

Facebook Container, Facebook blocking extension to track Mozilla users

Mozilla recently released a new utility called 'Facebook Container', which helps prevent Facebook from tracking user habits when online.

Mozilla recently released a new utility called 'Facebook Container', which helps prevent Facebook from tracking user habits when online.

'Facebook Container' prevents Facebook from collecting information on the websites you visit and gives you suggestions for you by creating a blue browser tab, completely isolating the Facebook activity session with those. Your activity on the Internet. Specifically, with this new Firefox utility, Facebook will not be able to track user activity on any website other than Facebook.com.

Currently, Facebook owns a tracking system for users on many different websites. Users will not be able to know when their data is shared and used for different purposes.

Therefore, Mozilla hopes that Firefox's new utility can limit and control this situation, helping users both ensure privacy without deleting personal Facebook.

Instructions for downloading and installing the 'Facebook Container' utility.

Step 1: Download and install Firefox browser.

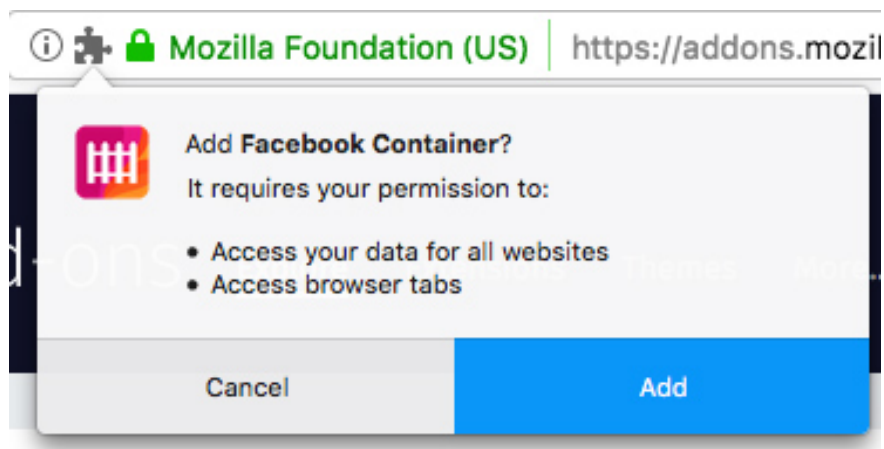

Meet Firefox Quantum.
Fast for good.
