

FIFA 21 and the changes are essential to keep fire for Career Mode

Career Mode of FIFA is inherently a 'know and be miserable talk forever' because no matter what type of modification EA is still hard to please all fans.

Unlike the players who splash hard money to load FIFA Point or plow hard work in the Season Arena and Rank Match of FIFA Ultimate Team from day to month to earn money to open the pack. The pleasure of leisurely peasants who enjoy watching the life pass slowly to make joy is the Career Mode, where time seems to stop so that when people have free time, they can go to the game without worrying about snoring. relegation if not online. However, despite having a goal that is completely different from the FUT's fans, the hard-working people in the Career Mode still have the strict requirements that EA Sports struggles from year to year. could not meet. Let's take a look at some of the predictive features that will be added in this year's **FIFA 21** release .

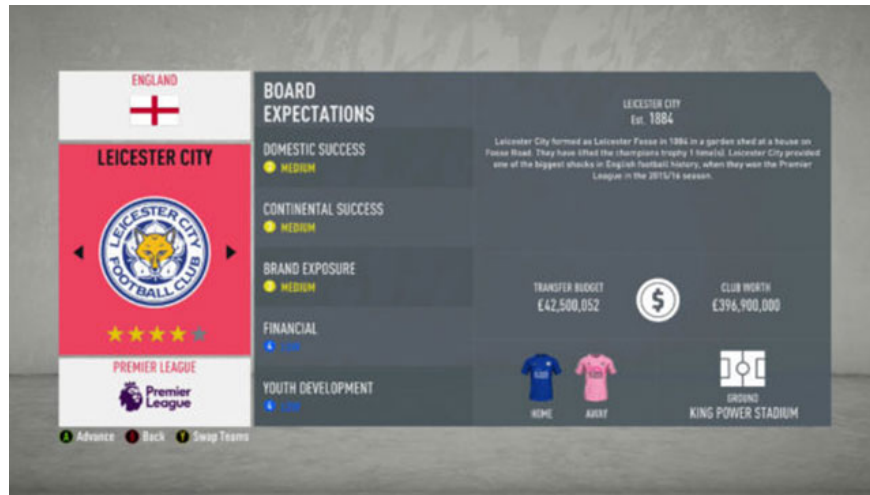

FIFA 21 and predictions about changing OVR, Messi or Ronaldo topped the table?

Ronaldo moved to play in the Anpenine region, where the Serie A once dominated the world through a series of European cups but that was a few decades ago.

Increase communication with the Board of Directors

In Career Mode during the past few years, communication with the board members seems to be an extravagant element because it is almost exclusively made available. The Football Manager football management game series has an acceptable interaction mechanism when the coach can propose to reduce the level of expectations set at the beginning of the season at the cost of shopping as well. But FIFA doesn't have any of the same interactive features, which in turn has led to the expectations of management imposed on the coach sometimes

becoming unattainable, disproportionate and even crazy. Assuming you are leading MU and the goal is to win the Champions League in the next three years, it is a difficult problem but we have time to find the solution. And in FIFA 20 career mode, simply above what is said to follow, or will be fired no matter how unreasonable that request.

Some other inconveniences in not being able to communicate with the management are the decision to focus on winning the Scudetto but to sacrifice some smaller goals like the National Cup or sign an expensive star by committing to have certain achievements. In this regard, FIFA's rival PES does very well when the PES 2020 version allows players to sit down to talk with the board of the team to set the targets that the coach will achieve at the end of the season. solution. Obviously FIFA 21 does not need to look at all the small things from the opponent but the communication enhancement mission with the management of the club is definitely an element that EA Sports should really learn because it adds value to Career Mode. a lot of.

