

# Fall Guys will land on PS5 platform in the near future?

Can Devolver Digital continue the success of Fall Guys on PS4 by bringing this hit game to PS5 in the future?

Fall Guys: Ultimate Knockout is one of the most popular games in 2020. Possessing a fun, vibrant gameplay that connects gamers in the era of the enemy, Fall Guys has become a global phenomenon and extremely widespread.

This unexpected success has also helped Fall Guys catch the eye of brands, leading to a series of in-game costume collabs with Tim Burton's *The Nightmare Before Christmas*, *Sonic the Hedgehog*.

Not only that, Fall Guys has also achieved a lot of success when landing on the PS4 platform as a free PS Plus game at the time of launch. Fall Guys even set a new world record for the most downloaded title from PS Plus.

Although Fall Guys has now lost its charm, it is still one of the most interesting multiplayer games in the world. And some recent updates seem to have tacitly informed fans that Fall Guys is coming to the next-gen PS5 console.

This is a new discovery from @PlayStationSize - a Twitter account dedicated to tracking upcoming games on PlayStation, as well as the space they will take up. And this account recently found a new Fall Guys: Ultimate Knockout beta added to the PS5 database.

If this information is correct then Fall Guys can be played on PS5 via backwards compatibility, similar to many other PS4 titles.
