

Facebook will launch Horizon virtual reality social network in 2020

Facebook has announced it is developing a virtual reality-based social network called Horizon to provide users with an online role-playing game (MMO) experience in its virtual world.

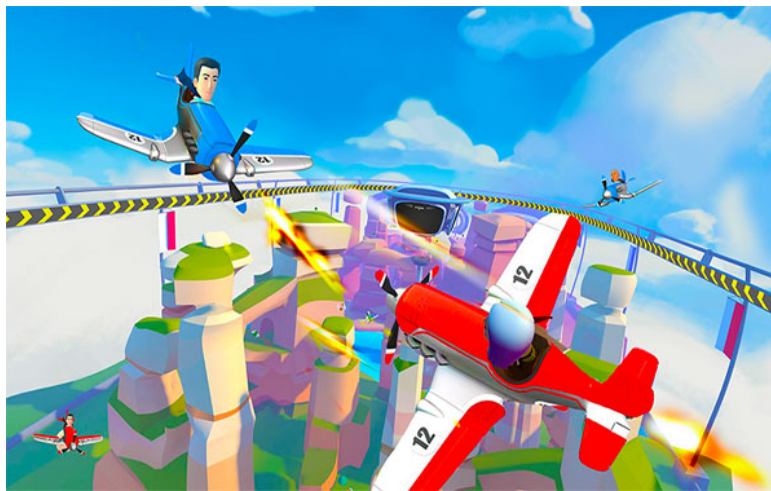

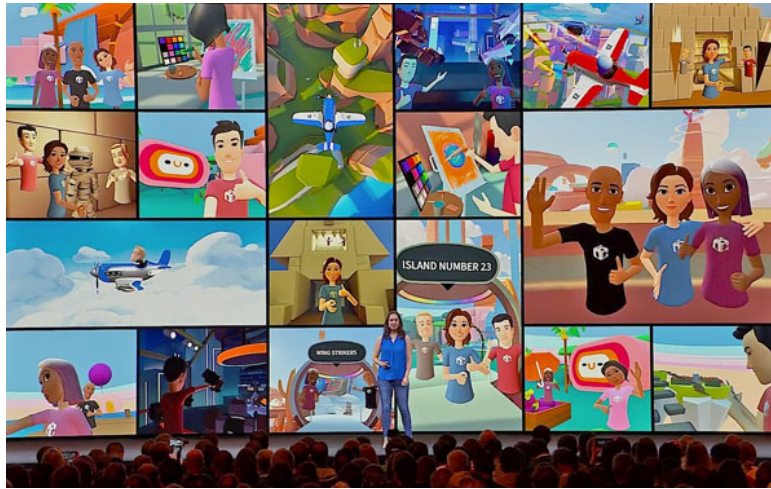

At Oculus, Facebook announced it was developing a virtual reality-based social network called Horizon to give users an online role-playing game (MMO) experience in the virtual world. made by the company. This virtual reality social network is expected to launch in 2020.

1. Many Vietnamese users cannot access Facebook or Instagram because they do not receive OTP codes
2. Facebook stopped automatic face recognition because of a lawsuit
3. If your device has these two Android apps installed, delete them now

This new social network of Facebook is described as an RPG.

Users will create an account of characters (such as The Sims game) and enter the virtual world created by Facebook to meet, play games, learn life skills, attend events built by Facebook . There is no limit to this social network so users can build their own world and activities.

Horizon supports two virtual reality devices from Facebook, Oculus Rift and Oculus Quest. User can play

Please watch the promotional video played by Facebook at the last event:

The idea of turning your social network into a virtual world, where users can interact, meet each other like in real life has been long cherished by Facebook. In October 2017, Facebook first introduced the idea as Spaces at the Oculus Connect event but was closed.

Currently, Facebook is running a beta program and developing 3D virtual reality glasses to serve this new social network in the future. Other information about the new Horizon virtual reality social network, such as how to interact with friends through virtual reality, whether it is connected to a Facebook account or not, has not been revealed by Facebook.
