In just 24 hours, Facebook, Instagram, and WhatsApp have collapsed globally, Telegram messaging application has added 3 million new registered users. Pavel Durov, founder and CEO Telegram announced this terrible number on his own Telegram channel. As of March 2018, Telegram has only 200 million active users.

Telegram has always emphasized that they always put the interests of users first. And protecting users' privacy is one of the things they care about most. In 2013, Telegram integrated the ability to encode two ends, until 3 years WhatsApp did the same thing.
