According to software market research departments, AVG is one of the most trusted security software in the world, with millions of users.

AVG antivirus free version is also one of the most used security software in Vietnam.

However, AVG Antivirus only provides users with features to kill viruses and spyware, and features such as firewalls, prevent attacks, computer hijacking, spam blocking . then users must thanks to another software. AVG Internet Security will be a suitable alternative.

AVG Internet Security is a security tool package, which gives your computer the power to fight viruses, spyware, hackers, spam, malicious software and phishing websites . AVG Internet Security is able to view your choice. suitable for personal users and small offices because of its powerful features as well as user-friendly interface, easy to use.

With this software, users can display all active processes (similar to the Task Manager feature of Windows), manage plugins in IE, cancel autorun functions of CD / DVD or USB (to prevent autorun virus) .

Let's take a look at the outstanding features of AVG Internet Security:

- Protect your computer against viruses, trojans, worms, and other malicious, spyware.
- LinkScanner feature helps protect users from phishing and malicious websites.
- Anti-Spam feature helps fight spam and Anti-Phising helps filter out emails containing phishing content.
- Safe Search feature, helps to search safely from the Internet, avoiding unwanted content.
- Software also includes firewall (Firewall) feature to help prevent hackers' attacks or information being sent out illegally.
- For gamers, AVG Internet Security provides Gamer Mode, which allows users to play online games without having to worry about Internet connection notification dialogs like other firewall software.
- Real-time protection feature, helping to timely prevent virus intrusion, protect login information, attacks through software errors .
- Fast and light operation speed even on computers with not too strong configuration.

In short, AVG Internet Security provides users with full security features from basic to advanced to ensure safety.

Extend the trial period of AVG Internet Security:

The trial version of the software allows use for 30 days, then users have to pay 52.95 USD to buy the full version.
