Let's say if you are female and want your voice to sound like a man, here is the tool that will help you do just that. You can apply a robotic effect to make an alien-like sound, or an echo effect to make it sound like you are speaking from the bottom of a well or tunnel.

Just integrate Fake Voice with your IM and make chats with your friends. Whether you want to have fun with your friends or you want to improve the quality of your voice for recording, this tool gives you full control over your voice.

Fake Voice 7.0 is a software program developed by Web Solution Mart. The main executable file is named fv.exe. The setup package usually installs about 14 files and is usually more than 4.5MB in size. The program installs a standalone sound driver on your sound card. You can then select it through the Windows volume control to enjoy the changes.
