

Facebook will have a completely new interface for Vietnamese users

Facebook's new interface is refreshed graphic style, from logos, icons to fonts, layouts ...

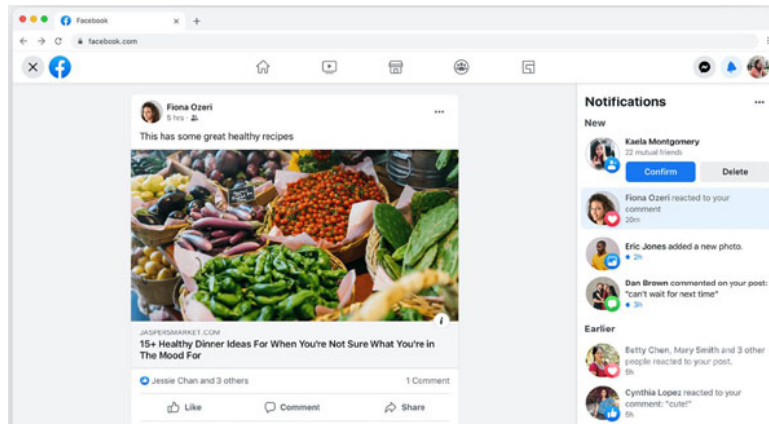

Recently, Facebook has suggested a new version of this social network for a few users in Vietnam when accessing the web version. When users choose to agree, a new window will appear with a completely new interface of Facebook.

Facebook's new interface is refreshing the graphic style, from logos, icons to fonts, layouts . Overall, the new Facebook will have a much simpler layout than before and have a bigger font. .

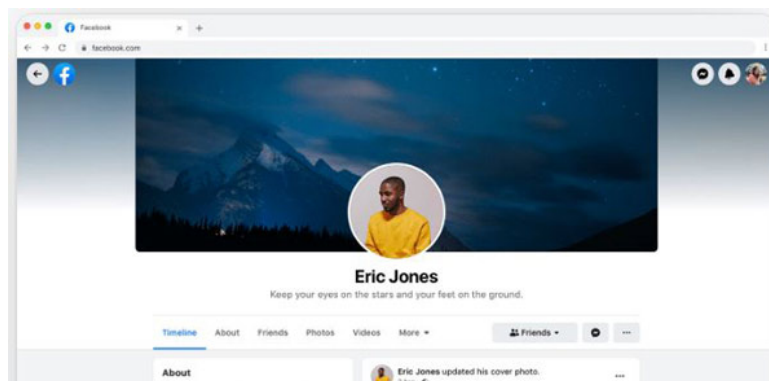

Facebook with a completely new interface will have many changes from font, layout to style.

The new Facebook version will have a greener and more shiny green instead of the traditional blue.

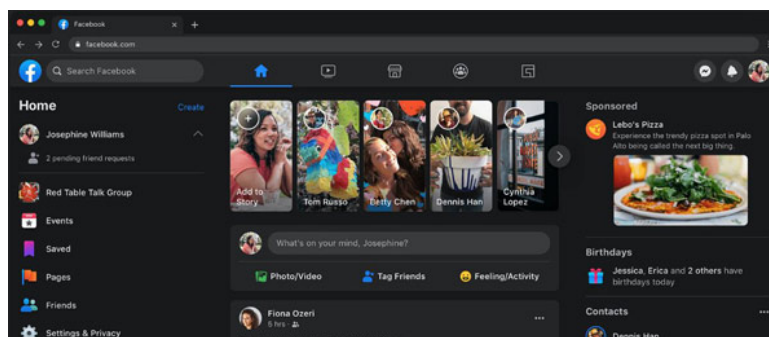

The identity of Facebook is much more fresh than before.

On the user's personal page, instead of the layout in the left corner as before, the circle containing the avatar image (avatar) will be placed in the middle position.

The layout changes are clearly visible on the user's personal page.

Facebook new web version will have a dark interface, the white space is replaced to help users reduce eye strain when used for long periods of time.

The new Facebook web version is also equipped with a dark theme.

According to Facebook, when the new version can try it out, the social network will give an official notice to users.