The kit allows customizing competition apparel

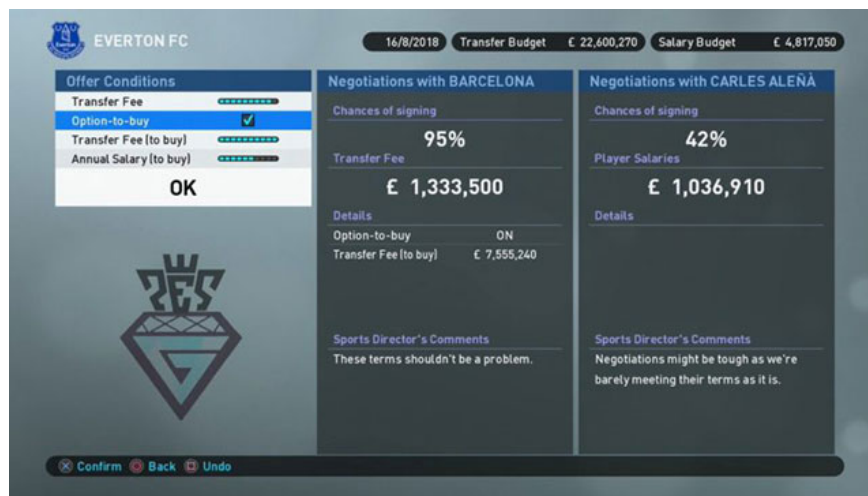

Every man has a dream of rich life or become superheroes to help the weak. That's why many people start simulated game modes with teams from League 2 or even the third division of the Bundesliga. The feeling of bringing a country club next to Real Madrid in the Champions League arena is that extremely hard to describe

that you can never feel if you have strong teams like MU, Bayer Munich or even Barcelona. But one thing that still annoys people is that the outfit looked like it was purchased 10 years ago compared to the modern club jersey. Well, besides the buttocks, the costumes, the logos as well as the stadium for the teams in the low tournament, Providing a custom kit for gamers to mess around with is also a good idea to show how well the game is compatible with the new generation console that will launch later this year. Of course, it also depends on whether FIFA 21 will be released on PS5 or Xbox Series X.

Computation in transfer contracts

In fact, both PES and FIFA still have to say hello to Football Manager in terms of in-depth details of the player transfer contract. In Sports Interactive's game, the coach has different options depending on the situation and the role of each player. With potential preschools, it is almost impossible to compete regularly for the first team unless you are Messi, Ronaldo or at least Kylian Mbappé to have hope. Now a loan agreement with a term of 1 to 2 years at other tournaments or to another club right in that tournament is a necessary option. It is a good idea for a well-established player to lose performance, but playing at U23 or the Reserve team is completely ineffective, it is a good idea to rent it elsewhere to share your salary.

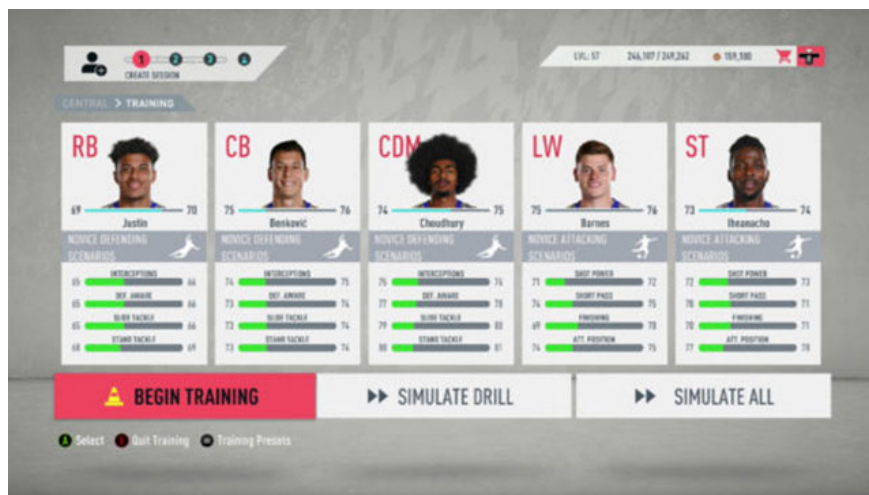

In addition, buying and selling players in reality is not like going to the market, when you see the item like that, pay and take it home. Purchases between the two clubs may be extended for several years because of the installment payment or at least the end of the season if a buyout clause is added to the loan agreement. In addition to direct trading, clubs can also use people to exchange people, then make additional money or get money back depending on the transfer price of the assigned player. A few FIFA versions have previously added a buyback option when requesting the transfer of a young player from a big club, it's unclear why this interesting feature suddenly disappeared while in a different world. PES's Master League players always have this option. It would be great if FIFA's Career Mode 21 revived the detailed options in the transfer stage.

