And to find the answer, the **Black Sea Maritime Archeology Project's** international team of archaeologists previously conducted a re-mapping of **the** ancient history of **the Black Sea** and ancient historical records of the sea.

Initially, the purpose of this was just to examine how the Black Sea near Bulgaria was about its diverse maritime history from the end of the ice age until now.

After that, the expedition began on a high-tech ship called **Stril Explorer** . This ship is fully equipped with the most advanced high technology for archaeological purposes on the seabed.

And with the remote, sophisticated archaeological search **engine ROV** , at 1,800 meters deep, extending the survey area to more than 6 nautical miles in the Black Sea, the group found an unexpected truth that surpassed their imagination. before project implementation.

As a result, the international team of Black Sea Maritime Archeology Project found more than **40 ship wrecks** on the bottom of the Black Sea, however, these traces are nearly intact, including the bodies of the children. Medieval shipwreck Rodrigo Pacheco-Ruiz, Ottoman Empire and Byzantine .

After analyzing the structure of the shipwrecks and the Black Sea cultural history, it can be seen that this series of mysterious shipwrecks in the Black Sea could be an important evidence to lighten. show more about **the diverse cultural activities** among the ancient communities living around the Black Sea region over time.

' We were surprised that the shipwreck still existed even though it was not intact in a deep environment at the bottom of the Black Sea in the absence of oxygen. This is a wonderful thing and now our team is conducting a complete exploration of more than 40 shipwrecks, which will then reproduce the landscape simulation of these ships based on information and data. The historical record has been there before ' - Explorer Adams said in a statement.
