap at all. In particular, the lowest priced item also reached 899 USD (about 20.9 million), while the smart toilet Numi 2.0 also cost up to 7,000 USD (162 million).

Let's find out, what are the interesting products for this modern bathroom space?

Just waving, remote control or voice, users can change the color temperature of the light on the mirror. This is an extremely useful feature if your mood that day is not good and needs a deep and quiet color. Even this mirror can magnify your image.

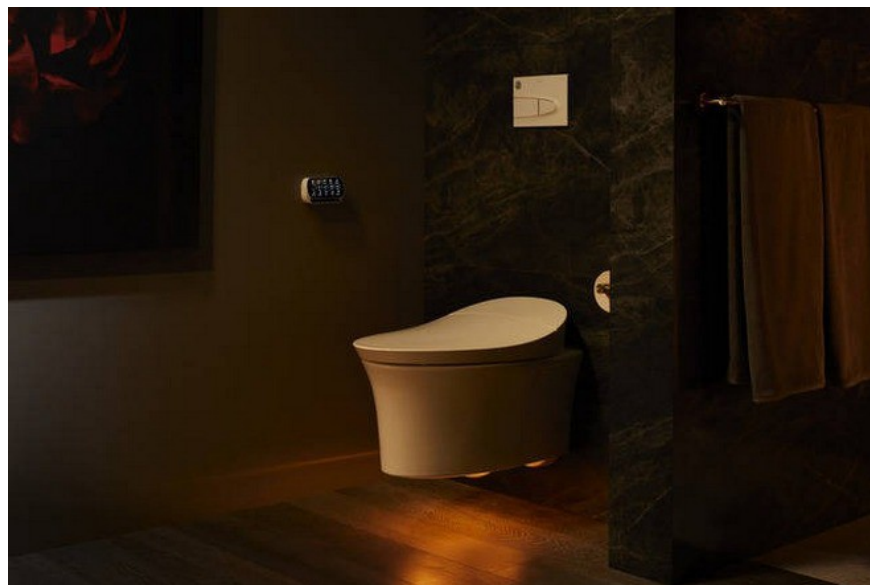

The bathtub is located with curves designed to bring the most comfort to the user. This bathtub costs up to 5,000 USD (116 million VND).

The sink and a glass cabinet underneath contain delicate, designed towels and cosmetics that add elegance to the bathroom interior. In particular, the glass door of the cabinet can be changed from opaque to transparent very nicely.

The lighting system is also installed in the toilet's position to bring the light that best suits the user's mood. In winter, users can use the seat heating system to get the most comfort.

The panoramic view of the modern bathroom when equipped with modern and smart products in the collection named Veil Lighted.