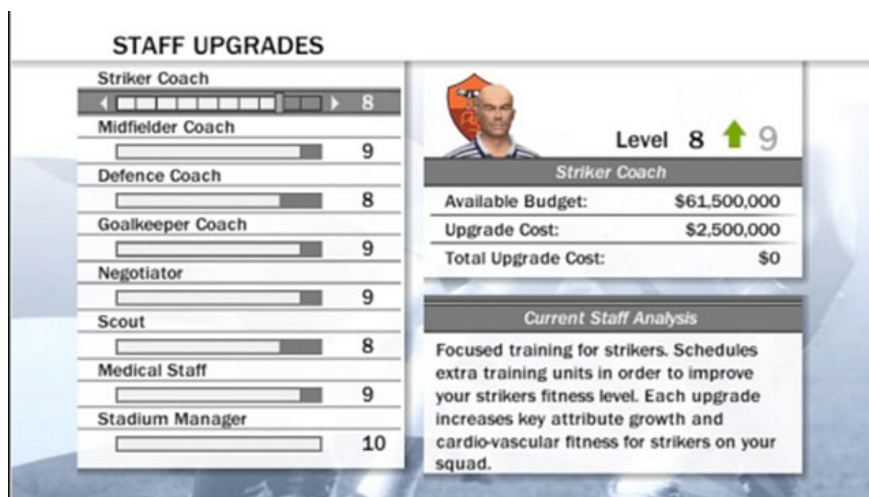

Importance of training young players academy

Finding, signing and constantly training young high-potential footballers is the most comfortable way to succeed in this game mode, especially when you have a hobby of making superheroes. Small team with tight financial. However, with the ignorance of the Youth Academy system in the current version, which requires you to accurately track each player to be guided by a handheld style, they will maximize their potential. . This is a

complete myth because even a legendary coach like Sir Alex needs an experienced subordinate such as René Meulenstein or Carlos Queiroz to closely follow the progress of Cristiano Ronaldo.

So when a dream gamer like a housewife taking care of the main team wants to have a brain ache, how much time to watch over these kids? The necessity of Youth Academy in FIFA 21 is a young team coach who can take instructions from you then do their best to keep things on track. Players in the role of the head coach only need to see the periodic report then create the opportunity for the brightest young players to breathe the air of the Premier League when needed. That's enough! There is also a need for a young tournament, where the players of the academy have space to roam and greatly help their future development.

An inadequate factor both in the first team and the young academy is the fact that each week can only focus on training resources for 5 players (? !!). This is completely absurd while the game tries to make everything more and more like the real-world soccer world. To improve this, the team at EA Sports can keep their resources focused on the 5 best players, but with the assistant coach's report on the progress of the players. other players. They may not be on the priority list because the resources of the team are limited, but in real life, just training hard, there will always be the smallest development. Now will be the competition for who has the best development or depending on the physical situation of each player.

VAR, which has been controversial for the past two years

Since the 2018 World Cup finals, there has never been a new support system for referees to stop marketing. But the question that gamers want to know is whether VAR will be brought into Career Mode of FIFA 21? It should be noted that this is not the first time a new form of football technology has been adopted by EA Sports in video games like the way they bring Goal-line into FIFA 15. There is no doubt that VAR will help the matches. The game became more unpredictable when we sometimes didn't know why we were punished until we watched the slow show again. But this will certainly affect the entertainment of the game. But is it true that FIFA fans are not sure that this sense of tension exists in the game? Football Manager 2020 has applied VAR technology to the game as a way to keep pace with the trends of the new era, but with FIFA 21 it is a completely different story.
