

FaceTime on iPhone 7 and iPhone 7 Plus does not work, this is how to fix it

FaceTime and iMessage are Apple's great messaging and video calling services. When activating FaceTime on Apple devices, users can make free voice calls or video calls in Apple's environment. Setting up FaceTime on iPhone and iPad is quite simple, but in some cases, the server / device is faulty or a setup error may be the cause of an error that cannot activate FaceTime on iOS or Mac devices. .

FaceTime and **iMessage** are Apple's great messaging and video calling services. When activating FaceTime on Apple devices, users can make free voice calls or video calls in Apple's environment. Setting up FaceTime on iPhone and iPad is quite simple, but in some cases, the server / device is faulty or a setup error may be the cause of an error that cannot activate FaceTime on iOS or Mac devices. .

In the following article, Network Administrator will guide you how to fix **FaceTime** errors that do not work on iPhone 7 and iPhone 7 Plus.

Fixed FaceTime error not working on iPhone 7 and iPhone 7 Plus

1. Restart or force the iPhone to restart

- **Restart** iPhone 7 or iPhone 7 Plus:

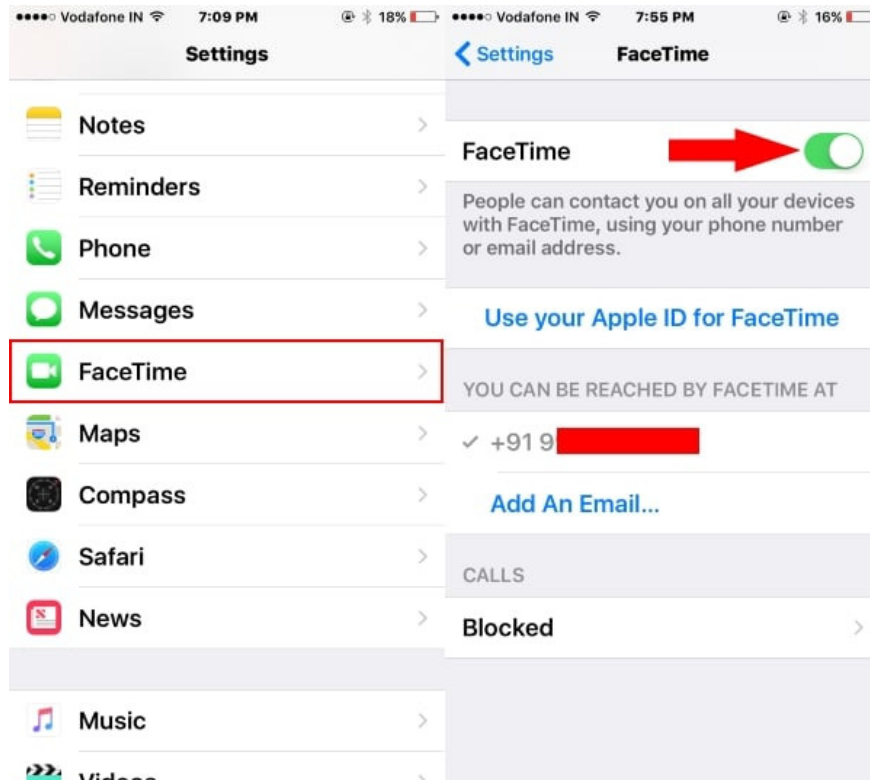

Press and hold the on / off button.

- **Forced to restart** iPhone 7 or iPhone 7 Plus:

2. Disable / enable FaceTime

To disable / enable FaceTime, follow the steps below:

1. First access the **Settings** app.
2. Next scroll down, find FaceTime, then **disable FaceTime** and then reactivate.

Also check and make sure you have set up FaceTime on Apple ID or contact. Switch to another Apple ID or use FaceTime to activate Apple ID, then click ' *Use Your Apple ID for FaceTime* '.

3. Check the block list

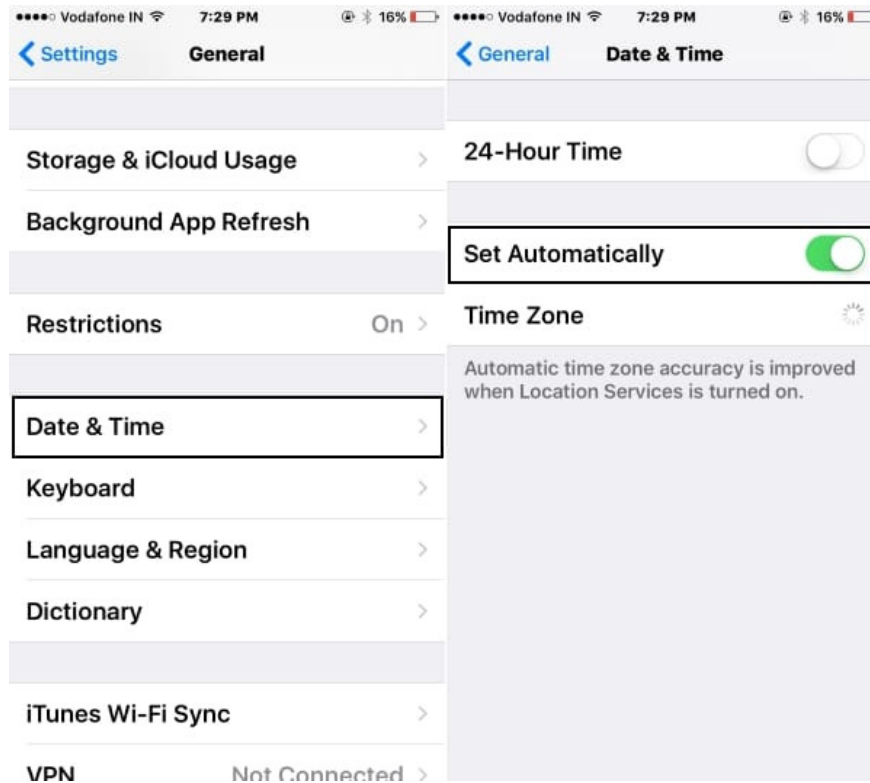

If you add a contact number to the block list, then you cannot receive voice calls or FaceTime video calls from that blocked user.

4. Enable maximum time

It can take up to 24 hours to activate FaceTime on Apple Server. You can then contact the carrier or Apple support center. It is very likely that your carrier is limited to the FaceTime server on the Data Plan or Region (area).

5. Check the date and time settings on iPhone 7 and iPhone 7 Plus

On your iPhone 7, iPhone 7 Plus device, go to **Settings** => **General** => **Date & Time** (Enable Set Automatically / Time Zone).

6. Check Internet connection

Check the Internet data connection that your iPhone device receives (Carrier Data Plan or Wifi internet) by testing on the browser search section.
